Subject: RE: DNS for Marine Shoreline Design Guidance

David, sorry for any confusion. The draft that Kathlene commented on is the same as the one submitted for SEPA. We really appreciated Kathlene's thoughtful comments and they will be considered as we develop the final version of the document. We did not feel as though the 1268 comments that we received would change the character or nature of the guidelines, so rather than create a new draft for SEPA we used the current one and we will be using any SEPA comments in writing the final Marine Shorelines Design Guidelines.

Thanks for your interest in this project,

Bob

Subject: DNS for Marine Shoreline Design Guidance

Hi Bob –

Kitsap County recently received the DNS for the draft Marine Design Guidance from WDFW's SEPA center. My colleague Kathlene Barnhart previously commented on the draft, but believes the version sent out for SEPA is unchanged from the one she previously commented on.

Do you know if Kitsap County's comments were already considered, or would be reflected in a future version? If not, we'll plan to resubmit the prior comments via the SEPA comment period.

Thanks,

David Greetham
