Summary

Meeting dates:	November 13-14, Commission Meeting
Agenda item:	Sportfishing Regulations 2016-17 Proposals – Briefing and Public Hearing
Presenter(s):	Craig Burley, Fish Management Division Manager, Fish Program Chris Donley, Region 1 Fish Program Manager, Fish Program Annette Hoffmann, Region 4 Fish Program Manager, Fish Program Steve Thiesfeld, Region 6 Program Manager, Fish Program

Background summary:

In April 2014 the Commission approved a three year rotating rule cycle where staff and public propose conservation and significant recreation rules that pertain to waters within the Columbia Basin the first year (2014), freshwaters of the Puget Sound and Coastal regions the second year (2015), and marine finfish, forage fish, and shellfish the third year (2016).

The public was asked to submit rule proposals for the freshwaters of the Puget Sound and Coastal regions during the month of March for rules that would be effective starting July 2016. In addition, one proposal for the Lower Columbia River and tributaries was moved to this year to coordinate with Oregon to maintain consistency of rules in waters contiguous with Oregon State.

Proposals were posted online from August 7 through November 12 to receive written public comment.

Policy issue(s) you are bringing to the Commission for consideration:

Establish rules and regulations for the upcoming 2016-2017 sportfishing season(s) to ensure conservation of the fish and shellfish resource, and provide sustainable recreational fishing opportunities.

Public involvement process used and what you learned:

A public news release, online notice through the Department website, and an email to the regulation change email list in March notified people about the ability to submit rule proposals online. (Members of the public who were unable to submit proposals online were provided paper copies.)

A public news release, online notice through our website, and an email to our regulation change email list August 7 notified people of the opportunity to comment on sportfishing regulation proposals. Further, an email was sent to each member of the public that submitted a proposal to notify them of the status of their proposal and the ability to comment online. Department staff provided explanations for proposals that we recommend for further consideration and for proposals that were not recommend for further consideration. The end date for submitting comments was November 12, 2015. Members of the public who are unable to view or comment online will be provided paper copies of the recommended proposals and a form for comments. The comment forms will be entered online by WDFW staff.

In addition, four public meetings (two for Puget Sound region, one for Coast region, one for Columbia Basin region) were held to discuss the proposals and proposal process.

Action requested:

NA-Briefing and Public Hearing

Draft motion language:

NA

Justification for Commission action:

This action is justified under RCW 77.12.047.

Communications Plan:

The public (including people that submitted proposals) and our advisory groups were notified about the proposal submittal and proposal comment periods by e-mail, press release, and our website. The proposal comment period additionally included regional public meetings.

Directions were provided for those requesting a paper copy. The department website provided instructions, associated documents, a timeline, and the ability to submit and comment on proposals online.

SPORTFISHING RULE CHANGE PROPOSALS

In April 2014 the Commission approved a three year rotating rule cycle where staff and public propose conservation and significant recreation rules that pertain to waters within the Columbia Basin the first year (2014), freshwaters of the Puget Sound and Coastal regions the second year (2015), and marine finfish, forage fish, and shellfish the third year (2016). The public was asked to submit rule proposals for the freshwaters of the Puget Sound and Coastal regions during the month of March for rules that would be effective starting July 2016. In addition, one proposal for the Lower Columbia River and tributaries was moved to this year to coordinate with Oregon to maintain consistency of rules in waters contiguous with Oregon State.

This year, the department is recommending 50 rule proposals. Four public meetings occurred as shown in the table below. Written public comments are due by November 12, 2015. Oral comments will be received at the Public Hearing portion of the Commission Meeting November 13-14, 2015.

Public Meeting Table.

NOT REGION SPECIFIC

1. Technical changes

Type of Rule Change Proposal

Conservation

Short Description

Corrects Washington Administrative Code language to reflect rule adoptions made by the Commission (technical changes). Formats the language in a clear structure and corrects mistakes in spelling, etc.

Explanation

This proposal corrects errors in WAC language and is a technical fix to address these errors. This change is needed so that the WAC language matches the Commission's intent.

Proposal 1 Table. Technical changes.

Number	Issue	Details
1	Rule location in the Washington Administration Code (WAC); needs to be moved to a different WAC.	Move the Big Quilcene River fishing rules out of the coastal WAC and into the Puget Sound WAC.
2	Rule location in the Washington Administration Code (WAC); needs to be moved to a different WAC.	Move Sturgeon information out of the Freshwater Exceptions WACs and into the Statewide Sturgeon WAC.
3	Spelling Errors--make spelling consistent with USGS	As needed.
4	Clarify closed waters	Because streams are now closed unless open, closed language in the Freshwater Exceptions WAC is only needed for clarification. As a result, closed water information that is not needed for clarification will be removed.
5	Schneider Creek description correction	The description of Schneider Creek currently states "Mouth upstream to falls." There are no falls in Schneider Creek so "falls" will be removed.

Written Testimony (4 comments)

Support (3): Three comments support proposal.

Oppose (0): No comments oppose proposal.

General (1): Comment includes:

- The department should close part of a river or stream if there is a need to protect spawning fish.

2. Clarify fishing "fly" definition

Type of Rule Change Proposal

Recreational

Short Description

Clarify definition of what constitutes a fishing "fly."

Explanation

Add foam, rubber and lead wire/tape to clarify what materials are allowable for the construction of a fishing fly.

Written Testimony (39 comments)

Support (21): Comment includes:

- This change would be more consistent with how flies are currently tied and makes sense;
- I agree with this change;
- This proposal seems very reasonable given the prolific use of foam and rubber in today's salmon and steelhead fly tying.

Oppose (2): Comment includes:

The definition of "fly" already allows the use of the listed materials, making this proposal a waste of time and money.

General (16): Comment include:

- Don't allow the use of lead;
- Add the use of beads;
- Add a statement about the ability to adding just about anything to the hook;
- An indicator/float to the leader/tippet should also be considered fly fishing. An indicator does not add to the angler's ability to cast the line forward, which is truly the difference between conventional fishing versus fly fishing;
- Fly tiers are pretty creative, and it will be unlikely that all possible materials will be able to be named in this regulation. Provide an example of types of acceptable materials along with words such as "and similar materials" or "materials with similar performance features;"
- Current regulations around fly fishing are due for a major update...there should be much more extensive rewriting of both the definitions of a fly and fly fishing only waters to be inclusive of the equipment and techniques used in modern practice of fly fishing;
- The definition should be "a lure cast with a fly line";
- Define what fly fishing is not.

3. Remove internal combustion motors prohibition on small streams

Type of Rule Change Proposal

Recreational

Short Description

Remove unnecessary Internal Combustion Motor prohibition rule from small streams in Western Washington.

Explanation

This change removes the internal combustion motor (ICM) prohibition from small rivers and creeks where the use of a floating device equipped with an ICM is impractical and would not be considered feasible. Removing these prohibitions will streamline fishing regulations from rivers that include Skokomish, Tahuya and Union.

Written Testimony (20 comments)

Support (6): Comment includes:

- Support making text less convoluted;
- Reduces text in pamphlet.

Oppose (10): Comment includes:

- Just because it seems impractical to most people does not mean that some people would drive boats up them;

- I see no need to change wording as it now exists;
- Once this rule is allowed, there will be more rivers added to the list;
- Prefer boat length and horse power restrictions.

General (4): Comment includes

- Define what is meant by small streams or small flows.

4. Allow harvest of Grass Carp

Type of Rule Change Proposal

Recreational

Short Description

Allow harvest of Grass Carp in select waters in Western Washington.

Explanation

Some lakes where grass carp were stocked are experiencing overgrazing of aquatic macrophytes due to overabundant grass carp populations. In an attempt to develop an effective grass carp population control method, WDFW would like to allow harvest in specific lakes to reduce carp abundances. See Table.

[Proposal 4 Table. Allow harvest of Grass Carp](#)

Number	Lake	County	Proposed Rule
1	Campbell	Skagit	No limit for anglers and bow fishers
2	Lone	Island	No limit for anglers and bow fishers
3	Duck	Grays Harbor	No limit for anglers and bow fishers

Written Testimony (17 comments)

Support (17): Comment includes:

- Add Silver Lake in Cowlitz County and Duck Lake in Grays Harbor County;
- Lone Lake has been overgrazed and some carp thinning should help;
- Consider mandatory retention.

Oppose (0): No comment opposes.

General (0): All comments favor this proposal.

5. Remove Crappie harvest restrictions

Type of Rule Change Proposal

Recreational

Short Description

Increase harvest opportunity for Crappie in select Western Washington lakes.

Explanation

Remove minimum size 9" and 10 fish daily bag limit. The harvest size and daily bag limit was put into place to grow larger more abundant Crappie in these lakes. Further monitoring and data collection reveals that

these lakes do not have the proper forage and growth rates to produce abundant Crappie greater than 9 inches in length. Anglers should be allowed to harvest unlimited Crappie at all sizes. See Table.

Proposal 5 Table. Remove Crappie harvest restrictions.

Number	Region	Lake	County	Current Rule	Proposed rule
1	Puget Sound	Campbell	Skagit	Year-round, minimum size 9 " & daily limit ten	No minimum size and no daily limit
2	Puget Sound	Cassidy	Snohomish	Year-round, minimum size 9 " & daily limit ten	No minimum size and no daily limit
3	Coast	Duck	Grays Harbor	Year-round, minimum size 9 " & daily limit ten	No minimum size and no daily limit
4	Puget Sound	Sawyer	King	Year-round, minimum size 9 " & daily limit ten	No minimum size and no daily limit

Written Testimony (4 comments)

Support (4) Comment includes:

- Provides fishing opportunity and reduces over population of species;
- Removing as many as possible will produce more quality-sized fish;
- Remove all restrictions on non-native, warmwater species.

Oppose (0): No comment opposes.

General (0): All comments favor this proposal.

6. Remove daily limit on Brook Trout in Western Washington

Type of Rule Change Proposal

Conservation

Short Description

Remove daily bag limits on Brook Trout in Western Washington.

Explanation

Removes the daily minimum size and daily limit on Eastern Brook Trout for the Puget Sound and Coast, with a few exceptions (e.g. Ross Lake). This provides recreational opportunity and helps to remove these introduced fish from Washington waters where there is a conservation concern for species that Eastern Brook Trout predate upon or compete with.

Written Testimony (8 comments)

Support (6): Comment includes:

- This is the right thing to do and should have been done many years ago;
- Propose going further and removing the limit in Eastern Washington high mountain lakes and streams also;
- Support removing brook trout in favor of promoting native salmonids.

Oppose (2): Comments include:

We cannot realistically return all of our streams to native fish only and the typical angler prefers a variety of trout;

- Do not remove size and daily limits on any trout for Puget Sound and Coast, without exception.

General (0): All comment favors or opposes proposal.

7. Allow retention of stray hatchery Steelhead

Type of Rule Change Proposal

Conservation

Short Description

Allows retention of stray hatchery steelhead in streams in Regions 4 and 6.

