**EMERGENCY RULE**

Under RCW 34.05.350 the agency for good cause finds:

- That immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.
- That state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.
- That in order to implement the requirements or reductions in appropriations enacted in any budget for fiscal year 2009, 2010, 2011, 2012, or 2013, which necessitates the need for the immediate adoption, amendment, or repeal of a rule, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the fiscal needs or requirements of the agency.

Reasons for this finding: There is a higher abundance of mackerel off the coast this year and sardine fishermen are having difficulty catching sardines and avoiding mackerel. Fishermen are trying their best to adhere to the current 45% restriction, but self-reported landings are in the 69% range (Ilwaco) and 49% range (Westport). The Pacific Fishery Management Council has set an annual catch target of 24,170 metric tons for the July 1, 2014 through June 30, 2015 fishing season; therefore, there is sufficient harvestable surplus of mackerel to accommodate this incidental landing increase. Maintaining a per landing limit of 75% and a seasonal limit of 50% helps ensure that the fishery remains a targeted toward sardines, rather than mackerel, which is the intent of the license approved by the Legislature. There is insufficient time to adopt permanent rules.

NEW SECTION

**WAC 220-44-09500B Coastal sardine purse seine fishery.**

Notwithstanding the provisions of WAC 220-44-095, effective immediately until further notice, it is unlawful to retain mackerel (Scombridae) or jacks (Carangidae) taken incidental to a lawful sardine fishery that in combination exceeds seventy-five percent of the weight of the total landing or fifty percent of the cumulative weight of landings on the license across the fishing season.
