

SITE NUMBER: B-L4-04
LOCAL NAME: Unnamed
WRIA: 20.0237K

NORTH COAST OFF CHANNEL SITE INVENTORY DATA

RIVER SYSTEM: Bogachiel **DATE:** 1/26/89 **OBSERVER:** Nettnin

CHANNEL TYPE: Terrace Tributary (wall-based)

TRIBUTARY TO: Bogachiel R. - 20.0162

SITE LOCATION: L.B. @ River mile - 13.0 (WDF)

LEGAL DESCRIPTION: SW1/4 S28 T28N R13W

	UPPER END	LOWER END	RIVER TEMP
<u>WATER TEMP:</u>	42 F	42 F	40 F
<u>FLOW (CFS):</u>	< 0.25	< 0.25	

SUBSTRATE TYPE: Sand & silt.

SITE SIZE: **Length-** 120 m
Width- Surface = 8 - 12 inches
Channel = 1 - 2 ft
Depth- 2 to 6 inches

WATER SOURCE: Small seep springs.

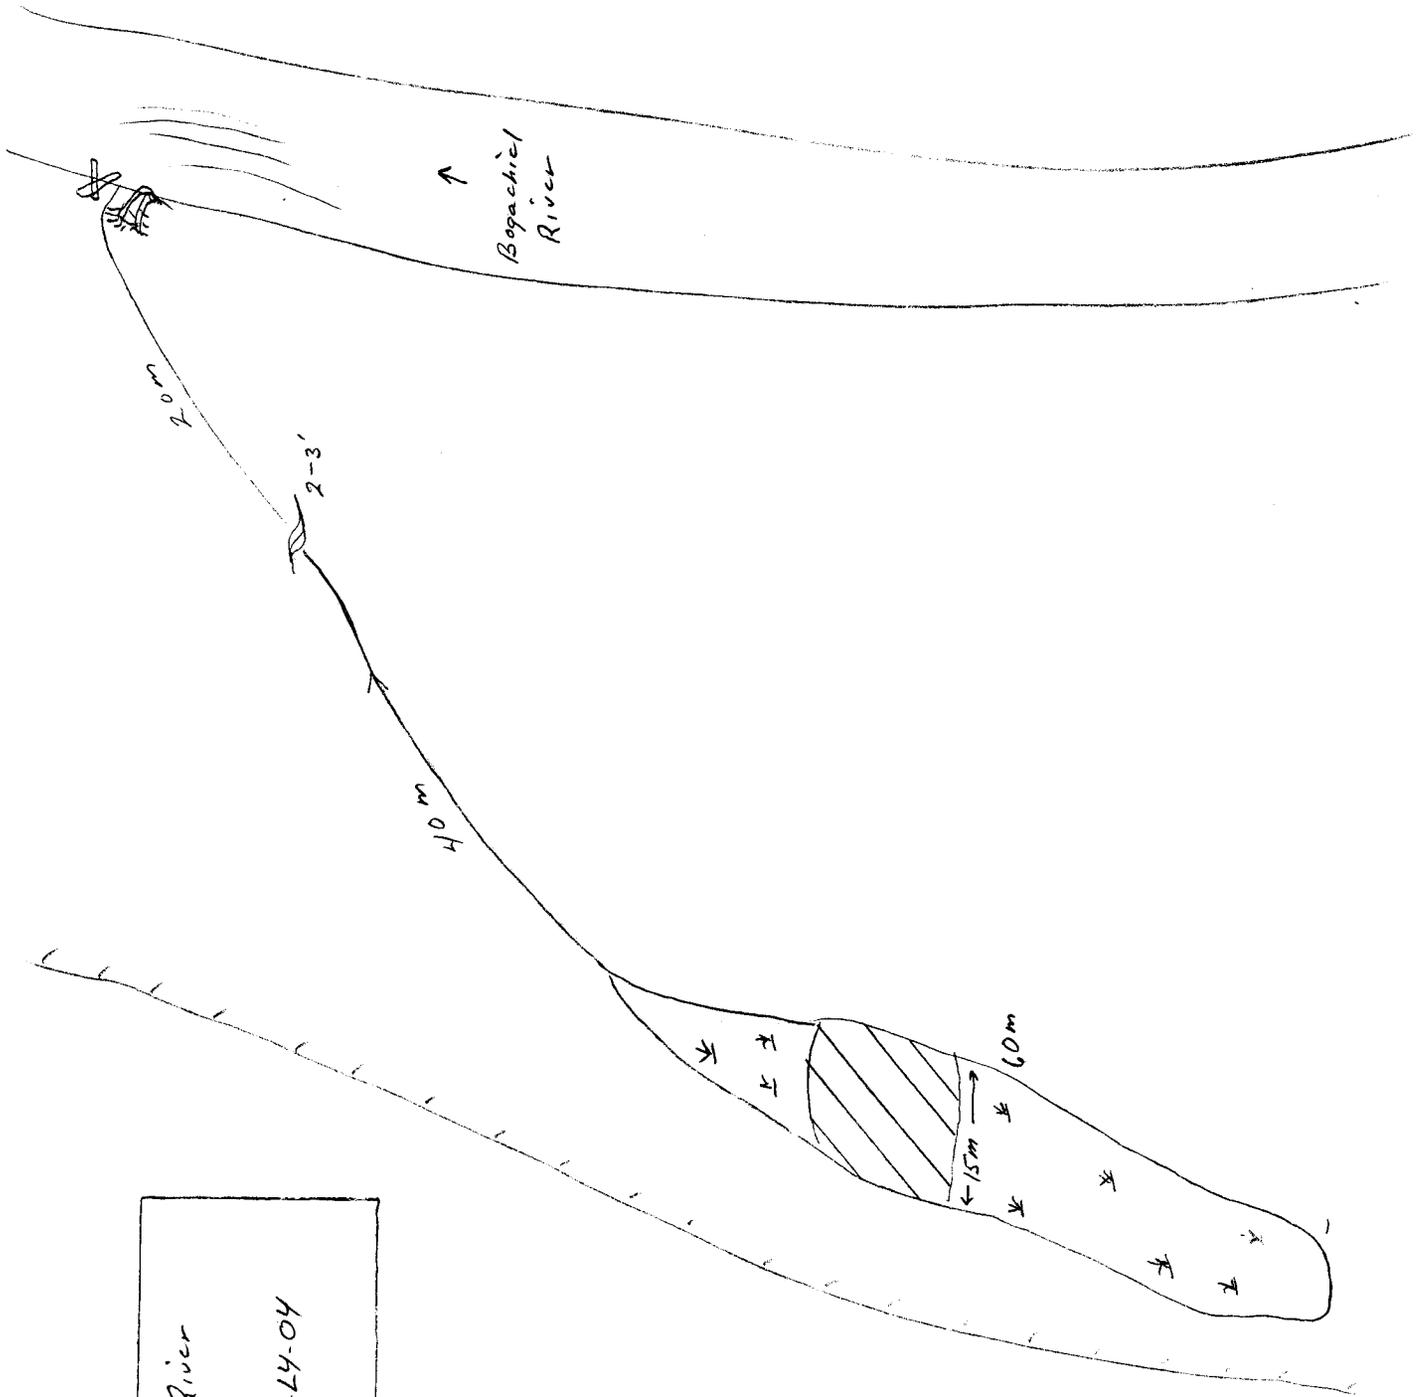

DIRECTIONS TO SITE: Traveling north on Hwy 101 turn left just beyond MP 185 onto the G-2000. Follow the G-2000 approx. 6 miles to the G-2600. Turn left off the G-2600 onto the G-2620. A landing at the end of the G-2620 overlooks the B-L4 area (see site and site direction maps). During low river flows B-L4 is also accessible from the right bank by fording the river just upstream of Campbell's bar. Turn west off Hwy 101 about 0.6 miles north of MP 188 onto a gravel road (gate may be locked). Campbell's bar is at the end of this road (see maps).