Explanation

This proposal allows anglers to keep stray hatchery steelhead caught while fishing for salmon or game fish. This rule change would allow and encourage anglers to remove these stray hatchery steelhead that are not needed for hatchery propagation and could have unwanted genetic and competitive impacts on wild steelhead present in the watershed.

Written Testimony (29 comments)

Support (26): Comment includes:

- A win-win for recreational anglers and conservation;
- Science dictates this is the responsible thing to do;
- Do not consider as part of the daily limit;
- Do not require to be recorded on the catch record card.

Oppose (3): Comment includes:

- Will lead directly to abuse and catching on non-stray steelhead;
- This will negatively impact diversity.

General (0): All comments favor or oppose to this proposal.

8. Adjust Trout harvest regulations for lowland lake fisheries

Type of Rule Change Proposal

Recreational

Short Description

Remove the harvest rules that limit anglers to no more than 2 trout greater than 14 inches in length. Increase harvest opportunity for large Trout and simplify rules in select Western Washington lakes.

Explanation

The original rule was implemented because few larger fish were being stocked and many anglers were high-grading smaller fish. In 2012, hatcheries increased stocking size to 2.5 fish per pound reducing this problem. See Table.

Proposal 8 Table. Adjust Trout harvest regulations for lowland lake fisheries. The current rule is daily limit 5 fish and no more than 2 trout over 14". This proposal removes the 2 over 14" requirement and the daily limit is changed to 5 Trout. The original rule was implemented because few larger fish were being stocked and many anglers were high-grading smaller fish. In 2012 hatcheries increased stocking size to 2.5 fish per pound, reducing this problem.

Written Testimony (15 comments)

Support (8): Comment includes:

- All fish caught using bait should be retained and this should be made very clear in the regulations;
- With the planting of leftover Skamania steelhead smolt into lakes this makes sense.

Oppose (4): Comment includes:

- Would like to see more quality trout fisheries in the lakes around the Puget Sound area;
- Limits allow fish to be available to others throughout the season;
- The current rule curtails wastage.

General (3): Comment includes:

- Plant more large trout in King and Snohomish county lakes rather than the other counties;
- Raise the size limit to 18" or 20" to allow more harvest of medium size trout but limit the overharvest of large trout.
- When using bait, it is better to require the first 5 hatchery fish caught be retained.

9. Provide additional year-round fishing opportunity

Type of Rule Change Proposal

Recreational

Short Description

Open additional lakes to year-round fishing opportunity.

Explanation

A sector of the public is requesting more year-round fishing opportunity. A number of lakes were proposed by the public and WDFW staff to be considered for this expanded season. See Table.

[Proposal 9 Table. Provide additional year-round fishing opportunity.](#)

Number	Lake	County	Current Season	Proposed Season

9	Vogler	Skagit	4th Sat. in April - Oct. 31	Year-round
10	Ward	Thurston	4th Sat. in April - Oct. 31	Year-round

Written Testimony (42 comments)

Support (21): Comments include:

- Would like to see more year round quality lakes in the greater Puget Sound area;
- More legal fishers help decrease the number of folks who don't follow the rules;
- In particular support Summit Lake, where there are Kokanee, and prefer the speed limit be maintained at 5 mph;
- Many of these lakes can have blue green algae blooms in the winter so a cooler season would be great;
- This will help thin out the perch and will be good for merchants around the lakes;

- Would like to know if maintenance schedule will be adjusted and if there be additional fish stocking;
- Boaters who use the lake to flush out salt water or dirtier lake water from their boat into Summit Lake has to be addressed.

Oppose (21): All opposing comments regard Summit Lake. Comments include:

- Lake is the main drinking water for majority of residents;
- Concern about increased theft and litter;
- Boat launch maintenance;
- Additional pressure on fish population.

General Comment (0): All comments favor or oppose this proposal.

10. Increase Trout fishing opportunity in streams

Type of Rule Change Proposal

Recreational

Short Description

Increase Trout fishing opportunity in select streams in Western Washington.

Explanation

WDFW is seeking to expand the number of streams and season duration available for Trout fishing opportunity. These rule changes add additional angling days to these fisheries. See Table.

Proposal 10 Table. Increase Trout fishing opportunity in streams.

Number	Watershed	Water	Current Rule	Proposed	Explanation
1	Chambers Creek (Pierce Co.)	Flett Creek	Closed	July 1-Oct. 31. Min. size 14"; Daily limit 2. Selective gear rules.	Provide recreational opportunity for abundant Coastal Cutthroat.
2	Chambers Creek (Pierce Co.)	Leach Creek	Closed	July 1-Oct. 31. Catch and Release. Selective gear rules.	Provide recreational opportunity for abundant Coastal Cutthroat.

Written Testimony (16 comments)

Support (6): Comment includes:

- Native fish and their freshwater phenotypes have been extirpated for a long time, so I do not see any negative impacts;
- Support increasing trout fishing opportunities in Western Washington streams, they have been significantly reduced over the years.

Oppose (7): Comment includes:

- Flett Creek cutthroat have a greater value to recreational fishers in the Puget Sound;
- These are very small streams and cannot take much pressure;
- We need more sanctuaries for fish.

General (2): Comments include:

- Increase only catch and release and fly fishing only waters for trout fishing;
- To protect the resource, make these two streams fly fishing only or don't open them.

11. Modify Trout fishing opportunity in select Western Washington streams

Type of Rule Change Proposal

Conservation

Short Description

Consistent with the stream strategy approach, adjust fishing rules for ESA listed Steelhead protection and allow Trout fishing where appropriate.

Explanation

Close portions of these streams that harbor adult and juvenile ESA listed Steelhead for conservation reasons. In addition, open for trout fishing portions of these streams that are above the anadromous zone. See Table.

From Falls located 0.4 mile upstream from the mouth to headwaters. Open from Saturday before Memorial Day to Oct. 31. Statewide min. size/ daily limit.	Closes the section of river in the anadromous zone and increase opportunity in the secton where anadromous fish are not present.
27	Snohomish	Lake TwentyTwo Creek (South Fork Stillaguamish River tributary)	Closed	Open the Saturday before Memorial Day through October 31 upstream from the falls located approximately at river mile 0.25.	Provides recreational opporrtunity above anadromous fish barriers. In addition, this rule proposal makes the Lake TwentyTwo Creek regulations consistent with other South Fork Stillaguamish tributaries such as Bear Creek.

Number	County	Waterbody	Rule to Change	Proposed Rule	Explanation
28	Snohomish	Sauk, above Whitechuck rivers (includes Cadet and Sloan creeks)	Sauk, above Whitechuck River upstream, including North Fork and South Fork to Elliott Creek (828): All Game Fish First Sat. in June-Oct. 31 Catch-and-release except up to 2 hatchery Steelhead may be retained. Selective gear rules. Cadet Creek (Snohomish Co.) All Game Fish First Sat. in June-Oct. 31 Statewide minimum size/daily limit. Selective gear rules. Sloan Creek (Snohomish Co.) All Game Fish First Sat. in June-Oct. 31 Catch-and-release. Selective gear rules.	Change is only to the North Fork Sauk and tributaries above the falls at rm 1.7. This includes current rules for Cadet and Sloan Creeks. Current rules for the mainstem Sauk and SF Sauk included in this reach would not change. North Fork Sauk above NF falls including all tributaries: Saturday before Memorial Day-Oct. 31: Statewide min. size/daily limit.	This opens a very significant area to the retention of resident fish where there is currently only catch and release fishing; anadromous fish are not present in this area. Significant numbers of resident fish are area available. This change also makes the opening day rules consistent with areas above anadromous zones open to fishing.
29	Whatcom	Kendall Creek	Above hatchery grounds (Whatcom Co.) All Game Fish First Sat. in June-Oct. 31 Statewide min. size/daily limit. Selective gear rules.	Above hatchery grounds (Whatcom Co.) All Game Fish Saturday before Memorial day-Oct. 31 Statewide min. size/daily limit.	Increases the season because this area is not accessible by anadromous fish.
30	Whatcom	Maple Creek	All Game Fish First Sat. in June-Oct. 31 Statewide min. size/daily limit. Selective gear rules.	All Game Fish Saturday before Memorial Day-Oct. 31 Statewide min. size/daily limit.	Steelhead conservation is needed below falls for anadromous fish. Above the falls, resident fish opportunity exists and anadromous fish are not present. Opening on the Saturday before Memorial Day is consistent with openings in streams with no anadromous access. Selective gear rules are not needed above the anadromous zone for conservation.
31	Whatcom	Racehorse Creek	All Game Fish First Sat. in June-Oct. 31 Statewide min. size/daily limit. Selective gear rules.	Racehorse Creek above falls located 0.3 miles above the North Fork road bridge. All Game Fish Saturday before Memorial Day-Oct. 31 Statewide min. size/daily limit.	Close below the falls because of anadromous fish presence and open above the falls where anadromous fish are not present.

Written Testimony (16 comments)

Support (9): Comment includes:

- Include Leland Creek (has bass and catfish);
- Change to all selective gear rules;
- Include more catch and release opportunities;
- Keep the upper North Fork Sauk and tributaries a quality catch and release fishery;
- A lot of good thought went into these proposals;
- No reason for these sections of rivers to be closed to fishing;
- Include the North Fork of the Skykomish.

Oppose (4): Comment includes:

- In general, believe this proposal is counter-productive to native steelhead;
- Keep the upper North Fork Sauk and tributaries a quality catch and release fishery;
- There is not much food in the river and the fish do not grow very large.

General (3): Comments include:

- Change to all selective gear rules and include more catch and release opportunities;
- Don't agree with the closures;
- Gate to Little Quilcene is locked and there is no longer access, making this change moot.

12. Increase selective gear fishing opportunity

Type of Rule Change Proposal

Recreational

Short Description

Increase selective gear fishing opportunity in Western Washington.

Explanation

Provides quality year-round fishing opportunity with limited Trout retention in various lakes. See Table.

Written Testimony (25 comments)

Support (19): Comments include:

- Look forward to fishing these lakes;

- Yes for Chain and Martha lakes;
- Selective gear should be the rule rather than the exception;
- Provides more opportunity to catch holdover trout;
- Two fish daily limit will encourage anglers to release fish;
- Implement a 1 over 18” rule to encourage more people to keep the fish in the lake;
- Consider a Selective Water endorsement license.

Oppose (4): Comments include:

- This will limit trout fishing;
- The majority of anglers for these lakes fish from the banks with bait.

General (2): Comment includes:

- Bait fishing from the shore is most effective and many locals don’t have a boat to troll with;
- Do not permit any fishing with anything other than lures used in fly fishing.

13. Require mandatory hatchery Steelhead retention

Type of Rule Change Proposal

Conservation

Short Description

Mandatory retention of hatchery Steelhead in all streams in Regions 4 and 6.

