---

Hi Heather,
Thank you for your comment about the downstream dispersal of toxics from the proposed project. Please see the updated project maps. I have indicated where the pond drains under the driveway using red arrows on pages 4 & 5. Water flows downhill and then joins the drainage ditch along F&S Grade Road.

This project is to introduce Grass Carp into the Gustafson Pond to suppress aquatic vegetation and there are no toxics associated with it. Can you please clarify DOE's concern that toxics will be dispersed downstream?

Thank you,

Justin Spinelli
