RE: Public Comments on the WDFW DRAFT Wolf Management Plan

To Whom It May Concern:

I would like to submit my comments in regards to the Proposed WDFW Wolf Management Plan. I do not support any of the WDFW's EIS alternatives. I support the Minority Opinion (MO) on pages 202-203 of the management plan. The MO calls for 3 Breeding Pairs (BPs) to go from Endangered to Threatened, 6 BPs to go from Threatened to Sensitive and 8 BPs to Delist the Wolf.

I am concerned that the WDFW will not be able to fully fund the compensation portion of the WDFW Wolf Management Plan. Without complete funding of the compensation I think it is unconscionable for the WDFW to even consider a plan that calls for more than 8 BPs.

I would like to provide an additional alternative to the WDFW if the MO (3, 6 & 8 BPs) is not accepted. I would like to recommend that the WDFW support the proposal put forth by the Washington Cattlemen's Association (WCA) Alternative 1A "The Responsible Approach". Alternative 1A has a trigger 3 BPs to move to the Threatened Level and 6 BPs to move down to the Sensitive Level at that time the WDFW would immediately convene a diverse group with the Ruckelshaus Center that would be charged with setting a final number of BPs for delisting of the wolf.

Thank you for considering my comments.

I would like to submit my comments in regards to the Proposed WDFW Wolf Management Plan. I do not support any of the WDFW's EIS alternatives. I support the Minority Opinion (MO) on pages 202-203 of the management plan. The MO calls for 3 Breeding Pairs (BPs) to go from Endangered to Threatened, 6 BPs to go from Threatened to Sensitive and 8 BPs to Delist the Wolf.

I am concerned that the WDFW will not be able to fully fund the compensation portion of the WDFW Wolf Management Plan. Without complete funding of the compensation I think it is unconscionable for the WDFW to even consider a plan that calls for more than 8 BPs.

I would like to provide an additional alternative to the WDFW if the MO (3, 6 & 8 BPs) is not accepted. I would like to recommend that the WDFW support the proposal put forth by the Washington Cattlemen's Association (WCA) Alternative 1A "The Responsible Approach". Alternative 1A has a trigger 3 BPs to move to the Threatened Level and 6 BPs to move down to the Sensitive Level at that time the WDFW would immediately convene a diverse group with the Ruckelshaus Center that would be charged with setting a final number of BPs for delisting of the wolf.

Thank you for considering my comments.

RE: Public Comments on the WDFW DRAFT Wolf Management Plan

To Whom It May Concern:

I would like to submit my comments in regards to the Proposed WDFW Wolf Management Plan. I do not support any of the WDFW's EIS alternatives. I support the Minority Opinion (MO) on pages 202-203 of the management plan. The MO calls for 3 Breeding Pairs (BPs) to go from Endangered to Threatened, 6 BPs to go from Threatened to Sensitive and 8 BPs to Delist the Wolf.

I am concerned that the WDFW will not be able to fully fund the compensation portion of the WDFW Wolf Management Plan. Without complete funding of the compensation I think it is unconscionable for the WDFW to even consider a plan that calls for more than 8 BPs.

I would like to provide an additional alternative to the WDFW if the MO (3, 6 & 8 BPs) is not accepted. I would like to recommend that the WDFW support the proposal put forth by the Washington Cattlemen's Association (WCA) Alternative 1A "The Responsible Approach". Alternative 1A has a trigger 3 BPs to move to the Threatened Level and 6 BPs to move down to the Sensitive Level at that time the WDFW would immediately convene a diverse group with the Ruckelshaus Center that would be charged with setting a final number of BPs for delisting of the wolf.

Thank you for considering my comments.

To Whom It May Concern:

I would like to submit my comments in regards to the Proposed WDFW Wolf Management Plan. I do not support any of the WDFW's EIS alternatives. I support the Minority Opinion (MO) on pages 202-203 of the management plan. The MO calls for 3 Breeding Pairs (BPs) to go from Endangered to Threatened, 6 BPs to go from Threatened to Sensitive and 8 BPs to Delist the Wolf.

