Bob Zeigler, SEPA/NEPA Coordinator
WA State Department of Fish & Wildlife
600 Capitol Way North
Olympia, WA 98501-1091

Dear Mr. Zeigler:

Thank you for the opportunity to comment on the determination of nonsignificance for the Sol Duc Hatchery Improvements project located in Clallam County as proposed by Larry Peck, WA Department of Fish & Wildlife (WDFW). The Department of Ecology (Ecology) reviewed the environmental checklist and has the following comment(s):

TOXICS CLEANUP: Connie Groven (360) 407-6254

If contamination is suspected, discovered, or occurs during the proposed hatchery improvements, testing of the potentially contaminated media must be conducted. If contamination of soil or groundwater is readily apparent, or is revealed by testing, must be notified. Contact the Environmental Report Tracking System Coordinator at the Southwest Regional Office at (360) 407-6300. For assistance and information about subsequent cleanup and to identify the type of testing that will be required, contact Connie Groven with Ecology's Toxic Cleanup program at the phone number given above.

WASTE 2 RESOURCES: Mike Drumright (360) 407-6397

Property owners, developers, and contractors are encouraged to recycle all possible leftover construction, demolition, and land clearing (CDL) materials and reduce waste generated. Recycling construction debris is often less expensive than landfill disposal. Please visit Ecology's 1 800 Recycle Hotline database at: <http://1800recycle.wa.gov> or call the 1-800-RECYCLE hotline to find facilities that will accept your CDL materials for reuse or recycling.

Ecology's comments are based upon information provided by the lead agency. As such, they may not constitute an exhaustive list of the various authorizations that must be obtained or legal requirements that must be fulfilled in order to carry out the proposed action.

If you have any questions or would like to respond to these comments, please contact the appropriate reviewing staff listed above.
