## Petition for Adoption, Amendment, or Repeal of a State Administrative Rule

I have checked the box, "1. New Rule -I am requesting the agency adopt a new rule."

The subject or purpose of this rule is: In order to reduce deer harvest, primarily in NE Washington, immediately begin rule-making to create west side and east side deer tags, requiring deer hunters to choose between the west side and the east side of the state, just as elk tags are sold.

The rule is needed because: Deer numbers in NE Washington are approaching, or are at, unsustainable numbers. This is backed up by the fact that 2021 and 2022 harvest numbers were record lows, 2023 numbers not being available at this time but improvement to these numbers, if any, will be negligible.

The new rule would affect the following people or groups: Deer hunters who hunt deer in both west and east Washington.

### Further justification

The whitetail deer numbers in Northeast Washington are less than half of what they were in 2015. As documented by WDFW, harvest numbers for the last two years have set record lows. Something needs to be done to increase deer survival. No one wants shorter seasons or limited entry through draws and permits and the following recommendation will not shorten hunter time in the field. We fully understand that the Washington Department of Fish and Wildlife (WDFW) is tasked with preserving, protecting, and perpetuating wildlife in the state, while maximizing hunting opportunities to all residents and therefore, develops management plans for individual species, tracks statewide harvests of game species, and monitors status of populations around the state.

We recognize that cougar and wolf management programs need significant improvement in harvest methods and management to ensure our deer herds in Northeast Washington survive and achieve the aforementioned mission of the Department.

*Action*  
This petition requests the creation of east side/west side deer tags as elk tags were done years ago and is currently being used. Adopting the east side/west side deer tag would reduce hunter pressure and harvest on Northeast Washington herds, the same as it did for elk in Southeastern Washington. This would result in a more diverse population of does and bucks, higher fawn survival overall, and with more bucks available would reduce the predator take on does and fawns, thus helping recruitment and overall deer numbers.

*Conclusion*  
There are far too many predators in Northeast Washington and the deer herds simply are not coming back from disease and predation, each year their numbers decrease and are reaching unsustainable levels.

Per RCW 77.04.012: "... the Department shall preserve, protect perpetuate, and manage the wildlife...", "the Department shall conserve the wildlife...In a manner that does not impair the resource...", and "The commission shall attempt to maximize the public recreational... hunting opportunities of all citizens,....."

It is this mandate that sets the overall policy and direction for managing hunted wildlife. Hunters and hunting will continue to play a significant role in the conservation and management of Washington's wildlife.

Thank you,

Northeast Washington Wildlife Group
