Subject: RE: DNS 13-043 Kennedy Grass Carp Plant Private Ponds, King County

Mr. Marks,

We thank you for the thoughtful input and concerns, and will consider them to the extent possible when addressing this grass carp permit application. Please note that although the grass carp permit depends on the functionality of the barrier in question, an HPA permit is the vehicle that addresses its existence. You may contact our Regional Habitat Program Manager, David Brock (425-775-1311, ext. 114), regarding fish passage barrier concerns.

Thank you,

Justin Spinelli
