Subject: Whiskey Dick Wildlife Area Seasonal Road

This area is proven to be the winter range for a major part of the Colockum elk herd, any human activity has a negative impact on these animals. In the past, because of motorized traffic and human presence in the area, elk have swam across the Columbia River to the Douglas and Grant county side of the river and caused problems for orchardists, ranchers, and traffic mishaps on the state and other highways. This area should be closed to all traffic in the winter months. Thank you for the opportunity to comment on this very important issue.
