

**TRIBAL STAFF REPORT
SUMMER FACT SHEET No. 2
Columbia River Compact
June 23, 2006**

Purpose: To consider treaty Indian commercial fishing options for the mainstem Columbia River.

Treaty Indian Summer Season Fisheries

Currently the platform/hook and line fishery is open for sales and subsistence use in all of Zone 6. Sales of platform caught fish began on June 8. The platform expects to harvest about 1,000 summer Chinook and 1,000 sockeye over the summer management period (through July 31 assuming the platform fishery continues through the end of July). The summer season catch projections will be adjusted based on future catch updates.

Based on this week’s fishery and recent summer season fisheries, the expected gillnet catch is about 2,600 Chinook and 150 sockeye per weekly opening. With the estimated platform catch through July 31 and no additional gillnet fishing, the total Chinook harvest would be 8,818(18.0%). The sockeye harvest would be 1,434(4.6%).
