Hi Gretchen,
Thank you for your comment on our SEPA about the Cache Creek and 4-0 Ranch fencing project.
Please find enclosed two separate archaeological survey reports that were done for the Cache Creek and 4-0 Ranch fencing project.
The survey reports were sent in separately: June Skye sent in one request for the 4-0 Ranch project on December 17, 2013 (Log 060313-03-WDFW), and Mr. David Woodall sent the other request in on December 4th for the Cache Creek portion of the project (Log: 120413-01). Both of these survey results were returned with a *"no effect"* finding on archaeological resources.
If we have an incidental discovery of archaeological or historic materials, our plan is to stop work, secure the area, and notify the concerned tribe's cultural staff and cultural committee and the Department of Archaeology and Historic Preservation.
It appears that a survey may not be not required for this project.
If after confirming this information, you believe these survey reports are for the same locations as our project, could you please concur with Rob Whitlam's *" no effect"* findings and let the SEPA desk know that a survey for the Cache Creek portion of the project is no longer required?
Thanks,
Cindy
