DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: DNS 14-005: YAKIMA HWY 10 ACCESS

Description of Proposal:

The project will include grading a gravel parking lot and adding an apron to connect with the road. A pad will be placed for ADA compliance parking and as a pad for a port-a-potty. A ramp and turn around areas will be created out of articulated concrete blocks. A guard rail is also proposed for safety. There will be 8 car parking spots and 4 for trailers.

Approximately $\frac{1}{4}$ acres will be cleared of vegetation to allow for the amenities proposed. Filling and grading will account for approximately 200 cubic yards of gravel borrow, 375 cubic yards of crushed rock, 950 square feet of asphalt for the road apron and approach, 300 yards of excavation for the launch, 30 cubic yards of rip rap for stabilization, and 2,200 square feet of cabled concrete blocks for the ramp. Gravel will be used to create a driving surface and parking area. The asphalt apron allows for an easy transition between the highway and the parking area.
