Subject: RE: ECY SEPA 14-1912 - Black Lake Access Improvements project - Comments
Date: Wednesday, April 30, 2014 1:42:13 PM

Ms. Mendoza,

WDFW would like to thank the Washington Department of Ecology for their comments related to the Black Lake Access Improvements project, SEPA No. 14-1912. Please see the WDFW responses to your comments below.

SHORELANDS AND ENVIRONMENTAL ASSISTANCE
The local jurisdiction is Thurston County and WDFW will be working with the county on the project to ensure consistency with the Shoreline Master Program. A JARPA will be submitted to US Army Corps of Engineers and Department of Ecology.

TOXICS CLEANUP
If contamination is suspected, discovered, or occurs during improvements. Testing of the potential contaminated media will be conducted. If contamination of soil or groundwater is readily apparent, or is revealed by testing, Ecology will be notified.

WATER QUALITY
Erosion control measures will be in place prior to any clearing, grading, or construction and will be effective to prevent stormwater runoff from carrying soil and other pollutants into surface water or storm drains that lead to waters of the state. There will be no discharge of sediment-laden runoff or other pollutants. All construction debris will be properly disposed of on land and outside of the floodplain.

Again, we appreciate your review of this project. We look forward to working with you to complete the access improvements.

Thank you,

Chris Gourley
Biologist
Capital and Asset Management Program