Explanation

This is a conservation measure to reduce the potential impact of hatchery steelhead on wild steelhead populations through mandatory retention of hatchery fish. Hatchery steelhead can have deleterious impacts on wild steelhead genetic integrity and population productivity. This regulation is already in place during steelhead fisheries in the Columbia River and its tributaries, thus providing angling opportunity while reducing impacts to ESA listed steelhead. See Table.

Proposal 13 Table. Require mandatory hatchery Steelhead retention. Please note that there are no authorized steelhead fisheries in any stream in Hood Canal because hatchery fish are part of the supplementation program. The term “PHOS” refers to Percent Hatchery Origin Spawners.

Written Testimony (31 comments)

Support (19): Comments include:

- This will save more steelhead;
- Recreational fishers pay for these fish and should be able to harvest them;
- We need to take out all the hatchery fish so we can really see if the wild fish can make it on their own;
- Agree but maintain a daily limit on harvestable fish;
- Yes, for any stream which has a viable recoverable wild steelhead component;
- Knowing how this works on the Methow, I am in favor of this change.

Oppose (4): Comments include:

- Limits the amount of time one can fish, especially on multi-day fishing trips;
- Unnecessary because hatchery fish have been selected to spawn at different times.

General (8): Comment includes:

- Make it a statewide rule;
- Will be a problem without an increase or change in steelhead limit and a change in rules on wastage;
- How will this be enforced if a hatchery steelhead is released and not kept;
- Tie this with proposal #7;
- Don't believe there is competition between hatchery and native fish.

PUGET SOUND

14. Increase fishing opportunity in Lake Washington Ship Canal (King Co.)

Type of Rule Change Proposal

Recreational

Short Description

Increase area open to fishing in the Lake Washington Ship Canal.

Explanation

The current regulations close a large portion of the Lake Washington Ship Canal to boat anglers targeting bass and close the area near the Ballard Locks to prevent boat traffic conflicts. There are no known biological and boating safety reasons for maintaining this closed area. This regulation would primarily benefit boat anglers targeting bass.

Written Testimony (8 comments)

Support (5): Comments include:

- As long as no possible impacts to Chinook;
- Kill more bass before they kill off the last sockeye smolt;
- Added fishing area would be helpful.

Oppose (1): Comment includes;

- There is a lot of traffic and boats fishing will cause issues.

General (2): Comment includes:

- Do not increase any fishing opportunity unless it is fly-fishing only, catch and release;
- Consider the impact on ESA listed Chinook in this confined area and opportunity for poachers to say they are bass fishermen while snagging or otherwise catching salmon.

15. Pass Lake (Skagit Co.): Allow 2-pole opportunity

Type of Rule Change Proposal

Recreational

Short Description

Allow 2-pole fishing on Pass Lake.

Explanation

This proposal enables anglers to fish with two poles, providing additional recreational opportunity.

Written Testimony (22 comments)

Support (9): Comments include:

- As long as only one pole in the water at a time;

- As a 2 pole endorsed fly fisherman, I do not see how this could possibly ruin other people's experiences on this lake;
- If you are going to allow 2 poles on lakes, make it all of the lakes for less confusion.

Oppose (10): Comments include:

- Unless there is a reason based on biology to make these fish healthier, I am opposed;
- Pass Lake gets plenty of pressure and with multiple poles fish may be injured due to lack of attention;
- Pass Lake is designated as fly fishing only and should be held to a different standard;
- The only benefit a 2 pole opportunity allows is for an angler to troll around the lake, which seems to go against the spirit of fly fishing;
- Don't do this to a high quality lake that provides excellent "recreational opportunities" as is.

General (3): Comments include:

- Re-open lake to one fish per day, no size limit because these are hatchery fish and they do not spawn in the lake.
- Would like to see someone casting two rods at once.

16. Rattlesnake Lake (King Co.): Allow trout harvest

Type of Rule Change Proposal

Recreational

Short Description

Trout: 2 fish daily limit, 14 inch minimum size limit.

Explanation

Currently Rattlesnake Lake offers only catch and release fishing. The public are requesting a rule that allows for some harvest of trout. Selective gear rules will remain in effect.

Written Testimony (22 comments)

Support (14): Comments include:

- Yes, if it is planted with trout;
- Allow anglers to retain one fish over 18 inches and then must cease fishing;
- Allow retention of two fish over 16 inches.

Oppose (7): Comments include:

- This is the only catch and release lake in King County;
- Has only been catch and release for a few years;
- Will be fished out by summer's end.

General (1): Comment includes;

- More catch and release fishing opportunities are needed.

17. Clear Lake (Pierce Co.): Increase Kokanee daily limit

Type of Rule Change Proposal

Recreational

Short Description

Increase the daily limit for Kokanee from 5 to 10 fish.

Explanation

Surplus Kokanee are available for harvest in Clear Lake. This rule increases the daily limit for Kokanee to 10 fish. This is consistent with most Kokanee managed waters in Washington.

Written Testimony (9 comments)

Support (7): Comments include:

- Great idea, do the same for American Lake (Pierce Co.);
- Daily limit for kokanee should be ten fish and separate from the rainbow trout limit;
- Will draw more anglers;
- Recommend statewide kokanee limit be 10 fish.

Oppose (1): Comment includes;

- Don't increase the daily limit.

General (1): Comment includes;

- Why this proposal and will the population support this increase.

18. Collins Lake (Mason Co.) and Stump Lake(Mason Co.): Adopt statewide rules and harvest limits

Type of Rule Change Proposal

Recreational

Short Description

Adopt statewide limits and rules for Collins and Stump lakes.

Explanation

There is no need to have special fishing rules listed in the WDFW fishing pamphlet for these lakes. Currently these lakes have no public access, and are only fished by community members with legal access to the lake. WDFW does not stock trout in these lakes and does not want to have special rules regulating lake residents or other public that gain private access to these lakes.

Written Testimony (4 comments)

Support (2): Comments include:

- Agreed, we don't need to regulate fishing on private lakes.

Oppose (0): No comments oppose this proposal.

General (2): Comment includes:

- Public should have access to this lake;
- Retention of fish should not be allowed.

19. Baker Lake (Whatcom Co.): Adjust Kokanee and Trout size limit

Type of Rule Change Proposal

Recreational

Short Description

This proposal would change the Trout size limits to statewide rules, and specify that for Kokanee, the minimum length is 8 inches and the maximum length is 18 inches. By definition, all fish over 18 inches in length are Sockeye.

Explanation

This proposal changes the maximum length for Trout to increase recreational opportunity. Currently the Trout rule says the maximum length is 18 inches and this unnecessarily limits recreational opportunity. This proposal, by increasing the minimum size on Kokanee, also protects most Sockeye smolts from harvest during spring-timed fisheries.

Written Testimony (6 comments)

Support (5): Comment includes:

- Good regulation change and protective of sockeye juveniles;
- Support this change and consistency with statewide regulations.

Oppose (0): No comments oppose this change.

General (1): Comment includes:

- Rule should be fly fishing only with a minimum of 15 inches.

20. Blackmans Lake (Snohomish Co.): Increase trout limit

Type of Rule Change Proposal

Recreational

Short Description

Increase the Trout daily limit on Blackmans Lake to five, no more than 2 over 15 inches in length.

Explanation

The existing rule is 3 Trout per day. This does not take advantage of the large number of Trout in the lake that are 10 to 12 inches in length. Large Trout are released in this lake through cooperative agreement with the Snohomish Sportsman's Club. Some anglers high grade Trout to harvest the larger fish, creating conflict and limiting opportunity for other anglers. To prevent this conflict from arising, anglers will only be allowed to harvest 2 Trout larger than 15 inches per day and can complete their 5 fish limit with additional smaller Trout.

Written Testimony (9 comments)

Support (6): Comment includes:

- Don't allow the use of lead;
- Add the use of beads;
- Add a statement about the ability to adding just about anything to the hook;
- The definition should be "A lure cast with a fly line."

Oppose (2): Comment includes:

- Keep the limit as it currently is but change to fly fishing only;
- Regulars brag about catching a limit, taking the trout home, and coming back to catch more; upping the limit to five fish will increase this problem.

General (1): Comment includes:

- Only selective fishing should be allowed if there is a rule requiring the release of trophy trout.
- Another option is to allow the use of bait and require anglers to keep the first five fish they catch regardless of size.

21. Ross Lake (Whatcom Co.): Adjust trout fishing rules

Type of Rule Change Proposal

Recreational

Short Description

Adjust angling rules on Ross Lake to protect Rainbow Trout and increase harvest on Brook Trout. Modify existing Rainbow Trout and Brook Trout harvest rules. New rules would allow daily limit 1, minimum size 16 inches for Rainbow Trout and increase the Brook Trout limit to 5 per day, no minimum size.

Explanation

The reasons for the regulation changes are to 1) Remove the non-native Brook Trout to help protect ESA listed Bull Trout and Dolly Varden, and 2) help recover native Rainbow Trout. The native Rainbow Trout population in Ross Lake is in decline. Reducing the daily limit and increasing the minimum length will reduce overall population exploitation and allow adult Rainbow Trout to spawn once before being subject to harvest. This is an exception with other Brook Trout rules in the state but aligns this U.S./ Canada border lake with nearby lakes.

Written Testimony (8 comments)

Support (3): Comment includes:

- There should be no limit on this non-native species, period!

Oppose (1): Comment includes:

- Leave the rules as they are.

General (4): Comment includes:

- If rainbow trout are in decline, then stop harvest, and if brook trout are a problem allow unlimited retention with selective gear only;
- Suspect that the rainbow population out competes the brook trout;

- If invasive species theory is carried to extreme, many popular game species will be hunted to extinction, to public's detriment;
- Allow only if the resulting rule is for fewer fish and impose fly fishing only and catch and release.

22. Texas Pond (Skagit Co.) daily limit

Type of Rule Change Proposal

Recreational

Short Description

Remove daily limits for all game fish on Texas Pond.

Explanation

Overabundant Brook Trout and Bass pose a threat to downstream ESA listed Steelhead and Salmon. This rule is intended to use angler exploitation as a tool to reduce abundances of unwanted non-native gamefish.

Written Testimony (5 comments)

Support (3): Comment includes:

- Absolutely remove limits on all non-native fish. I wish you could require all bass to be retained and killed, also.

Oppose (2): Comment includes:

- Leave limits on gamefish on Texas Pond.

General (0): All comments favor or oppose this proposal.

23. Thornton Lake and Thornton Creek (Whatcom Co): No limit on Westslope Cutthroat

Type of Rule Change Proposal

Recreational

Short Description

Thornton Creek: All Game Fish: First Sat. in June-Oct. 31. No limit on cutthroat, and up to 2 hatchery Steelhead may be retained. No other species may be retained.

Explanation

Propose statewide rules, except no limit on cutthroat trout. Lower Thornton Lake and Thornton Creek are over populated with Westslope Cutthroat Trout that are making their way into the Skagit River. This offers a fishing opportunity, but is intended to be a conservation measure to reduce the Westslope Cutthroat population and thus the potential for the population to increase in the Skagit and potentially result in a negative interaction with native species such as Steelhead and Coastal Cutthroat.