I am concerned that the WDFW will not be able to fully fund the compensation portion of the WDFW Wolf Management Plan. Without complete funding of the compensation I think it is unconscionable for the WDFW to even consider a plan that calls for more than 8 BPs.

I would like to provide an additional alternative to the WDFW if the MO (3, 6 & 8 BPs) is not accepted. I would like to recommend that the WDFW support the proposal put forth by the Washington Cattlemen's Association (WCA) Alternative 1A "The Responsible Approach". Alternative 1A has a trigger 3 BPs to move to the Threatened Level and 6 BPs to move down to the Sensitive Level at that time the WDFW would immediately convene a diverse group with the Ruckelshaus Center that would be charged with setting a final number of BPs for delisting of the wolf.

Thank you for considering my comments.

Increasing wolf population will highly decrease wildlife populations which will decrease the number of hunting opportunities and therefore the hunting license sales will decrease significantly. The loss of these sales will greatly decrease income and funding for WDFW.

The natural reintroduction of the wolf population is already going at a fast enough rate. With the assistance of the WDFW, the population would explode and major issues would arise and the WDFW does not have the money to pay for this.

I am concerned that the WDFW will not be able to fully fund the compensation portion of the WDFW Wolf Management Plan. Without complete funding of the compensation I think it is unconscionable for the WDFW to even consider a plan that calls for more than 8 BPs.

I would like to provide an additional alternative to the WDFW if the MO (3, 6 & 8 BPs) is not accepted. I would like to recommend that the WDFW support the proposal put forth by the Washington Cattlemen's Association (WCA) Alternative 1A "The Responsible Approach". Alternative 1A has a trigger 3 BPs to move to the Threatened Level and 6 BPs to move down to the Sensitive Level at that time the WDFW would immediately convene a diverse group with the Ruckelshaus Center that would be charged with setting a final number of BPs for delisting of the wolf.

Thank you for considering my comments.

The wolf population will naturally increase over time without human interaction. They are a dominant species. If human were to introduce more, the population would get out of control and no one would be able to handle it with no funds.

RE: Public Comments on the WDFW DRAFT Wolf Management Plan

To Whom It May Concern:

I would like to submit my comments in regards to the Proposed WDFW Wolf Management Plan. I do not support any of the WDFW's EIS alternatives. I support the Minority Opinion (MO) on pages 202-203 of the management plan. The MO calls for 3 Breeding Pairs (BPs) to go from Endangered to Threatened, 6 BPs to go from Threatened to Sensitive and 8 BPs to Delist the Wolf.

I am concerned that the WDFW will not be able to fully fund the compensation portion of the WDFW Wolf Management Plan. Without complete funding of the compensation I think it is unconscionable for the WDFW to even consider a plan that calls for more than 8 BPs.

I would like to provide an additional alternative to the WDFW if the MO (3, 6 & 8 BPs) is not accepted. I would like to recommend that the WDFW support the proposal put forth by the Washington Cattlemen's Association (WCA) Alternative 1A "The Responsible Approach". RE: Public Comments on the WDFW DRAFT Wolf Management Plan

To Whom It May Concern:

I would like to submit my comments in regards to the Proposed WDFW Wolf Management Plan. I do not support any of the WDFW's EIS alternatives. I support the Minority Opinion (MO) on pages 202-203 of the management plan. The MO calls for 3 Breeding Pairs (BPs) to go from Endangered to Threatened, 6 BPs to go from Threatened to Sensitive and 8 BPs to Delist the Wolf.

I am concerned that the WDFW will not be able to fully fund the compensation portion of the WDFW Wolf Management Plan. Without complete funding of the compensation I think it is unconscionable for the WDFW to even consider a plan that calls for more than 8 BPs.

I would like to provide an additional alternative to the WDFW if the MO (3, 6 & 8 BPs) is not accepted. I would like to recommend that the WDFW support the proposal put forth by the Washington Cattlemen's Association (WCA) Alternative 1A "The Responsible Approach". Alternative 1A has a trigger 3 BPs to move to the Threatened Level and 6 BPs to move down to the Sensitive Level at that time the WDFW would immediately convene a diverse group with the Ruckelshaus Center that would be charged with setting a final number of BPs for delisting of the wolf.

Thank you for considering my comments.
