DIRECTIONS TO SITE: Traveling north on Hwy 101 turn left just beyond MP 185 onto the G-2000. Follow the G-2000 approx. 6 miles to the G-2600. Turn left off the G-2600 onto the G-2620. A landing at the end of the G-2620 overlooks the B-L4 area (see site and site direction maps). During low river flows B-L4 is also accessible from the right bank by fording the river just upstream of Campbell's bar. Turn west off Hwy 101 about 0.6 mi. north of MP 188 onto a gravel road (gate may be locked). Campbell's bar is at the end of this road (see maps).

FISH ACCESS AND CURRENT USE: 0+ coho need to get by two beaver dams in the lower end of the channel in order to use the majority of the rearing area in B-L4-03. These dams appear passable at higher flows. Some fish were seen in the right branch of the channel.

FLOODING POTENTIAL: High.

LANDOWNER: Unknown at this time.

COMMENTS & RECOMMENDATIONS: B-L4-03 is an active overflow channel with a good amount of ponded water in the lower reaches. Some coho winter rearing undoubtedly takes place in the channel. Due to the high flood potential, no habitat enhancement measures can be recommended.