Written Testimony (3 comments)

Support (2): Comment includes;

- Sounds like a great idea supported by biology

Oppose (1): Comment includes:

- No fish may be retained. All caught must be released and switched to fy-fishing only.

General (0): All comments favor or oppose this proposal.

24. Black Lake Ditch (Thurston Co.) warmwater angling

Type of Rule Change Proposal

Recreational

Short Description

Black Lake Ditch (Thurston Co.) from the confluence with Percival Creek upstream to Black Lake. From November 1 through the first Friday in June catch and release only for all game fish.

Explanation

This proposal would provide additional fishing opportunity for the many warmwater fishes present in the system.

Written Testimony (3 comments)

Support (1): One comment for this proposal.

Oppose (0): No comments oppose.

General (2): Comments include:

- Why no retention?
- Why not also allow retention of non-native warmwater gamefish?

25. Mill Pond (King Co.): Adjust fishing rules

Type of Rule Change Proposal

Recreational

Short Description

Adjust angling rules on Mill Pond (King Co.) to allow juvenile-only fishing and remove adult fishing exceptions.

Explanation

This small lake is currently open to juvenile fishing only, except adults are allowed to fish on Free Fishing weekend. This proposal makes the lake open to juvenile fishing only. Permitting adults to angle in the pond reduces juvenile angling opportunity and there are many other waters nearby where adults can fish on Free Fishing weekend without impacting juveniles.

Written Testimony (4 comments)

Support (3): Three comments support this proposal.

Oppose (1): One comment opposes this proposal.

General (0): All comments favor or oppose this proposal.

26. Sammamish Lake (King Co.): Remove hook restrictions

Type of Rule Change Proposal

Recreational

Short Description

Remove the seasonal single point barbless hook restrictions on Sammamish Lake.

Explanation

This proposal removes the current requirement for single-point barbless hooks. The current rule was implemented to help reduce post-release mortality on Kokanee. At the time, Lake Sammamish Kokanee were petitioned to be listed as Threatened under the ESA by USFWS. Since that time USFWS has determined that listing is not warranted for Sammamish Kokanee as they don't meet the criteria for an independent population. In addition, the Sammamish Kokanee population has had several strong spawning escapements in recent years and barbless hook restrictions are not warranted from a conservation perspective.

Written Testimony (19 comments)

Support (12): Comment includes:

- Consistent with other waters, and kokanee have such soft mouths that they are easy to release with our without barbed hooks;
- Open the lake to Kokanee fishing and stock it with Kokanee, as well;
- Support but want to see a change to allows anglers to catch and keep Kokanee;
- Will benefit many anglers wanting to troll Lake Sammamish without changing out lures to single barbless hooks.

Oppose (5): Comment includes:

- Better to err on the side of conservation efforts;
- Keep the current rule because those who keep end up with the same number of fish, it just takes more time;
- Because of the proximity to Seattle/Bellevue barbless hooks should still be used;
- Impose fly fishing, catch and release, and barbless hook rules.

General (2): Comments include:

- Retain the barbless hook requirement or expand it to a yearly requirement.
- Over the limit taking of fish occurs very often on the lake.

27. Alder Reservoir tributaries and upper Nisqually River (Thurston Co.): Increase Trout harvest opportunity

Type of Rule Change Proposal

Recreational

Short Description

Daily limit 2 trout over 14 inches, Selective Gear Rules for all tributaries to Alder Reservoir and the upper Nisqually River above Alder Reservoir.

Explanation

The current rules do not include the tributaries of Alder Lake Reservoir and the upper Nisqually River. Implementing these fishery rule changes will allow for some trout harvest opportunity while continuing adequate protection for native trout species in these waters.

Written Testimony (8 comments)

Support (3): Three comments support this proposal.

Oppose (2): Two comments oppose this proposal.

General (3): Comment includes:

- Do not have game fish over 14 inches because anglers will catch and release small salmonids with the expectation of 2 over 14 inches. The kokanee who use these tributaries for spawning are usually less than 14 inches, so this rule will inflict unnecessary mortality to existing populations. A restriction of 10 or 12 inches is more appropriate because salmonids that size do exist in these waters.
- Consider unlimited harvest of brook trout from the reservoir and all tributaries, because they are around, are not native, and have the potential to take systems over.
- Native rainbow trout have the potential to contribute to endangered steelhead populations downstream, as they are genetically identical and may have been the same populations before the dams were put in; making harvest of native rainbows is a bad idea. And if hatchery rainbows are planted in Alder Lake, they should be 100% marked to facilitate harvest with at least a 5 fish limit.

28. Adjust fishing rules on Whatcom Creek, Skagit and Cascade rivers

Type of Rule Change Proposal

Conservation

Short Description

This proposal adjusts the rules to remove unneeded seasons and fishery zones that were consistent with providing a fishery on hatchery Steelhead.

Explanation

Since hatchery Steelhead are no longer stocked in these streams, appropriate rules for protecting wild Steelhead, Salmon and resident Trout will be put in place. See Table.

Proposal 28 Table. Adjust fishing rules on Whatcom Creek, Skagit and Cascade rivers.

Number	County	Water	Current Rule	Proposed	Explanation
1	Whatcom	Whatcom Creek	Whatcom Creek from mouth to yellow markers below foot bridge below Dupont St. in Bellingham: Trout: First Sat. in June-Last day in Feb. Min. size 14"; daily limit 2. Other Game Fish: Sept. 16-Jan 31. Statewide min. size/daily limit.	Season is shortened because hatchery Steelhead are no longer stocked in this river.

Written Testimony (16 comments)

Support (3): Comment includes:

- Ok only if the result is fly fishing and catch and release only.

Oppose (7): Comment includes:

- To ensure recovery, there should be no fishing on any of these river systems;
- Hatchery strays should be allowed to be removed;
- Leave the season as it is because it allows more opportunity to fish;
- At least leave the Upper Skagit catch and release until the end of April.

General (6): Comment includes:

- This does not go far enough. Rainbow trout should not be harvested because they are genetically identical to native steelhead and essential to the biological diversity necessary for the recovery of native steelhead;
- With such strong runs of wild steelhead, a lot of us would love to see a catch and release steelhead season on the Skagit and Sauk rivers through February, or even March;
- Makes sense for hatchery steelhead. Wild steelhead on the Skagit continues to improve and so a catch and release, single barbless, and no bait season could occur;
- Would like a catch and release season year round on that part of the Skagit;
- Resident rainbow trout should be released year round because they spawn with wild steelhead and help diversify the gene pool;
- Borderline Bassin Contenders (hunting & fishing club since 1973) is in favor for recreational use, but not our desire to stop the hatchery fishery.

29. Whatcom Creek (Whatcom Co.): Open a portion of the creek to fishing

Type of Rule Change Proposal

Recreational

Short Description

Increase fishing opportunity on Whatcom Creek and remove unneeded anti-snagging rules. Open the

portion of Whatcom Creek from the foot of bridge below Dupont Street in Bellingham to the stone bridge at Whatcom Falls Park.

Explanation

This particular section of the creek used to be open prior to the Olympic Pipeline explosion in June of 1999. After the explosion, it was closed to allow for stream restoration. It has now been over 15 years and the ecosystem has made a strong recovery and it would be appropriate to reopen for angling. Anti-snagging rules are in place above the anadromous zone where there are no Salmon or Steelhead present to snag.

Written Testimony (8 comments)

Support (7): Comment includes:

- Great for the community, especially the college students. There is a growing interest in fly fishing at Western Washington University and this increases the available area that students without transportation can access for fishing.
- I would make this section catch and release for trout if possible so that it can sustain the number of anglers in Bellingham.

Oppose (1): Comment includes:

- If there are wild rainbow trout in this stream they are genetically identical to wild steelhead and should never be harvested.
- Keep it closed and maybe eventually native steelhead will start to recover.

General (0): All comments favor or oppose this proposal.

30. McAllister Creek (Thurston Co.): Adjust fishing rules

Type of Rule Change Proposal

Recreational

Short Description

Remove the "barbless hook" rule from McAllister Creek and implement Selective Gear Rules.

Explanation

The current "barbless hooks" required for all species is inconsistent with the current "Selective Gear Rules" for Trout and Other game fish during overlapping seasons. This proposal removes the barbless hooks only rule and manages the creek under Selective Gear Rules.

Written Testimony (6 comments)

Support (3): Three comments support this proposal.

Oppose (3): Comment includes:

- I do not like the selective gear rules for this area.

General (0): All comments favor or oppose this proposal.

31. McLane Creek (Thurston Co.): Adjust fishing rules

Type of Rule Change Proposal

Conservation

Short Description

Adopt catch and release and selective gear rules for McLane Creek.

Explanation

The rule change is consistent with existing rules on other South Puget Sound streams (e.g. Skookum; Deschutes; Shelton; Goldsborough; Johns). Further, this rule is needed based on the apparent low number of Cutthroat spawners (redds/mile) relative to other South Puget Sound streams.

Written Testimony (7 comments)

Support (4): Comments include:

- Support adoption of catch and release selective gear rule for McClane Creek;
- Yes, makes sense for both the saltwater and freshwater rules to be the same for cutthroat trout retention.

Oppose (2): Comment includes:

- No on catch and release and selective gear rules;
- If conservation is truly an issue, then close the creek to fishing and allow catch and release only in the estuary. Repeated catch and release of undersized cutthroat is going to result in some mortality, and injure some adults who are about ready to spawn, so it is better to leave the freshwater alone and catch and release in salt water.

General (1): Comment includes:

- Fall chum fishery brings many anglers to the Mud Bay area and cutthroat are subject to harvest;
- The stream downstream of the Mud Bay road bridge for 100 feet up to the northbound Highway 101 Bridge should be included in the cutthroat protection zone.

32. Chaplain Creek (Snohomish Co.): Close a portion of this stream

Type of Rule Change Proposal

Conservation

Short Description

Chaplain Creek (Snohomish County) from the beaver pond(Grass Lake) below the water filtration plant gate upstream - closed waters.

Explanation

The portion of Chaplain Creek above the water filtration plant is within an area closed by the City of Everett due to security concerns with the water supply. The portion being proposed for closure is within an incorporated area with a fence and/or no trespassing signs around the perimeter to protect the drinking water supply for the city of Everett.

Written Testimony (6 comments)

Support (5): Comment includes:

- This is the appropriate measure. As the Watershed Patrol Officer for the City of Everett, this area of the stream is within the Restricted Area of the Watershed Filtration Plant and on incorporated City of Everett Property. It is posted “No Trespassing” currently for security issues and all trespassers will be cited.

Oppose (1): One comment opposes this proposal.

General (0): All comments favor or oppose this proposal.

33. Newhalem Creek (Whatcom Co.): Adjust fishing rules

Type of Rule Change Proposal

Recreational

Short Description

Close angling on the anadromous portion of Newhalem Creek below the Seattle City Light hydropower facility. Open the creek to angling for all game fish above the power facility beginning the Saturday before Memorial Day to October 31st under statewide minimum size and daily limits for streams.

