STREAM STRATEGY

Steelhead

Code	Status	Trout Rules	Fishing/Conservation
A	Resident zone	8" 10" or 12" minimum size, daily limit 2 or 5, bait allowed	Fishing: resident fish opportunities usually above anadromous zone, hatchery steelhead may be available
			Conservation: allows most resident trout to spawn at least once before harvest. Minimum size and daily limits are based on trout origin; hatchery or wild.
B	Resident zone/resident fish concerns	8", 10" or 12" minimum size, daily limit 2 fish, selective gear rules	Fishing: resident fish opportunities usually above anadromous zone, hatchery steelhead may be available
			Conservation: allows most resident trout to spawn at least once before harvest minimum size and daily limits are based on trout origin; hatchery or wild.
C	Status good or anadromous fish juvenile presence low	10", 12" or 14" minimum size, daily limit 2, bait allowed	Fishing: resident trout, sea-run cutthroat, salmon, hatchery steelhead
			Conservation: minimum size protects overwintering SH, allows resident trout and sea-run cutthroat to spawn once before retention. Minimum size is based on stream size, productivity and life history of the trout.
D	Status bad or SH anadromous fish juveniles present	10", 12" or 14" minimum size, daily limit 2, selective gear rules	Fishing: resident trout, sea-run cutthroat, salmon, hatchery steelhead
			Conservation: minimum size protects overwintering SH, allows resident trout and sea-run cutthroat to spawn once before retention. Minimum size is based on stream size, productivity and life history of the trout.
E	Status bad	Selective gear rules and catch and release, except ,may retain 2 hatchery steelhead	Fishing: opportunity for harvest of hatchery steelhead, often includes catch&release opportunity for trout, sea-run cutthroat and wild steelhead.
			Conservation: selective gear rules reduces the catch&release mortality associated with the use of bait. Protection provided for all trout life history stages.
F	Status bad	Catch&release, selective gear rules	Fishing: no hatchery steelhead present, catch&release opportunity for trout, which may include wild steelhead.
			Conservation: selective gear rules reduces the C&R mortality associated with the use of bait. Protection provided for all trout life history stages.
