

**CURRENT STATUS:**

Since release of the draft EIS in July 2011, the Yakama Nation has been reevaluating aspects of the proposal in conjunction with BPA. The scope and scale of any potential proposed modifications is in negotiation and an update will be made when the scope is determined. Depending on the extent of possible changes to the program, BPA will determine if a supplemental draft EIS may be appropriate. All comments received on the draft EIS, and BPA's responses to those comments, will be included in either a supplemental draft EIS (if appropriate) or published in the final EIS. BPA expects to release a supplemental draft EIS for public comment or publish a final EIS in late 2016 or early 2017.