Explanation

This rule change is consistent with the WDFW Stream Strategy approach intended to limit angling impacts in the anadromous zone while maximizing recreational opportunity for trout angling.

Written Testimony (4 comments)

Support (0): The only comment that favors this proposal has conditions. Please see the general comment section below.

Oppose (3): Comment includes:

- Do not permit this this rule change;
- Rainbow trout are genetically identical both above and below the hydro facility. Trout above the facility are likely contributing smolts to anadromous steelhead populations, so they should be left alone like all wild steelhead/rainbow below the facility if the intent is to recover wild steelhead.

General (1): Comment includes:

- Yes, as long as there is no impact to wild fish. Otherwise no.

34. North Fork Nooksack River (Whatcom Co.): Close a portion of this stream

Type of Rule Change Proposal

Conservation

Short Description

Currently this area falls within the section of the North Fork Nooksack that lies from the mouth up to Maple

Creek. We propose a subsection of this stretch that runs from the North Fork of the Nooksack River (all sloughs and side channels) from a true east-west line running through a white monument marking the mouth of Kendall Creek downstream 1,500 feet. We propose that this area be closed year-round to all fishing.

Explanation

This proposal is a result of the ever-changing nature of this stretch of the Nooksack River. This proposal will clarify the mouth of Kendall Creek, avoiding public confusion with shifting river boundaries. In addition, this proposal protects Spring Chinook, Steelhead, and Chum that are attempting to enter the hatchery.

Written Testimony (10 comments)

Support (3): Comment includes:

- Absolutely, yes. This has been a snagfest for years;
- As someone who spends a lot of time fishing the North Fork of the Nooksack, I fully support this proposal;
- Yes, close it to all and any fishing.

Oppose (6): Comment includes:

- I believe this portion should be catch and release fishing for all wild fish but allow anglers to retain hatchery steelhead;
- Hatchery fish should be harvested; that is what we are paying for;
- Disagree that hatchery is at risk of securing eggtake goals;
- There is no winter steelhead program;
- Put the marker at the mouth of the creek to formally define it and don't let people fish from that point to the hatchery;
- If the problem is snagging, close the entire creek.

General (1): All comments favor or oppose this proposal.

35. Skagit River (Skagit Co.): Adjust fishing rules

Type of Rule Change Proposal

Recreational

Short Description

Open the lower Skagit River from mouth to Highway 536 at Mt. Vernon, from March 1 to May 31 for all gamefish.

Explanation

Last rule cycle this reach of the Skagit was opened for fishing for Trout March 1-May 31. "Other gamefish" was not proposed by the proponent, only because it was an oversight. Opening for other gamefish during this time frame simplifies the rules, and makes them consistent.

Written Testimony (13 comments)

Support (9): Comment includes:

- "Other Gamefish" is fine, but please close the river entirely to wild rainbow trout harvest, as these are genetically identical freshwater phenotypes of anadromous steelhead, and the preservation of their genetic material will be needed if steelhead are ever to recover;

- Hard to argue with the logic of this one.

Oppose (1): One comment opposes this proposal.

General (3): Comment includes:

- This area should be closed permanently to recover early run wild steelhead. These fish remain in the system in the lower Skagit river until they spawn from February to April. Further, they would be caught as kelts if this rule passes;
- Make the rule consistent and open the Skagit. In fact, open the Skagit for a Catch and Release season all the way up the river to Marblemount;
- This time period in this location should have single barbless hook and no bait rules as well as release of steelhead to better protect later returning wild steelhead.

36. Minter Creek (Pierce/Kitsap Co.): Close to Trout fishing

Type of Rule Change Proposal

Conservation

Short Description

Close trout fishing from the mouth to the hatchery rack, year-round.

Explanation

This rule is intended to protect returning adult Chinook entering the hatchery rack. There will still be a salmon season November 1 to December 31st.

Written Testimony (6 comments)

Support (3): Comment includes:

- Fine, leave the salmon alone during the low,, warm winter months.
- Yes, as it is more likely than not that the fish actually being caught are salmon smolts, not trout.

Oppose (3): Comment includes:

- Do not think the impact is big enough on the Chinook in that stretch of stream;
- Would like to see old regulations put back into place—selective fishing regulations with catch and release for trout from above the hatchery rack upstream.

General (0): All comments favor or oppose this proposal.

37. Snoqualmie River (King Co.): Adjust Trout season dates and harvest limits

Type of Rule Change Proposal

Recreational

Short Description

On the Snoqualmie River above the falls including the North and South forks, allow year round fishing with a

33

retention Trout fishery (2 fish daily, min. size 10 inches) from the Saturday before Memorial Day through October 31 and catch and release fishing the remainder of the year.

Explanation

These rules are conservative enough to ensure persistence of trout in the streams while allowing some recreational trout harvest.

Written Testimony (16 comments)

Support (6): Comment includes:

- Agree with leaving the rivers open year-round. Do not agree with the retention of 2 fish.
- Agree with year-round catch and release, but do not agree with the trout retention policy. The low population of 10 inch plus trout, and the damage done to trout less than that size, makes this unadvisable. I recommend all forks of the Snoqualmie above the Falls be designated catch and release for the foreseeable future;
- A year-round fishing opportunity on these rivers is nice to have.

Oppose (7): Comment includes:

- Disagree with year-round fishing;
- Do not allow retention of any trout above the falls as those fish are already struggling;
- Do not support. These fish go over the falls and contribute to the anadromous run. This has been clearly shown in Alaska and other rivers. This action would be removing fish that may return as wild steelhead and help rebuild the run;
- Summer 2015 comprised stressful conditions for native salmonids. Preliminary data collected in the Snoqualmie Watershed by King County Water and Land Resources Division over summer 2015 showed some of the highest temperatures in the entire basin in the Middle Fork Snoqualmie. Stressful conditions continued throughout the summer and current predictions point to another hot dry summer in 2016. Repeated stressful summer conditions, an increase in angler effort related to ease of access with the current paving of the Middle Fork Snoqualmie Road, and harvest of prime reproducing individuals of the local Coastal Cutthroat population may significantly affect the fishery. Please delay this regulation.

General (3): Comment includes:

- Should be one fish over 10 inches;
- Wild rainbow trout above the falls are likely contributing genetic material and smolts to steelhead/rainbow populations below the falls, so if there is going to be any fishing it should be selective catch and release only;
- If any brook trout are caught they should be required to be retained with no limit;
- There should not be a catch/kill fishery on the forks of the Snoqualmie. The fish in these rivers are typically small to begin with (under 10"), so allowing people to kill the biggest fish in the system degrades the gene pool and reduces the ability for C&R fishers to catch trout over 10" in these streams. The MF has been C&R-only for years and is one of the best moving water trout fisheries in King County. This will not be maintained if people are killing the fish in the river, particularly with the road being paved soon. King County offers many lakes stocked with trout for people who want to harvest their catch, but to my knowledge there is only one stream with a year-round C&R reg and that is the MF. It would be a shame to degrade the quality of the only wild trout producing C&R rivers in the area. The SF and NF are small fragile systems that deserve the same protection. These streams should be managed with abundant populations of wild trout as the goal, not as a meat fishery.

38. Skagit River (Skagit Co.): Convert a portion of the river to catch and release Trout fishing

Type of Rule Change Proposal

Conservation

Short Description

Skagit River from Hwy. 530 Bridge in Rockport to Cascade River Road in Marblemount. June 1st - January 31. Catch and release only for trout.

Explanation

This proposal removes the retention of trout in the Skagit River from the Hwy. 530 Bridge at Rockport to Cascade River Rd. (Marblemount Bridge) and changes the closing date from February 15 to January 31. Catch and release regulations for trout in this section will allow fish to grow large and provide opportunity for anglers to repeatedly catch trophy sized trout.

Written Testimony (28 comments)

Support (22): Comment includes:

- Catch and release for all wild trout;
- Would like additional fishing days;
- Should accompany this change with selective gear rules because of release mortality;
- Support an increase in Dolly Varden limit to protect trout;
- Recommend that cutthroat trout be catch and keep in freshwater like it is in saltwater;
- This is a good regulation, as it will also preserve native rainbow/steelhead genetic material which will be needed for wild steelhead recovery.

Oppose (6): Comment includes:

- Don't shorten the season. Make the whole river catch and release;
- The bulk of the salmon run going to the Marblemount Hatchery is caught in this section, so a lot of opportunity would be lost for hatchery fish.
- No on catch and release only fishing

General (0): All comments favor or oppose this proposal.

39. Stillaguamish River (Snohomish Co.) night closure

Type of Rule Change Proposal

Conservation

Short Description

Close the mainstem Stillaguamish River and all sloughs below Marine View Drive to night fishing year-round, all species.

Explanation

This rule change makes for easier rule enforcement in this portion of the Stillaguamish River and reduces the potential for poaching activity.

Written Testimony (12 comments)

Support (10): Comment includes:

- All Puget Sound rivers should be closed after dark. Very little if any legal sportfishing happens at night;
- Night fishing encourages poaching and trespassing on private property.

Oppose (2): Comment includes:

- This will reduce the opportunity to catch hatchery fish.

General (0): All comments favor or oppose this proposal.

40. Tolt River (King Co.): Adjust fishing rules

Type of Rule Change Proposal

Conservation

Short Description

Adjust the fishing rules for the lower Tolt River. Currently the rule is "From the mouth to the USGS trolley cable near the confluence of North and South forks: All Species - First Saturday in June-Nov 30; selective gear rules." We propose to extend the time that selective gear rules are required to say, "Open the First Saturday in June to January 31, All Species: selective gear rules."

Explanation

To reduce hooking mortality on wild steelhead and bring regulations in line with the Statewide Steelhead Management Plan.

Written Testimony (28 comments)

Support (25): Comment includes:

- Adopt only if this will result in less water being fished with all water fly fishing and catch and release;
- This is the step in the right direction to further reduce wild steelhead mortality;
- Selective gear rules with mandatory hatchery steelhead retention has my support.

Oppose (3): Comment includes:

- Close the Tolt to fishing;
- If we are managing these rivers for Steelhead Conservation should not have a trout season on the Tolt;
- Not many wild fish in before the river closes in January.

General (0): All comments favor or oppose this proposal.

41. Kennedy Creek (Thurston Co.): Adjust fishing rules

Type of Rule Change Proposal

Conservation

Short Description

Adjust fishing season dates and harvest rules for Kennedy Creek from Highway 101 upstream to barrier falls. This proposal changes the season end date from the last day in February to Oct. 31 and adjusts harvest rules to catch and release and selective gear rules.

Explanation

This change is needed because of an apparent low number of Coastal Cutthroat spawners (redds/mile).

