Subject: HSRG Review of Hamma Hamma Fall Chinook HGMP

A subcommittee of the Hatchery Scientific Review Group (HSRG) has reviewed the Hamma Hamma Fall Chinook Hatchery and Genetic Management Plan (HGMP), dated January 16, 2013. Due to the ongoing evaluation and potential large scale changes to the program (as described in the current HGMP) the HSRG has declined to comment on the existing HGMP. The HSRG looks forward to reviewing an updated document when the formal evaluation is complete.
