

Summary of the November 8, 2013 WDFW managed commercial gillnet fishery in Grays Harbor catch areas 2A and 2D from on-board observation data

Statistical Week 45

Participation in the November 8, 2013 WDFW managed commercial gillnet fishery in Grays Harbor catch areas 2A and 2D was lower than recent years. Twelve vessels participated; three boats carried a WDFW observer on-board for part of the day. A total of 19 sets were observed. Average soak time was 31 minutes.

Landed catch:

Marked hatchery Chinook – 1

Coho – 1,446 (275 marked; 1,171 unmarked), mark rate 19.0%

Chum – 838

Encounters of fish not retained:

No unmarked, presumed natural-origin Chinook were encountered in observed sets. Expanding for unobserved sets, the total estimated encountered of unmarked Chinook was 0 (zero).

Chinook encounters were categorized into one of six conditions.

Condition	Definition	# encountered	Percent of total
1	Vigorous	0	0%
2	Vigorous and Bleeding	0	0%
3	Lethargic	0	0%
4	Lethargic and Bleeding	0	0%
5	Not visibly ventilating	0	0%
6	Dead	0	0%

No white or green sturgeon were encountered in observed sets.
