

Current Section Number	Last Revision Effective Date	Current Title	Proposed Section Number	Proposed Title	Summary of Changes
220-110-010	07/05/1997	Purpose.	220-110-010	Purpose.	Edited. Function of this section remains ~the same.
			220-110-011	Instructions for using chapter 220-110 WAC	New section explaining the overall organization of the rule, and relationship to guidance.
220-110-020	04/03/2009	Definitions.	220-110-020	Definitions.	Expanded and edited. This section will need further editing for consistency with the rest of the rule when we are closer to a formal proposal.
220-110-030	10/14/2010	Hydraulic project approvals -- Procedures.	220-110-030	Procedures—hydraulic project approvals.	Expanded and edited. Function remains ~the same. Now includes descriptions of "simplified" HPAs, and tribal review period.
220-110-031	04/03/2009	Pamphlet hydraulic project approvals -- Procedures.	220-110-031	Procedures—pamphlet hydraulic project approvals.	Retained most existing rule language. Updated instructions for submitting application documents.
220-110-032	12/15/1994	Modification of technical provisions.	220-110-032	Applicability, modification of hydraulic project approval requirements	Proposed rule includes discussion of the applicability of requirements for repair, maintenance, rehabilitation, and replacement as well as new construction. Proposed rule includes a baseline for compensatory mitigation.
220-110-035	06/01/2005	Miscellaneous hydraulic projects -- Permit requirements and exemptions.	220-110-035	Miscellaneous hydraulic projects — permit requirements and exemptions.	Miscellaneous hydraulic projects remain in this section. Exemptions have been updated.
			220-110-036	General requirements for the issuance of all hydraulic project approvals.	New section details mitigation sequence and compensatory mitigation requirements.
			220-110-037	General technical provisions.	New section. It compiles construction BMPs that were distributed throughout current WAC. It adds BMPs that are pertinent to many different kinds of construction projects (e.g., equipment access, noise, revegetation, pile diving/removal) so that those requirements are not repeated in several places. People would refer to both this section and pertinent activity-specific sections to know what is required in an HPA.
			220-110-038	Compensatory mitigation monitoring requirements.	New section. Provides detail on requirements for monitoring of compensatory mitigation.
			220-110-039	Adaptive management for the HPA program.	New section. Describes the use of adaptive management and monitoring to quantify and improve the HPA program.

Current Section Number	Last Revision Effective Date	Current Title	Proposed Section Number	Proposed Title	Summary of Changes
			220-110-041	Authorized work times in freshwater areas.	New section. Describes how the department will determine authorized work times. Future drafts may include specific times for specific waterbodies, similar to the work times for mineral prospecting found in 220-110-206.
			220-110-046 (formerly - 271)	Authorized work times in saltwater areas.	Content from 220-110-271 was moved to this location to match the new organization of the rule. The section now specifies "authorized" rather than "prohibited" work times. The work times have been updated with current information.
			220-110-047 (formerly - 240)	Tidal reference areas.	Text from 220-110-240 was moved to this location to match the new organization of the rule. Edited for accuracy.
			220-110-049 (formerly - 250)	Saltwater habitats of special concern.	Text from 220-110-250 was moved to this location to match the new organization of the rule. Rock sole spawning beds have been deleted; Olympia oyster and pinto (northern) abalone areas have been added. "Eelgrass" has been generalized to "seagrasses." Added description of geomorphic and ecological processes to be protected.
			220-110-051	Forage fish spawning surveys	Placeholder. Standard protocols will be described in rule.
			220-110-052	Seagrass and macroalgae habitat surveys	Placeholder. Standard protocols will be described in rule.
			220-110-055 (formerly - 050, -223, -280, and -285)	Bulkheads and bank protection.	Text from 220-110-050, -223, -280, and -285 have been compiled and reorganized to remove duplication in fresh- versus salt-water; added requirements and types of structures.
			220-110-063	Buoys.	New section specific to buoys.
			220-110-065 (formerly -060 and -300)	Docks (piers,ramps, and floats) and pilings.	Current sections compiled and reorganized to remove duplication in fresh- versus salt-water. Added requirements to reflect current science and engineering.

Current Section Number	Last Revision Effective Date	Current Title	Proposed Section Number	Proposed Title	Summary of Changes
			220-110-066 (formerly -330)	Marinas in saltwater areas	Retained existing rule language. Moved to be in proximity with other overwater structures.
			220-110-067 (formerly -224 and -290)	Boat ramps, launches, and hoists	Combined requirements for salt and fresh water in one section. Retained existing rule language.
220-110-070	12/15/1994	Water crossing structures.	220-110-070	Water crossing structures	Major reworking of section -070. Contains contain rules for bridges, stream simulation culverts, no-slope culverts, and fords. Requirements for hydraulic culverts have been moved to -075.
			220-110-075	Fishways	New section specific to fishways; includes updated provisions for hydraulic culverts formerly found in -070. Other types of fishways include fish ladders, weirs for fish passage, roughened channels, and trap-and-haul operations.
220-110-080	12/15/1994	Channel change/realignment.	220-110-080	Channel change/realignment.	Retained existing rule language.
			220-110-105 (formerly -100 and -310)	Conduits.	Retained existing rule language. Current sections for fresh and salt waters have been compiled and reorganized into one section.
			220-110-115 (formerly -130 and -320)	Dredging.	Retained existing rule language. Current sections for fresh and salt waters have been compiled and reorganized into one section.
220-110-120	12/15/1994	Temporary bypass culvert, flume, or channel.	220-110-120	Work area isolation, fish removal and exclusion	Details have been added to current requirements for bypasses, flumes or channels. Requirements for pumped diversions and cofferdams have been added to existing language. Placeholder for standard protocols for fish removal and exclusion.
220-110-140	12/15/1994	Gravel removal.	220-110-140	Gravel removal.	Retained existing rule language.
220-110-150	12/15/1994	Large woody material removal or repositioning.	220-110-150	Large woody material removal or repositioning	Retained existing rule language.
220-110-160	12/15/1994	Felling and yarding of timber.	220-110-160	Felling and yarding of timber.	Retained existing rule language.

