STREAM STRATEGY

Code	Steelhead Status	Trout Rules	Fishing/Conservation
A	Resident zone	8" minimum size, daily limit 2, bait allowed.	Fishing: resident fish opportunities usually above anadromous zone, hatchery steelhead may be available
			Conservation: allows most resident trout to spawn once before harvest
B	Resident zone/resident fish concerns	8" minimum size, daily limit 2 fish, selective gear rules.	Fishing: resident fish opportunities usually above anadromous zone, hatchery steelhead may be available
			Conservation: allows most resident trout to spawn once before harvest, reduces C&R mortality associated with use of bait
C	Status good or anadromous fish juvenile presence low	14" minimum size, daily limit 2, bait allowed.	Fishing: resident trout, sea-run cutthroat, salmon, hatchery steelhead
			Conservation: 14" minimum size protects overwintering SH, allows resident trout and sea-run cutthroat to spawn once before retention.
D	Status bad or SH anadromous fish juveniles present	14" minimum size, daily limit 2, selective gear rules.	Fishing: resident trout, sea-run cutthroat, salmon, hatchery steelhead
			Conservation: selective gear rules reduces the catch&release mortality associated with use of bait. 14" minimum size protects overwintering SH, allows resident trout and sea-run cutthroat to spawn once before retention.
E	Status bad	Selective gear rules and catch&release, except ,may retain 2 hatchery steelhead	Fishing: opportunity for harvest of hatchery steelhead, often includes catch&release opportunity for sea-run cutthroat and wild steelhead. Conservation: selective gear rules reduces the catch&release mortality associated with the use of bait. Protection provided for all trout life history stages.
F	Status bad	Catch&release, selective gear rules	Fishing: no hatchery steelhead present, catch&release opportunity for trout, which may include wild steelhead. Conservation: selective gear rules reduces the C&R mortality associated with the use of bait. Protection provided for all trout life history stages.
