---

Ms. Mendoza,

WDFW thanks Ecology for their review of the Sol Duc Hatchery Fish Barrier Removal SEPA. The project is not expected to discover or encounter any toxic contamination. However, it WDFW suspects or discovers any toxics during the proposed project, WDFW will have the media tested and will inform the appropriate staff from Ecology upon result or upon immediate exposure.

WDFW thanks Ecology again for your timely and informative comments with the specific contact information in the event Toxics are discovered. WDFW looks forward to working with Ecology on this project as well as others in the future.
