Subject: Phone surveys ?

Where are the records of the phone survey for baiting ?? Right now in WA there are thousands being polled about if anyone was called or knows of anyone being called. As of right now not 1! Person has been contacted. What's going on there? You guys manipulate more data to get your facts to support your agenda? Got your 6 people to say no to baiting then put it up as a 65% as no? I know a ton of hunters and not 1 is opposed and this goes to every other hunter I know! No hunter is going to push for a law to ban a hunting right, cause a method they may use could come under fire. Highly disgruntled hunter in this state!