Written Testimony (6 comments)

Support (3): Comment includes:

- Support because coastal cutthroat trout provide a very important recreational fishery in the marine waters of South Puget Sound;
- Sea run cutthroat trout follow the chum runs in South Sound streams to eat the abundant loose and disturbed eggs. The majority of angler pressure is downstream of the Highway 101 Bridge, especially during the "through February" date. Cutthroat retention should be eliminated below (north) of the Highway 101 Bridge also.

Oppose (3): Comment includes:

- Close it until it recovers;
- There are not enough people fishing for trout on Kennedy Creek to have any impact.

General (0): All comments favor or oppose this proposal.

42. Chambers Creek (Pierce Co.): Adjust fishing rules

Type of Rule Change Proposal

Conservation

Short Description

Chambers Creek from mouth (Burlington-Northern RR Bridge) to markers 400' below the Boise-Cascade Dam: all species: selective gear rules, except bait allowed September 1 to October 15. All Trout Catch and Release.

Explanation

Streams in South Puget Sound that harbor anadromous Cutthroat Trout are generally managed under restrictive harvest or catch and release rules. This rule is proposed to reduce handling and hooking mortality of coastal cutthroat.

Written Testimony (5 comments)

Support (2): Comment includes:

- Support the catch and release requirement for all trout for the purpose of protecting coastal cutthroat trout.

Oppose (3): Comment includes:

- Close it to fishing until cutthroat trout retention is allowed in saltwater.

General (0): All comments favor or oppose this proposal.

43. Snohomish River (Snohomish Co.): Allow catch and release Sturgeon fishing

Type of Rule Change Proposal

Recreational

Short Description

Open the Snohomish River Sturgeon fishery year-round for catch and release opportunity from the Mouth to the Highway 9 Bridge.

Explanation

There is an abundant enough population of Sturgeon in the lower Snohomish River to allow for year-round catch and release Sturgeon fishing.

Written Testimony (10 comments)

Support (6): Comment includes:

- Yes, open this fishery since there are no other sturgeon fisheries in the vicinity;
- Allow catch and release or better yet, retention in the Snohomish River.

Oppose (4): Comment includes:

- These long-lived fish should be left alone. Sturgeon only spawn in the Fraser or the Columbia, and in the Columbia they are not doing well; spawners are dying from high water temperatures this year, lower river harvest is non-existent, and any sturgeon anywhere else in Washington should not be targeted even for catch and release. This is especially serious as we are likely looking at extended record low flows and high temperatures in the Snohomish system as well;
- Do not support the catch and release of any Sturgeon;
- Keep it closed until the abundance allows a harvest.

General (0): All comments favor or oppose this proposal.

COAST

44. Increase fishing opportunity for anglers with lower extremity disabilities

Type of Rule Change Proposal

Recreational

Short Description

This proposal applies to the Forks Creek Hatchery (Pacific Co.) fishery for anglers with disabilities. The current rule is: Closed Waters except for anglers with disabilities who must permanently use a wheelchair AND who have a designated harvester companion card. We propose this rule be changed to: Closed Waters except for anglers with lower extremity disabilities who must permanently use a medically prescribed assistive device every time for mobility as defined in WAC 232-12-825(1)(a) AND who have a designated harvester companion card.

Explanation

This proposal removes the wheelchair requirement to provide more opportunity for anglers with lower extremity disabilities.

Written Testimony (8 comments)

Support (6): Comment includes:

- Good idea, these are hatchery fish anyway and surplus needs to be removed, might as well give the easiest fishing to those most in need of easy fishing;
- Have multiple friends that technically could not fish at the handicap sites, but cannot walk over uneven ground or more than a few feet at a time. At the same time, the majority of the time I have been to the handicap site at the Cowlitz, no one is fishing it. Recommend allowing these people to fish with their family, as there are few opportunities on rivers for them to do this. Also recommend making it easier to get the paperwork and details needed to get the designated harvester card.

Oppose (2): Comment includes:

- Should be closed to everyone;
- From disabled people I have talked to, the present rule is already badly misused. Do not let this type of physical condition give people that are not disabled this opportunity.

General (0): All comments favor or oppose this proposal.

45. Adopt selective gear rules for the Naselle River

Type of Rule Change Proposal

Conservation

Short Description

Adopt selective gear rules for the Naselle River from February 1 to April 15.

Explanation

Rule change is proposed to reduce hooking mortality on wild adult and juvenile Steelhead in the Naselle River.

Written Testimony (23 comments)

Support (18): Comment includes:

- Encourage adoption to reduce hooking mortality of wild steelhead. This should be a statewide regulation;
- Support with the caveat of only a single barbless hook;
- Selective gear helps to protect populations that are already vulnerable as it significantly reduces hooking mortality, especially during a time of the year when those fish are even more susceptible to angling pressure.
- Would like to see more selective gear rules proposed for coastal steelhead rivers.

Oppose (2): Comment includes:

- Don't take away traditional fishing techniques.

General (3): Comment includes:

- The only bait fishing allowed should be during the fall salmon run and the early portion of the winter steelhead run;
- Trout fishing with bait should not be allowed during the summer, when there are wild sea-run cutthroat and wild steelhead juveniles;
- Close fishing until fish recover enough to have a harvest.

46. Adopt "no fishing from floating device" rules on select streams

Type of Rule Change Proposal

Conservation

Short Description

Implement "no fishing from a floating device" rules on select North Coast streams. This proposal is being considered by the North Coast Advisory Group and will be refined as the Advisory Group provides feedback.

Explanation

Proposed to protect holding and spawning adult Salmon and Steelhead through reduced hooking/handling stress and mortality. See table.

Written Testimony (425 comments)

Support (207): Comment includes:

- Recommendation for experimental test of this for a limited time or for particular areas;
- This has been a successful strategy for the Deschutes River in Oregon;
- Boats are able to cover too much water in a day;
- Adopting this rule will go a long way toward protecting this precious resource.

Oppose (203): Comment includes:

- Concern for anglers with disabilities that will be unable to fish from the bank;
- Anglers fishing from bank will walk on salmon redds and cause increased mortality;
- It is not possible or it is unsafe to fish from the bank in many of these areas;
- An extreme measure that will impact the livelihood of fishing guides and the local economy.

General (15): Comment includes:

- Proposed rules do not specify what portions of these rivers would be off limits;
- Request for all steelhead and trout catch and release only in Olympic rivers;
- Recommend a lottery each year for a limited number of boats. For instance a guide wins one of the lottery options and gets the chance to pick odd or even days of use. This would ensure fewer boats on the river at one time;
- The fishing guide pressure and success rate is overwhelming the populations, especially in low water conditions that are increasingly becoming the norm in the Pacific Northwest;
- Closing traditional drift boat fisheries seems very heavy-handed without significant evidence of a dire need to do so;
- Support of this rule depends on what happens with rule #47 and #48. If bait is banned, and there is no harvest of wild steelhead, then the pressure will be reduced significantly. However, if harvest is still allowed and bait is still somewhat allowed, and then support this rule as a way to reduce encounters with wild fish. Perhaps this rule would be best implemented on an experimental basis on a few rivers or in a few sections to see if has the desired impact.
- Consider selected days for boats. Suggest 2 days per week;
- Suggest regulated launches for guides and private fishermen. An annual pass to fish up on the coast for private fishermen, like the Columbia River endorsement.
- Only allow local guides with permanent Forks' address on the water;
- Putting everyone on the bank will create another type of crowding and a lot more feet on the spawning gravel. There should be more conversation regarding the guide industry and how many guides are able to operate in the area.
- Additionally there should be a catch and release limit to reduce mortality from hookups.
- Stop allowing any kill fishery for wild steelhead.
- Consider reducing or limiting the amount of days or guides.

47. Adopt selective gear rules in North Coast Steelhead streams

Type of Rule Change Proposal

Conservation

Short Description

Implement Selective Gear Rules on North Coast streams to protect juvenile Salmon, Steelhead and Trout. This proposal is being considered by the North Coast Advisory Group and will be refined as the Advisory Group provides feedback.

Explanation

This proposal adopts Selective Gear Rules to protect resident Trout as well as juvenile anadromous salmonids but allows the use of bait during Salmon and Steelhead fisheries. See Table.

Written Testimony (235 comments)

Support (212): Comments include:

- Also apply this rule change to winter fisheries;
- Bait should be banned;
- Barbed hooks should be banned;
- Save the bait for kids and planter trout.

Oppose (18): Comment includes:

- Selective gear rules are designed to make it harder for sports fishers to keep fish. I need to feed my family;
- There are already enough selective regulations in place.

General (5): Comment includes:

- Using the right hook size will minimize any harm so this rule change might be unnecessary;
- This proposal does not go far enough. Gear should be limited to flies and lures only with single hook and no bait allowed at any time of year in order to increase fish survival rates should the catch and release proposal be put into effect. It does not do a lot of good to implement catch and release without eliminating bait fishing as the mortality rate of bait caught fish is far higher than fly or lure caught fish.

48. Prohibit wild Steelhead harvest

Type of Rule Change Proposal

Conservation

Short Description

Do not allow harvest of wild Steelhead in select North Coast streams. This proposal is being considered by the North Coast Advisory Group and will be refined as the Advisory Group provides feedback.

Explanation

This proposal includes requiring the release of wild Steelhead; resident Trout, and not allowing any part of salmonids to be removed from the water if the rule or intention is to release the fish. See Table.

Table for Proposal 48. Prohibit wild Steelhead harvest.

Written Testimony (328 comments)

Support (328): Comment includes:

- Recommend that harvest of native steelhead and native trout be banned statewide;
- These rivers are fabulous experiences and we should focus first on conservation;
- Should have been implemented long ago;
- Will put more fish on the spawning grounds, which is crucial to their recovery.

Oppose (19): Comment includes:

- I am against this proposal because I don't think it will save fish;
- If the fish are at a critical population level then no stakeholders should be harvesting these endangered populations.
- Recommendations by the North Coast Advisory Group are simply intended to satisfy the high paying Seattle fly fishing groups.
- Like catch and release fishing but a rule where you cannot remove any part of the fish out of the water is overboard.
- As long as the tribes are allowed to harvest wild fish it would be considered foregone opportunity and the tribes will then take our unused share.
- Support allowing the limited ONE wild steelhead current retention where escapement goals are being met.
- I believe that the limit of one native per year is fair and should not be changed.
- There are rivers listed in this action that still have catchable numbers of wild fish.
- Please don't overregulate these rivers.

General (4): Comment includes:

- There is a pervasive feeling that anglers have no influence on the implementation of these rules, regardless of the acceptance of public comments.
- Please modify this rule. I support release of wild steelhead but do not understand how an angler can in every instance release a fish and not allow any part to be removed from the water.

49. Require wild Steelhead harvest tag

Type of Rule Change Proposal

Conservation

Short Description

Require purchase and use of annual "Wild Steelhead" harvest tag. This proposal is being considered by the North Coast Advisory Group and will be refined as the Advisory Group provides feedback.

