Bob Zeigler, SEPA/NEPA Coordinator
WA State Department of Fish & Wildlife
Regulatory Services Section
600 Capitol Way North
Olympia, WA 98501-1091

Dear Mr. Zeigler:

Thank you for the opportunity to comment on the determination of nonsignificance for the Fallert Creek Hatchery Generator Replacement project located at Fallert Creek Hatchery in Cowlitz County as proposed by Cindy Knudsen, WA State Department of Fish and Wildlife (WDFW). The Department of Ecology (Ecology) reviewed the environmental checklist and has the following comment(s):

AIR QUALITY: Qing Chen (360) 407-6809

Prior review and approval through a Notice of Construction (NOC) for the generator may be required for this project from Southwest Clean Air Agency (SWCAA).

**SHORELANDS & ENVIRONMENTAL ASSISTANCE:
Rebecca Schroeder (360) 407-7273**

Ensure that the project is consistent with the Cowlitz County Shoreline Master Program and the State Shoreline Management Act.

**SEPA REVIEWER: Sonia Mendoza
WATER QUALITY CONTACT: Sheila Pendleton-Orme (360) 690-4787**

Any discharge of sediment-laden runoff or other pollutants to waters of the state is in violation of Chapter 90.48 RCW, Water Pollution Control, and WAC 173-201A, Water Quality Standards for Surface Waters of the State of Washington, and is subject to enforcement action.

Erosion control measures must be in place prior to any clearing, grading, or construction. These control measures must be effective to prevent stormwater runoff from carrying soil and other pollutants into surface water or storm drains that lead to waters of the state. Sand, silt, clay particles, and soil will damage aquatic habitat and are considered to be pollutants.

Proper disposal of construction debris must be on land in such a manner that debris cannot enter water of the state (e.g., Fallert Creek and Kalama River) and stormdrains draining to waters of the state or cause water quality degradation of state waters.
