Re: Beaver Creek Hatchery Intake Improvement Project (DNS 15-028)

Dear Ms. Rothwell:

Thank you for commenting on the Determination of Non-Significance for the proposed Beaver Creek Hatchery Intake Improvement project. The project includes extending the intake wing walls and replacement of screening to improve water flow to and through an existing water intake and fish ladder structure located on the Elochoman River that serves the Beaver Creek Hatchery.

Shorelands & Environmental Assistance

Your letter serves as a reminder to Washington Department of Fish and Wildlife the Shoreline Master Program for Wahkiakum County applies to this project. We are aware of this and in Question A. 10 responded on the SEPA Checklist with the following:

Government approvals/permits that are needed for the proposal are:

- Wahkiakum County Shoreline Permit
- Wahkiakum Building Permit
- WDFW Hydraulic Project Approval
- Army Corps of Engineers Section 404 Permit and Ecology 401 Water
- Quality Certification are anticipated to be required

Should any of you have further questions, do not hesitate to enquire.

Sincerely,

Douglas Mackey  
Fish and Wildlife Biologist
