**Subject:** RE: Ecology SEPA No. 12-1845 - Fallert Creek Hatchery Generator Replacement project - Comment Letter

**RE: Fallert Creek Ecology SEPA No. 12-1845 – Fallert Creek Hatchery Generator Replacement Project**

Thank you for your comments received during the SEPA comment period for the Washington State Fish and Wildlife (WDFW) Fallert Creek Generator Replacement Project.

**Air Quality:**

I have recently been contacted by the Southwest Clean Air Agency (WSCAA) in Vancouver, Wa., about the possibility of obtaining a Notice of Construction (NOC) permit for the generator. Should this permit be necessary, WDFW will comply with all permit requirements.

**Shorelands and Environmental Assistance:**

Application materials were submitted on 4/25/12 with Cowlitz County to determine permit requirements for the WDFW Fallert Creek generator replacement project. Washington State Fish and Wildlife will comply with all Cowlitz County Shoreline, and/or other permits, if they are required for this project, so that this project will be in compliance with the Cowlitz County Shoreline Master Program and the State Shoreline Management Act, and all electrical installation and inspection requirements.

**Water Quality:**

WDFW understands that sand, silt, clay particles are considered pollutants, and proper disposal of construction debris on land will be disposed of in a manner whereby they will not enter the waters of the state (Fallert Creek and Kalama River) or storm drains draining to the waters of the state causing water quality degradation. All erosion control measures will be in place prior to any clearing, grading or construction to prevent stormwater runoff from carrying soil and other pollutants into surface water or storm drains leading into the waters of the state. All required Best Management Practices will be in place during the construction of the Fallert Creek Generator Replacement Project.

Thank You for your comments about the Fallert Creek Generator Replacement Project. If you have any other concerns or comments please do not hesitate to contact me.

Regards,  
Cindy Knudsen