Explanation

Require the purchase and use of a harvest tag if an angler intends to harvest a wild steelhead. Upon harvesting a wild steelhead, the angler must affix the tag to the harvested fish. An angler is limited to one harvest tag per year. Additionally, if an angler is fishing with a licensed guide, they must use the guide's wild steelhead harvest tag. Licensed guides are limited to three harvest tags per year. Recommended that WDFW consider charging a premium for the purchase of these tags as is done for other trophy animals. See Table.

Written Testimony (64 comments)

Support (16): Comment includes:

- Support if wild steelhead retention continues to be allowed;
- Support provided state still requires all anglers purchase a punchcard;
- Recommend a coastal river version of the Columbia River endorsement to enhance coastal fisheries;
- Limit licensed guides to three harvest tags per year;
- Consider charging a premium for the purchase of these tags as is done for other trophy animals.
- If proposal #48 is not implemented, this would be the next best option;
- Make it expensive to kill wild fish. Really expensive. They are the state's treasure and our state fish, really really really expensive;

- Have them choose odd or even days to limit the amount of fishermen on one river;
- This is a good rule, but with the current lack of enforcement it is likely not to make any difference;
- Work with the legislature to make any fees raised from this tag to go towards enforcement of rules on the North Coast rivers.

Oppose (48): Nearly all comment states:

- There should be no harvest of wild steelhead.

General (0): All comment favors or opposes this proposal.

LIBERALIZE LIMITS FOR BASS, CHANNEL CATFISH, AND WALLEYE IN THE COLUMBIA RIVER AND TRIBUTARIES CONTIGUOUS WITH OREGON

50. Remove daily limits on warmwater fish in the Columbia River

Type of Rule Change Proposal

Recreational

Short Description

Remove harvest limits for Walleye, Bass and Channel Catfish in the Columbia River and tributaries in shared boundary waters with Oregon State.

Explanation

Consistent with the rule that was passed in the Washington only portions of the Columbia River and tributaries.

Written Testimony (21 comments)

Support (15): Comment includes:

- Support provided that such adoption does not pose a risk to wild steelhead and salmon;
- More fishing opportunities and hopefully help out migrating smolts;
- All invasive species where native species are present should have no bag limit or size restrictions;
- Non-native fish species that feed on ESA listed native species --remove all slot limits and daily limits.

Oppose (6): Comment includes:

- As a nonresident angler I spend a great deal of money to have the opportunity to harvest a truly trophy size walleye from the Columbia each year;
- These fish are not wholly responsible for the decline in salmon numbers. Habitat loss, hatcheries, and hydroelectric dams are the reason salmon are on the endangered species list;
- If there is no retention limit then someone could keep fishing all day and increasing bycatch issues;
- Bass fishing could be so very important to the economy if you were to allow it.

General (0): All comments favor or oppose this proposal.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The department makes adjustments to recreational fishing rules annually to maximize conservation and recreational-fishing opportunity. This proposal includes changes to freshwater recreational fishing regulations, focusing on the Puget Sound and Coast. The department also proposes technical changes to clarify, correct, and update language as part of this rule making.

Reasons supporting proposal: The changes in this proposal are needed to make necessary adjustments to recreational fishing rules based on department data, public feedback, and changes in fish and shellfish populations. The department also proposes amendments for conservation purposes and to provide greater fishing opportunity. Technical changes are needed to ensure accuracy, clarity, and uniformity in the code.

Statutory authority for adoption: RCW 77.04.012, 77.04.013, 77.04.055, and 77.12.047

Statute being implemented: RCW 77.04.012, 77.04.013, 77.04.055, and 77.12.047

WAC 220-56-510 Game fish possession limits and size limits. It is unlawful to retain or possess game fish taken in excess of the daily, possession, or license year possession limits, or game fish that do not conform to the size limits provided for in this section, unless otherwise provided for in WAC 220-310-175 through 220-310-200.

(1) Daily game fish possession and size limits:

<u>((Species))</u> Species	<u>((Daily-limit))</u> Daily limit	<u>((Size-limits))</u> Size limits
Largemouth Bass	5	Release bass 12 to 17 inches in length. Not more than 1 largemouth bass 17 inches in length or greater may be retained.
Smallmouth Bass	10	No minimum size. Not more than one smallmouth bass over 14 inches in length or greater may be retained.
Burbot	5	No size restriction.
Channel catfish	5	No size restriction.
Eastern brook trout	Count as part of the 5 trout daily limit in lakes, ponds and reservoirs. Bonus limit in rivers, streams and beaver ponds. Up to 5 trout including Eastern brook trout may be retained, but not more than 2 of which may be trout other than Eastern brook trout. <u>No daily limit for streams listed in WAC 220-310-180 and 220-310-190, unless otherwise provided in those rules.</u>	No size restriction. No size restriction.
Grass carp	Unlawful to retain.	Not applicable.
Tiger Muskellunge	1	Minimum size 50 inches in length.
Trout (except Eastern brook trout)	5 from lakes, ponds and reservoirs.	No size restriction.

<u>((Species))</u> <u>Species</u>	<u>((Daily limit))</u> <u>Daily limit</u>	<u>((Size limits))</u> <u>Size limits</u>
	2 from rivers, streams, and beaver ponds. The daily trout limit is 5 trout, regardless of origin, of which not more than 2 may be steelhead.	8-inch minimum size.
Walleye	8	12-inch minimum size. Not more than 1 walleye greater than 22 inches in length may be retained.
Whitefish	15	No size restriction.
All other game fish	No limit.	No size restriction.

(2) Possession limit: The game fish possession limit in the field is two daily limits in fresh, frozen or processed form.

(3) Wild steelhead, Dolly Varden, and bull trout: Except as provided for in this section and WAC 220-310-175 through 220-310-200, it is unlawful to retain wild steelhead, Dolly Varden, or bull trout.

(4) Wild steelhead license year limit: From waters in which wild steelhead may be taken as provided for in WAC 220-310-175 through 220-310-200, the license year limit is one wild steelhead.

(5) Saltwater game fish retention: Game fish taken in saltwater may not be retained, except that up to two hatchery steelhead per day may be retained.

Yakima	Yakima	From Highway 240 Bridge to 400' below Prosser Dam: March 1 through August 31.

Anglers who possess a valid two-pole endorsement may fish for salmon with two lines in the following marine areas:

Description	Marine Area
Willapa	2-1. East of a line from Cape Shoalwater to Leadbetter Point.
Port Susan and Port Gardner	Tulalip Terminal Area: May 1 through September 30.
Seattle/Bremerton Area	Sinclair Inlet: July 1 through September 30.
South Puget Sound	13.

WAC 220-310-200 Freshwater exceptions to statewide rules—Columbia. The following exceptions to statewide rules apply to the Columbia River, including impoundments and all connecting sloughs, except Wells Ponds:

(1) **General Columbia River rules:**

(a) In the concurrent waters of the Columbia River between Washington and Oregon, the license of either state is valid when fishing from a vessel.

(i) Anglers must comply with the fishing regulations of the state in which they are fishing.

(ii) This subsection does not allow an angler licensed in Oregon to fish on the Washington shore, or in the sloughs or tributaries in Washington except as otherwise provided by department rule.

(iii) Anglers fishing the Columbia River are restricted to one limit, as defined by the laws of the state in which they are fishing, even if they are licensed by both states.

(b) It is unlawful to possess in the field salmon or steelhead mutilated so that size, species, or fin clip cannot be determined until the angler has reached their automobile or principal means of land transportation and completed his or her daily angling.

(c) Salmon and trout handling rules provided in WAC 220-56-118 apply to the Columbia River, except from February 15 through June 15 in the mainstem Columbia from the Rocky Point/Tongue Point line upstream to the Washington-Oregon border where WAC 220-56-118 applies only to anglers fishing from vessels less than 30 feet in length (as substantiated by Coast Guard documentation or Marine Board registration).

(d) From Buoy 10 to the Washington/Oregon border:

(i) From March 1 through May 15, the mainstem Columbia River is open for retention of adipose fin-clipped steelhead and shad only during days and in areas that are open for the retention of adipose fin-clipped spring Chinook salmon.

(ii) From August 1 through December 31, each angler aboard a vessel may deploy salmon/steelhead angling gear until the salmon/steelhead limit for all anglers aboard has been achieved.

(e) Open year-round unless otherwise provided.

(f) Barbless hooks are required for salmon and steelhead.

(g) Walleye and bass: No limit and no size restriction.

(h) Channel catfish: No limit.

(2) **Rules by river section:**

(a) **From a true north-south line through Buoy 10, upstream to a line projected from Rocky Point on the Washington bank through Red Buoy 44 to the navigation light at Tongue Point on the Oregon bank:**

(i) Fishing from the north jetty is permissible when Marine Area 1 or Buoy 10 areas are open for salmon, and the limit and minimum size restrictions follow the most liberal regulations if both areas are open.

(ii) Release all trout, except anglers may retain hatchery steelhead.

(iii) ~~((Walleye+~~

~~(A) Limit 10; no minimum length.~~

~~(B) No more than 5 longer than 18 inches may be retained, and only one walleye may be longer than 24 inches.~~

~~(iv) Bass: Limit 5 bass between 12 and 17 inches in length; no more than 3 longer than 15 inches may be retained.~~

~~(v) Channel catfish: No limit.~~

~~(vi)) Salmon and steelhead:~~

(A) Open June 16 through July 31:

(I) Closed to fishing for salmon and steelhead from Buoy 10 to the Megler-Astoria Bridge.

(II) Limit 6; no more than 2 adult salmon, or 2 hatchery steelhead, or one of each, may be retained.

(III) Release all salmon other than sockeye and hatchery Chinook.

(IV) From July 7 through July 31, release adult Chinook and sockeye.

(B) Open August 1 through September 7:

(I) Limit 2 salmon, or 2 hatchery steelhead, or one of each.

(II) Release all salmon except Chinook and hatchery coho.

(III) Chinook minimum length 24 inches; only one Chinook may be retained as part of the limit.

(IV) Coho minimum length 16 inches.

(C) Open September 8 through September 30:

(I) Limit 2; hatchery coho or hatchery steelhead or one of each.

(II) Release all salmon other than hatchery coho.

(III) Coho minimum length 16 inches.

(D) Open October 1 through December 31:

WAC 220-56-210 Fly fishing. (1) It is unlawful to fish in waters restricted to "fly fishing only" with the use of:

(a) A fixed spool reel.

(b) Fishing line other than conventional fly line or conventional "Tenkara" fly line, except that other line may be used for backing and leader if it is attached to not less than 25 feet of conventional fly line.

(c) Hooks that exceed 1/2 inch when measured from point to shank.

(d) Not more than two flies each with a barbless single hook.

(e) Bait.

(f) Weight attached to the leader or line.

(2) Only knotless nets may be used to land fish in waters restricted to "fly fishing only."

(3)(a) A violation of ((this subsection)) gear restrictions in subsection (1) or (2) of this section is an infraction, punishable under RCW 77.15.160, unless the person possesses fish taken with prohibited gear.

