DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: SAGEBRUSH FLAT TEMPORARY PYGMY RABBIT LARGE ENCLOSURE # 2.

Description of Proposal:

Washington Department of Fish and Wildlife proposes to construct a 10.85 acre (3001 foot perimeter) fenced enclosure of native shrub-steppe habitat on the Sagebrush Flat Wildlife Area as a temporary holding area for reintroduced Columbia Basin pygmy rabbits. The final enclosure will be six to seven feet high, with 12-18 inches of the fence buried below the soil surface to exclude predators. Fence panels are composed of ½" x 1" welded wire. The support structures for the fence will be 7 foot wooden post, with steel t-posts placed between wooden posts. A number of artificial burrows will be dug in deeper soft soils to provide shelter for introduced rabbits. The enclosure will be a temporary structure that will be removed. Once removed, any habitat disturbed during construction will be replanted and the site recovered.
