RE: WDFW McKernan Hatchery culvert removal and bridge placement project

Thank you for your comment on the Determination of Nonsignificance (DNS 15-014) for the WDFW McKernan Hatchery culvert removal and bridge placement project. Washington State Department of Fish and Wildlife (WDFW) understands that sand, silt, clay particles and soil will damage aquatic habitat and are considered to be pollutants and that any discharge of sediment-laden runoff or other pollutants to waters of the state is in violation of Chapter 90.48 RCW, Water Pollution Control, and WAC 173-201A, Water Quality Standards for Surface Waters of the State of Washington, and is subject to enforcement action.

During construction, every best management practice for erosion control will be used to ensure that stormwater runoff will not carry soil and other pollutants into any surface water or storm drain that could lead to waters of the state. All permits regulations will be followed.

Thank you again for your comment.

Importance: High

Ms. Wood,

Attached are Ecology's comments for the McKernan Hatchery Culvert Removal Project (Ecology SEPA No. 15-0983). This is the original final copy. Comments are due today 3/18/15.

Please reply to this message for confirmation.

Please use the correct acronym “ECY**” for the Department of Ecology (DOE is US Department of Energy).**