(b) It is unlawful to possess fish taken with gear in violation of the provisions of this section. Possession of fish while using gear in violation of the provisions of this section is a rebuttable presumption that the fish were taken with such gear. Possession of such fish is punishable under RCW 77.15.380 Unlawful recreational fishing in the second degree—Penalty, unless the fish are taken in the amounts or manner to constitute a violation of RCW 77.15.370 Unlawful recreational fishing in the first degree—Penalty.

(4) "Fly" means a lure on which thread, feathers, hackle, foam, rubber, or yarn cover a minimum of half the shank of the hook. Metallic colored tape, lead wire, lead tape, tinsel, mylar, or beadeyes may be used as an integral part of the design of the fly pattern.

(5) Notwithstanding the provisions of this section, persons who have a permanent disability that significantly limits the use of one or both upper extremities may use spinning gear and may fish from a floating device equipped with an electric motor in lakes where fishing from a floating device is allowed in fly fishing only waters as provided for in this section.

(a) A fisher with a disability must apply for a fly fishing special use permit by presenting a letter from a physician stating that the fisher's disability is permanent and that, because of the inability to use one or both upper extremities, the fisher is physically incapable of using conventional fly fishing gear.

(b) The fisher will be issued a fly fishing special use permit in the form of a wearable tag. The fisher must have the special use permit in his or her possession at all times while using spin casting gear in fly fishing only waters, and may display the permit on outer clothing.

(c) It is ~~((lawful))~~ permissible for persons in possession of a fly fishing special use permit to use the following gear:

(i) Fishers may use spin casting gear with a casting bubble.

(ii) Monofilament line ~~((is permitted))~~ with no limit on the breaking strength of the line.

(iii) Hook size and barb restrictions, fishing fly requirements, and bait and weight prohibitions as provided for in this section apply to both conventional fly fishing and spin-bubble fly fishing.

WAC 220-310-175 Freshwater exceptions to statewide rules—General rules. The following provisions and definitions apply to this section through WAC 220-310-200.

(1) It is unlawful to fish for, take, or possess salmon from freshwater streams and lakes that are not specifically listed as open for salmon fishing.

(2) Waters listed as open during a specific date range that do not reference a particular species are open during the date range for game fish only.

(3) Rivers, streams, and beaver ponds are closed to fishing unless specifically listed as open.

(4) All limits are daily limits, unless otherwise provided.

(5) Within Puget Sound, beaver ponds located within or adjoining streams that are listed as open to trout and other game fish follow the same rules as the stream, except as otherwise provided.

(6) It is permissible to retain up to two hatchery steelhead in waters where the season is open for game fish or salmon in WAC 220-310-180 and 220-310-190, unless explicitly listed as closed to hatchery steelhead in WAC 220-310-180 and 220-310-190.

(7) A "float" or "bobber" means a hookless, floating device that is attached to or slides along the mainline or leader above the hook(s) for the purpose of suspending hook(s) (which are not part of the bait, lure, or fly) off the bottom of the stream or lake and visually signal (from the surface of the water) a fish's strike at the hook(s).

~~((7))~~ (8) "Lead jig" means a lure consisting of a hook permanently or temporarily attached directly to a lead weight by any method.

~~((8))~~ (9) "Lead weight" means material constructed of lead and applied to a fishing line or lure and designed to help keep the hook, bait, or lure underwater.

~~((9))~~ (10) "Unmarked salmon" means salmon without either a clipped ventral fin or a clipped adipose fin as evidenced by a healed scar.

~~((10))~~ (11) Kokanee/sockeye definition for Lake Washington and the Lake Washington Ship Canal in King County: Kokanee and sockeye less than fifteen inches in length are considered kokanee and kokanee and sockeye fifteen inches and over in length are considered sockeye salmon.

~~((11))~~ (12)(a) A violation of this section through WAC 220-310-200 is an infraction, punishable under RCW 77.15.160, unless the person has harvested fish. If the person has harvested fish, the violation is punishable under RCW 77.15.380~~((7))~~ Unlawful recreational fishing in the second degree—Penalty, unless the fish are taken in the amounts or manner to constitute a violation of RCW 77.15.370~~((7))~~ Unlawful recreational fishing in the first degree—Penalty.

(b) Freshwater terminal gear restrictions:

(i) Terminal gear restrictions apply to all species, including salmon, unless otherwise provided.

(ii) In all waters with freshwater terminal gear restrictions including, but not limited to, night closures, selective gear rules, whitefish gear rules, single-point barbless hooks required, fly-fish-

ing only, and anti-snagging rules, violation of the gear rules is an infraction, punishable under RCW 77.15.160.

(iii) It is unlawful to possess fish taken with gear in violation of the freshwater terminal gear restrictions. Possession of fish while using gear in violation of the freshwater terminal gear restrictions is a rebuttable presumption that the fish were taken with such gear. Possession of such fish is punishable under RCW 77.15.380(~~(7)~~) Unlawful recreational fishing in the second degree—Penalty, unless the fish are taken in the amounts or manner to constitute a violation of RCW 77.15.370(~~(7)~~) Unlawful recreational fishing in the first degree—Penalty.

(~~(12)~~) (13) For sturgeon fishing rules, see WAC 220-56-282(~~(7)~~) Sturgeon—Areas, seasons, limits and unlawful acts.

WAC 220-56-282 Sturgeon—Areas, seasons, limits and unlawful acts.

- (1) It is unlawful to retain green sturgeon.
- (2) The following limits and requirements apply in areas where it is permissible to catch sturgeon for release or retention:
 - (a) It is unlawful to fish for sturgeon with terminal gear other than bait and one single-point barbless hook.
 - (b) It is unlawful to fail to release undersize or oversize sturgeon immediately.
 - (c) It is permissible to use artificial scent with bait when fishing for white sturgeon.
 - (d) It is unlawful to use a gaff or other body-penetrating device while restraining, handling, or landing a sturgeon.
 - (e) It is unlawful to fish for or possess sturgeon from freshwater, except the Chehalis River, from one hour after official sunset to one hour before official sunrise.
- (3) It is permissible to catch and release white sturgeon in saltwater waterways year-round. However, for freshwater waterways, including freshwater Puget Sound tributaries except the Snohomish River, it is permissible to catch and release white sturgeon only when the season is open for salmon or game fish(~~(, unless otherwise provided)~~).
 - (4) It is permissible to catch and release, but unlawful to retain, white sturgeon in the following areas:
 - (a) Coastal waters and tributaries of coastal waters;
 - (b) Puget Sound waters and tributaries of Puget Sound;
 - (c) Vancouver Lake and all other waters west of Burlington Northern Railroad from the Columbia River drawbridge near Vancouver downstream to Lewis River (Clark County);
 - (d) Columbia River and tributaries from a true north-south line through Buoy 10 (the mouth) upstream to Chief Joseph Dam, unless otherwise provided; and
 - (e) Snake River and tributaries from the mouth upstream to the border with Oregon, unless otherwise provided.
 - (5) White sturgeon retention is allowed in the areas open to fishing and following rules as specified in WAC 220-310-200:
 - (a) Columbia River:
 - (i) Columbia River and tributaries from Bonneville Dam upstream to McNary Dam: January 1 through July 31.
 - (ii) Columbia River and tributaries from McNary Dam upstream to Priest Rapids Dam: February 1 through July 31.
 - (b) Snake River: From the Snake River mouth (also called the Snake River Confluence Protection Area) upstream to Ice Harbor Dam: February 1 through July 31.
 - (6) The following waters are closed to fishing for sturgeon:
 - (a) Columbia River:
 - (i) Mouth to Bonneville Dam:
 - (A) Year-round from Bonneville Dam downstream to a boundary marker on the Washington shore approximately 4,000 feet below the fish ladder at the powerhouse, south to the downstream end of Cascade Island, and across to the Oregon angling boundary on Bradford Island (the Cascade Island-Bradford Island line).
 - (B) May 1 through August 31 from Bonneville Dam downstream 9 miles to a line crossing the Columbia River from navigation marker 82

on the Oregon shore, westerly to the boundary marker on the Washington shore upstream of Fir Point (navigational marker 82 line).

(ii) Bonneville Dam to McNary Dam:

(B) May 1 through July 31 from John Day Dam downstream 2.4 miles to a line crossing the Columbia at a right angle to the thread of the river from the west end of the grain silo at Rufus, Oregon.

(C) May 1 through July 31 from McNary Dam downstream to the Highway 82 (395) Bridge.

(iii) McNary Dam to Priest Rapids Dam:

(A) May 1 through July 31 from Priest Rapids Dam downstream 2.5 miles to the boundary marker on the river bank 400 feet downstream from Priest Rapids Hatchery outlet channel (Jackson Creek).

(B) October 23 through January 31 from the Old Hanford townsite wooden power line towers to Vernita Bridge.

(iv) Chief Joseph Dam upstream:

(A) Columbia River and its tributaries.

(B) Roosevelt Lake and its tributaries.

(b) Snake River Mouth to Ice Harbor Dam: May 1 through July 31 from the downstream end of Goose Island upstream 1.5 miles to Ice Harbor Dam.

(7) The following limits and requirements apply in areas where it is permissible to retain sturgeon:

(a) The daily limit is one white sturgeon.

(b) The possession limit is two daily limits of fresh, frozen, or processed white sturgeon.

(c) The annual personal-use limit for white sturgeon from April 1 through March 31 is two fish, regardless of where the angler takes the sturgeon.

(d) The maximum fork-length is 54 inches.

(e) The minimum fork-length is 38 inches, except the minimum fork-length is 43 inches in:

(i) The mainstem Columbia and its tributaries from The Dalles Dam to Priest Rapids Dam; and

(ii) The Snake River from the Snake River Confluence Protection Area to Ice Harbor Dam.

(f) Once an angler reaches his or her annual limit of white sturgeon, he or she may continue to fish for white sturgeon in the mainstem Columbia River downstream from where the river forms the common boundary between Oregon and Washington, unless otherwise provided by department rule, so long as the angler releases all subsequent sturgeon immediately.

(g) It is unlawful to possess sturgeon eggs in the field without retaining the intact carcass of the fish from which the eggs have been removed.

(8) A violation of this section is an infraction, punishable under RCW 77.15.160, unless the person has harvested sturgeon. If the person has harvested sturgeon, the violation is punishable under RCW 77.15.380((7)) Unlawful recreational fishing in the second degree—Penalty, unless the sturgeon are taken in the amounts or manner to constitute a violation of RCW 77.15.370((7)) Unlawful recreational fishing in the first degree—Penalty.

(9) It is unlawful to possess sturgeon taken with gear in violation of the provisions of this section. Possession of sturgeon while

using gear in violation of the provisions of this section is a rebuttable presumption that the sturgeon were taken with such gear. Possession of such sturgeon is punishable under RCW 77.15.380((τ)) Unlawful recreational fishing in the second degree—Penalty, unless the sturgeon are taken in the amounts or manner to constitute a violation of RCW 77.15.370((τ)) Unlawful recreational fishing in the first degree—Penalty.
