Subject:	Geetsman Demolition Soil Contamination Concerns
Date:	Thursday, February 27, 2014 12:40:14 PM

Valerie,
I received a notification from our SEPA coordinator Lisa Wood of the potential for contaminated soils associated with a demolition project on WDFW lands. I am aware of the agricultural activaties on lands adjacent to the area where the demolition will occur, but not associated with the land where the demolition will occur. Please let me know what information I need to provide your office or the public regarding the potential for contaminated soils. Fell free to contact me at the number provided.

John Lindsey
