SITE NUMBER: H-R9-04
LOCAL NAME: Unnamed
WRIA:
*This channel has not been assigned a WRIA number due to site is an overflow channel

NORTH COAST OFF CHANNEL SITE INVENTORY DATA

RIVER SYSTEM: Hoh **DATE:** 9/2/87 **OBSERVER:** Nettnin

CHANNEL TYPE: Secondary Overflow

TRIBUTARY TO: Hoh River (20.0422)

SITE LOCATION: RB @ River Mile - 21.2 - 21.5

LEGAL DESCRIPTION:

	UPPER END	LOWER END
DISSOLVED OXYGEN:		

WATER TEMP.: (No D.O. or temperature data was taken on this date.)

AIR TEMP.:

FLOW (CFS):	< 0.25	< 0.25

SUBSTRATE TYPE: Gravel in lower end. Well vegetated at upper end.

SITE SIZE: **Length**- 330 m
Width- 6-10 ft
Depth- Channel depth = 4-5 ft.

WATER SOURCE: Currently spring and/or perc. Some overflow in winter.

DIRECTIONS TO SITE: North on Hwy 101. Turn right between mile post 178 and 179 onto the Upper Hoh Valley Road (as if going to the Hoh Rain Forest). Continue on this road for approximately 5 miles. The upper end of the channel is located across the road from a small gravel pit 0.25 miles east of the Minnie Peterson Campground.

FISH ACCESS AND CURRENT USE: Some summer and winter rearing area is available. No apparent access problems.

FLOODING POTENTIAL: Moderate to high.

LANDOWNER:

COMMENTS & RECOMMENDATIONS: Aside from a limited amount of rearing area, the importance of this channel is in its potential as an egress for ponded water in the small gravel pit to the north of the Upper Hoh Road. Further gravel excavation would probably be required before this ponds could be considered desireable habitat. Need to see pond in winter.
