**Subject:** RE: Ecology SEPA No. 12-5009 - Kress Lake Access Improvements project - Comment Letter

Ms. Mendoza and Mr. Drumright,

Thank you for your comments on SEPA number 12-5009 for the Kress Lake Access Improvements Project. In response to your comments, please see below:

Demolition with Specifically Treated Wood – We will be removing creosote pilings located above OHW that act as bollards for the trail at the south entrance to the lake access. We will refer to Ecology’s publication “Focus on Treated Wood Exclusion” for suggested BMPs and will dispose of treated wood in the required way.

Recycle Construction, Demolition & Land Clearing (CDL) – We will check into recycling opportunities for leftover CDL materials from the project. If a waste handling permit is required due to fill materials, we will apply for the permit with the local jurisdictional health department. The concrete vault structure that will be removed does not contain any hazardous materials that we are aware of, but all precautions will be taken to ensure that any hazardous materials are removed and appropriately managed prior to demolition.

Again, I thank you for your review of the project.

Chris Gourley
