Allen
Drop off
Jacks
5% wild Hump Coho
Release mortality 3 port in GH

Tim
- Predict accurately the HR - drop out needs included
  - Arbitrary & capricious
- Comm directed thou shall not fish to last fish conservation standard - escapement
- Seasons projected at advisory meeting shows over harvest will

Robert
- in river, mid sept. - oct / netting will wipe out fish
  No directed Chinook - conservation
- QIN - comanagement
- No FW comm should occur
- two punch cards 1st 1/2 & 2nd 1/2
- release mortality studies are bias

Art.
- GN regulation need rewritten & tightened up
- should pay for own observers.

Melanie
- Sept 15
- need better data CRC's turned 2x/year
- More commercial monitors / fees for reporting
- tribe, need mediation

Bill
- Wynoochee, 2 bag limit, stop putting fish over dam. current practices need to change.

Frances - Applaud conservation objectives from Commission.
the sharing guidelines should be subordinate to that.
They are at odd w/ conservation.
Drop out/off - concern w/ getting it perfect, precautionary.
use 3 & 5% on top.
Jo~~ta~~ Durham -
Punchcard - need species specific sthd/salmon etc.
Drop out-off - Policy delegates to Director. Do not fish
to last fish.
Norm - Ask that electronic system be used for Salmon Punchcards
Model flows that need resolved, by 12/31/2014
Jack - 4 month on the Policy. Have Yoga & criteria & would like
to ~~see~~ see us manage to that.
Jack salmon encounters need addressed.
