COMMENTS & RECOMMENDATIONS: This channel has:
- A moderate gradient.
- Good shade developing from a 15 - 20 year old conifer plantation.
- High velocity flows at times.
- Good quality gravel, but limited spawning opportunities.
- A four foot culvert under the D-5300, no problem at this time.
- The gradient continues as moderate - steep above the D-5300.
- We should maintain the integrity of this gravel producing stream.