Current Section Number	Last Revision Effective Date	Current Title	Proposed Section Number	Proposed Title	Summary of Changes
220-110-170	07/23/2005	Outfall structures.	220-110-170	Outfall structures	Updated for consistency with RCW. Updated to include current practices.
220-110-180	12/15/1994	Pond construction.	220-110-180	Pond construction	Retained existing rule language.
220-110-190	12/15/1994	Water diversions.	220-110-190	Water diversions and intakes	Retained existing rule language.
220-110-200	04/03/2009	Mineral prospecting.	220-110-200	Mineral prospecting	Unchanged from current rule.
220-110-201	04/03/2009	Mineral prospecting without timing restrictions.	220-110-201	Mineral prospecting without timing restrictions.	Unchanged from current rule.
220-110-202	04/03/2009	Mineral prospecting with timing restrictions.	220-110-202	Mineral prospecting with timing restrictions.	Unchanged from current rule.
			220-110-203	Mineral prospecting on beaches	Placeholder.
220-110-206	04/03/2009	Authorized work times and mineral prospecting equipment restrictions by specific state waters for mineral prospecting and placer mining projects.	220-110-206	Authorized work times and mineral prospecting equipment restrictions by specific state waters for mineral prospecting and placer mining projects	Unchanged from current rule.
			220-110-213	Beaver dam management	New section specific to beaver dam management.
220-110-331	07/05/1997	Aquatic plant removal and control technical provisions.	220-110-331 (formerly -331 through -338)	Aquatic plant removal and control technical provisions.	Aquatic plant removal requirements have been compiled into one section and edited to minimize redundancy.
220-110-340	10/14/2010	Informal appeal of adverse administrative decisions.	220-110-340	Informal appeal of adverse administrative decisions.	Retained existing rule language.
220-110-350	10/14/2010	Formal appeal of administrative decisions.	220-110-350	Formal appeal of administrative decisions.	Retained existing rule language.

Current Section Number	Last Revision Effective Date	Current Title	Proposed Section Number	Proposed Title	Summary of Changes
220-110-360	04/03/2009	Penalties.	220-110-360	Penalties.	Retained existing rule language.
220-110-040	12/15/1994	Freshwater technical provisions.			Section deleted due to rule reorganization.
220-110-050	12/15/1994	Bank protection.			Fresh- and saltwater requirements have been combined in -055.
220-110-060	12/15/1994	Construction of freshwater docks, piers, and floats			Fresh- and saltwater requirements have been combined in -065; general construction requirements moved to -037.
220-110-100	12/15/1994	Conduit crossing.			Fresh- and saltwater provisions have been combined in -105.
220-110-130	12/15/1994	Dredging in freshwater areas.			Fresh- and saltwater provisions have been combined in -115.
220-110-223	12/15/1994	Freshwater lake bulkheads.			Fresh- and saltwater provisions have been combined into one section in -055.
220-110-224	12/15/1994	Freshwater boat hoists, ramps, and launches.			Fresh- and saltwater provisions have been combined into one section in -065; general construction requirements moved to -037.
220-110-230	12/15/1994	Saltwater technical provisions.			Section deleted due to rule reorganization.
220-110-240	12/15/1994	Tidal reference areas.			Moved to -047 to match the new organization of the rule.
220-110-250	12/15/1994	Saltwater habitats of special concern.			Moved to -049 to match the new organization of the rule.
220-110-270	12/15/1994	Common saltwater technical provisions.			Section deleted due to rule reorganization.
220-110-271	12/15/1994	Prohibited work times in saltwater areas.			Moved to -046 to match the new organization of the rule.
220-110-280	12/15/1994	Bulkheads and bank protection in saltwater areas (nonsingle family residence).			Fresh and saltwater requirements have been combined into one section in -055.
220-110-285	12/15/1994	Single-family residence bulkheads in saltwater areas.			Fresh and saltwater requirements have been combined into one section in -055.
220-110-290	12/15/1994	Saltwater boat ramps and launches.			Fresh and saltwater requirements have been combined into one section in -065; general construction requirements moved to -037.
220-110-300	12/15/1994	Saltwater piers, pilings, docks, floats, rafts, ramps, boathouses, houseboats, and associated moorings.			Fresh and saltwater requirements have been combined into one section in -065; general construction requirements moved to -037.

Current			Proposed		Summary of Changes
Section Number	Last Revision Effective Date	Current Title	Section Number	Proposed Title	
220-110-310	12/15/1994	Utility lines.			Fresh and saltwater requirements have been combined into one section in -105.
220-110-320	12/15/1994	Dredging in saltwater areas.			Fresh and saltwater requirements have been combined into one section in -115
220-110-330	12/15/1994	Marinas in saltwater areas.			Moved to - 066 to match the new organization of the rule; general construction requirements moved to -037.
220-110-332	07/05/1997	Hand removal or control.			Compiled into -331.
220-110-333	07/05/1997	Bottom barriers or screens.			Compiled into -331.
220-110-334	07/05/1997	Weed rolling.			Compiled into -331.
220-110-335	07/05/1997	Mechanical harvesting and cutting.			Compiled into -331.
220-110-336	07/05/1997	Rotovation.			Compiled into -331.
220-110-337	07/05/1997	Aquatic plant dredging.			Compiled into -331.
220-110-338	07/05/1997	Water level manipulation.			Compiled into -331.
