To Department of Fish and Wildlife

Subject: Comments on Oak Creek Road Management DNS 15-057

Thank you for informing us on this project proposal. After talking with our consultant we have no objection as long as motorized access is maintained to the area around the proposed project.

The roads affected were user built and eventually abused the resources of the area.

Thank you for keeping us posted on the progress of this and other projects.

Earl P. Nett9in Region 4 Director
