
To F+W Commission – Re: Bow hunting around Enumclaw.

This area circled is where we had to watch a big bull elk die in our field. As his herd watched, he repeatedly tried to stand, then he'd fall. It was horrifying to us.

As you can see – this area is way to populated to have hunters shooting or tracking an animal properly. Last year, guys came up the creek who'd been tracking a wounded elk for 3 days. That's just cruel and pathetic. All hunting should be east of the power transmission lines coming off of Mud Mtn. Dam! Let F+W agents handle damage and over population problems. Thank-you – Margaret Chowen
