

Dear Washington Department of Fish and Wildlife,

Thank you for working to create a strong plan that will support gray wolf recovery in Washington State. Wolves play an important part in regulating ecosystems and supporting biodiversity, and their recovery here could lead to more resilient ecosystems which could help combat predicted climate-induced changes.

I believe the following changes are essential for to wolf recovery in Washington: 1) Use science as a guide and increase the breeding pairs to 30 before delisting is proposed, 2) Incorporate a stronger evaluation and plan for improved connectivity across the State, and 3) eliminate the caught-in-the-act killing provision to prevent abuse.

RECEIVED

Thank you for the opportunity to comment.

Thank you for working to create a strong plan that will support gray wolf recovery in Washington State. Wolves play an important part in regulating ecosystems and supporting biodiversity, and their recovery here could lead to more resilient ecosystems which could help combat predicted climate-induced changes.

I believe the following changes are essential for to wolf recovery in Washington: 1) Use science as a guide and increase the breeding pairs to 30 before delisting is proposed, 2) Incorporate a stronger evaluation and plan for improved connectivity across the State, and 3) eliminate the caught-in-the-act killing provision to prevent abuse.

Thank you for the opportunity to comment.

Sincerely,

Dear Washington Department of Fish and Wildlife,

Thank you for working to create a strong plan that will support gray wolf recovery in Washington State. Wolves play an important part in regulating ecosystems and supporting biodiversity, and their recovery here could lead to more resilient ecosystems which could help combat predicted climate-induced changes.

I believe the following changes are essential for to wolf recovery in Washington: 1) Use science as a guide and increase the breeding pairs to 30 before delisting is proposed, 2) Incorporate a stronger evaluation and plan for improved connectivity across the State, and 3) eliminate the caught-in-the-act killing provision to prevent abuse.

Thank you for the opportunity to comment.

Sincerely,