FISH ACCESS AND CURRENT USE: No fish were observed. Very nice egress to the river. Enters the river at a small back eddy with L.O.D. and a large overhanging bank. A 2 to 3 ft falls near the mouth probably is covered during high river conditions.

FLOODING POTENTIAL: Moderate.

LANDOWNER: Unknown at this time.

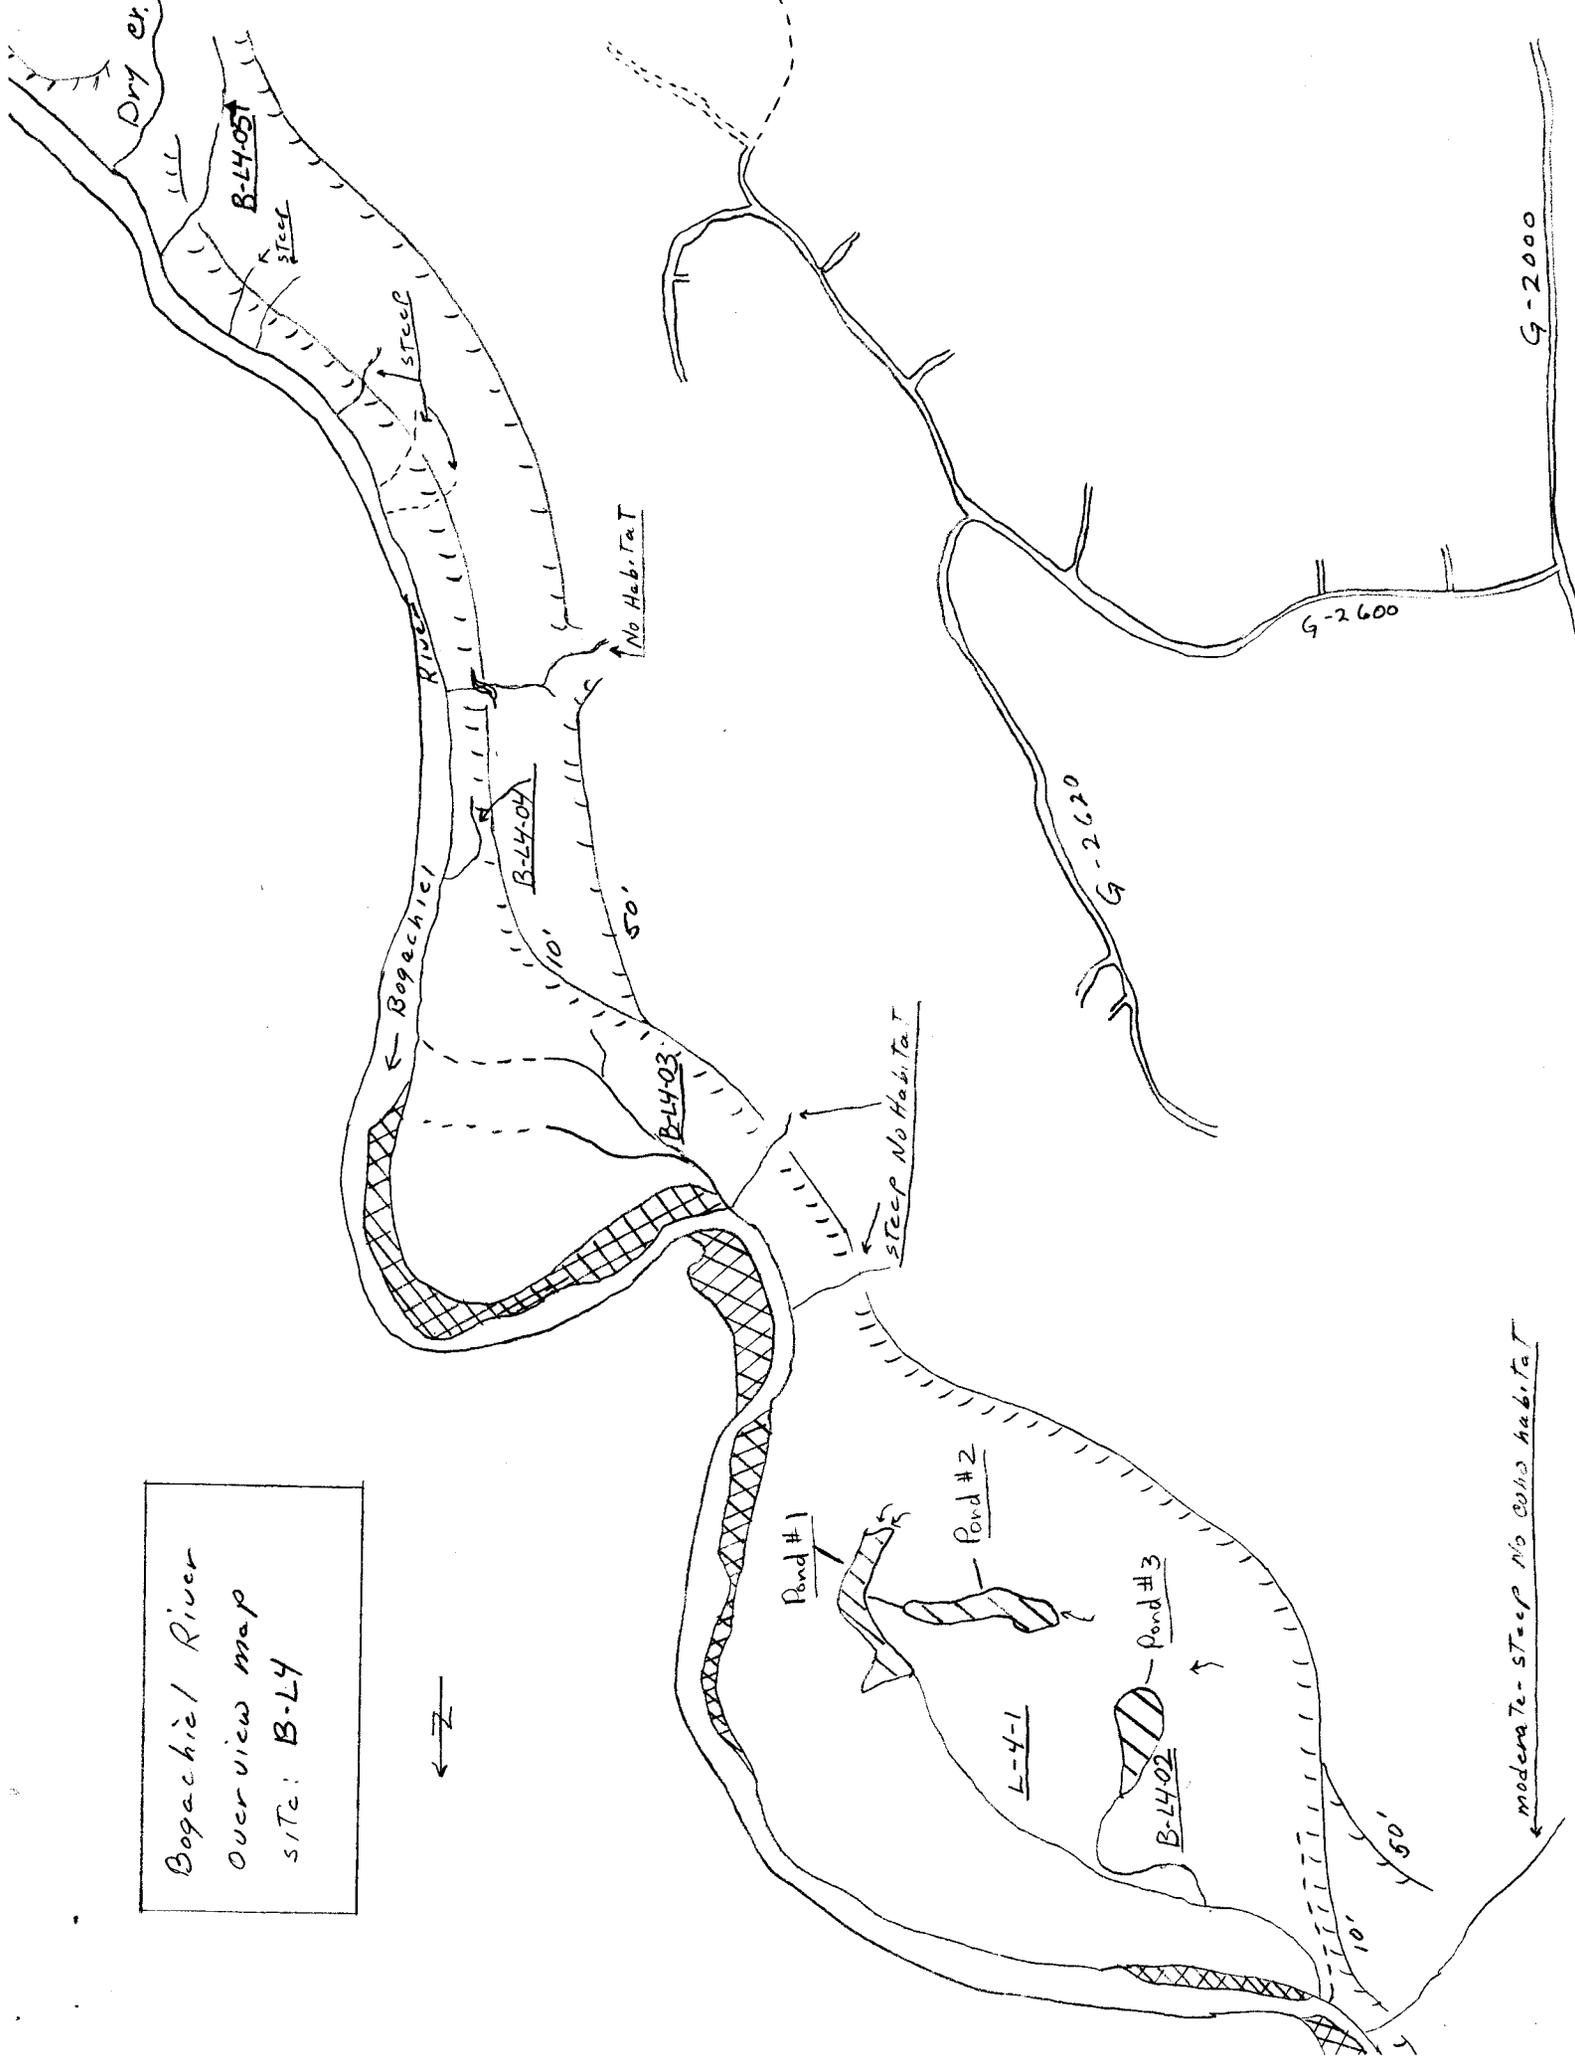

COMMENTS & RECOMMENDATIONS: B-L4-04 is a rather small trib with a very shallow channel. Some winter rearing may take place in the small pond at the upper end of the channel. The pond could be deepened and the channel could be beaded with controls. Any flooding that occurs in B-L4-04 is probably due to backwater from the river. Access to this site, in order to do channel enhancement, is rather difficult. No machine access is available.
