Subject: RE: ECY SEPA 16-1437 - Snow Creek Pier Removal - Comments
Date: Tuesday, April 05, 2016 9:39:22 AM

Ms. Mendoza,

The Washington Department of Fish and Wildlife (WDFW) thanks the Department of Ecology for their review and comments for the Snow Creek Pier Removal Project. This proposed project is not expected to discover or encounter any toxic contamination, however if WDFW suspects or encounters any toxics during the project we will immediately have the material tested and inform the appropriate staff from Ecology. Staff contacted will be the Environmental Report Tracking System Coordinator at Ecology's Southwest Regional Office at 360.407.6300.

The proposed project will also utilize and follow Best Management Practices and follow the most recent Western Washington Storm Water Manual to effectively prevent stormwater runoff. The project does not include any clearing, grading or excavating activities.

WDFW thanks Ecology for the timely comments and including the specific contact information to assist WDFW in the implementation of this important project.

Larry Peck
WDFW Biologist 360.902.8376

Subject: ECY SEPA 16-1437 - Snow Creek Pier Removal - Comments
Importance: High

Ms. Wood,

Attached are Ecology's comments for the Snow Creek Pier Removal Project (Ecology SEPA No. 16-1437). This is the original final copy. Comments are due 4/5/16.

Please reply to this message for confirmation.

Please use the correct acronym "ECY" for the Department of Ecology (DOE is US Department of Energy).

Sonia Mendoza
Department of Ecology-SWRO
SEPA Coordinator
