watershed

Dear Ms. Wood:

Thank you for the opportunity to comment on the determination of nonsignificance for the Sol Duc Hatchery Barrier Repair project (DNS 14-032) located at 1423 Pavel Road in Beaver as proposed by Larry Peck, WA State Department of Fish & Wildlife (WDFW). The Department of Ecology (Ecology) reviewed the environmental checklist and has the following comment(s):

**TOXICS CLEANUP: Connie Groven (360) 407-6254**

If contamination is suspected, discovered, or occurs during the proposed fish passage barrier repair, testing of the potentially contaminated media must be conducted. If contamination of soil or groundwater is readily apparent, or is revealed by testing, Ecology must be notified. Contact the Environmental Report Tracking System Coordinator in the Southwest Regional Office (SWRO) at (360) 407-6300. For assistance and information about subsequent cleanup and to identify the type of testing that will be required, contact Connie Groven with the SWRO, Toxic Cleanup Program at the phone number given above.

Ecology's comments are based upon information provided by the lead agency. As such, they may not constitute an exhaustive list of the various authorizations that must be obtained or legal requirements that must be fulfilled in order to carry out the proposed action.

If you have any questions or would like to respond to these comments, please contact the appropriate reviewing staff listed above.
