

SITE NUMBER: C-L3-01
LOCAL NAME: Unnamed
WRIA: 20.0175M

NORTH COAST OFF CHANNEL SITE INVENTORY DATA

RIVER SYSTEM: Calawah R. **DATE:** 1/24/90 **OBSERVER:** Nettnin

CHANNEL TYPE: Terrace trib. (Wall-based spring channel)

TRIBUTARY TO: Calawah R. (20.0175)

SITE LOCATION: L.B. @ River Mile: 7.2 (WDF)

LEGAL DESCRIPTION:

	UPPER END	LOWER END	RIVER TEMP
<u>WATER TEMP:</u>	48 F	48 F	N/A
<u>FLOW (CFS):</u>	< 0.25	< 0.25	

SUBSTRATE TYPE: All of L-3-1 is silty bottom.

SITE SIZE: **Length-** 65 m
 Width- Water surface = 1 - 2 ft
 Channel = 1 - 4 ft
 Depth- 2 - 3 in

WATER SOURCE: Springs

DIRECTIONS TO SITE: North from downtown Forks on Hwy 101 about a half mile to the Calawah River bridge. C-L3-01 is located along the LB and about 0.3 miles upstream of the bridge. The channel is also accessible by turning right off of Hwy 101 about 0.2 miles south of the Calawah Bridge onto Olympic Drive (i.e. the access road to the Calawah Estates Motel). Take first right off of Olympic Drive onto Huckleberry Lane. The road makes a hard left just past the large church. Continue until the road makes a hard right and ends at a private residence. C-L3-01 is located about 0.1 mile west of the last hard turn (see overview map).

FISH ACCESS AND CURRENT USE: Fish appear to have access to C-L3-01 only during high river conditions. Lack of flow, poor confluence, and steep gradient greatly limit access.

FLOODING POTENTIAL: Moderate.

LANDOWNER: Unknown at this time.

COMMENTS & RECOMMENDATIONS: C-L3-01 is an incised channel on a small terrace. It enters the Calawah on a shallow glide. C-L3-01 might make a good refuge area if it were deeper and wider. Need to observe flows throughout the winter.

NORTH COAST OFF CHANNEL SURVEY
SUBSEQUENT SITE EVALUATION FORM

River System: Calawah River

Channel No.: C-L3-01

Site Name:

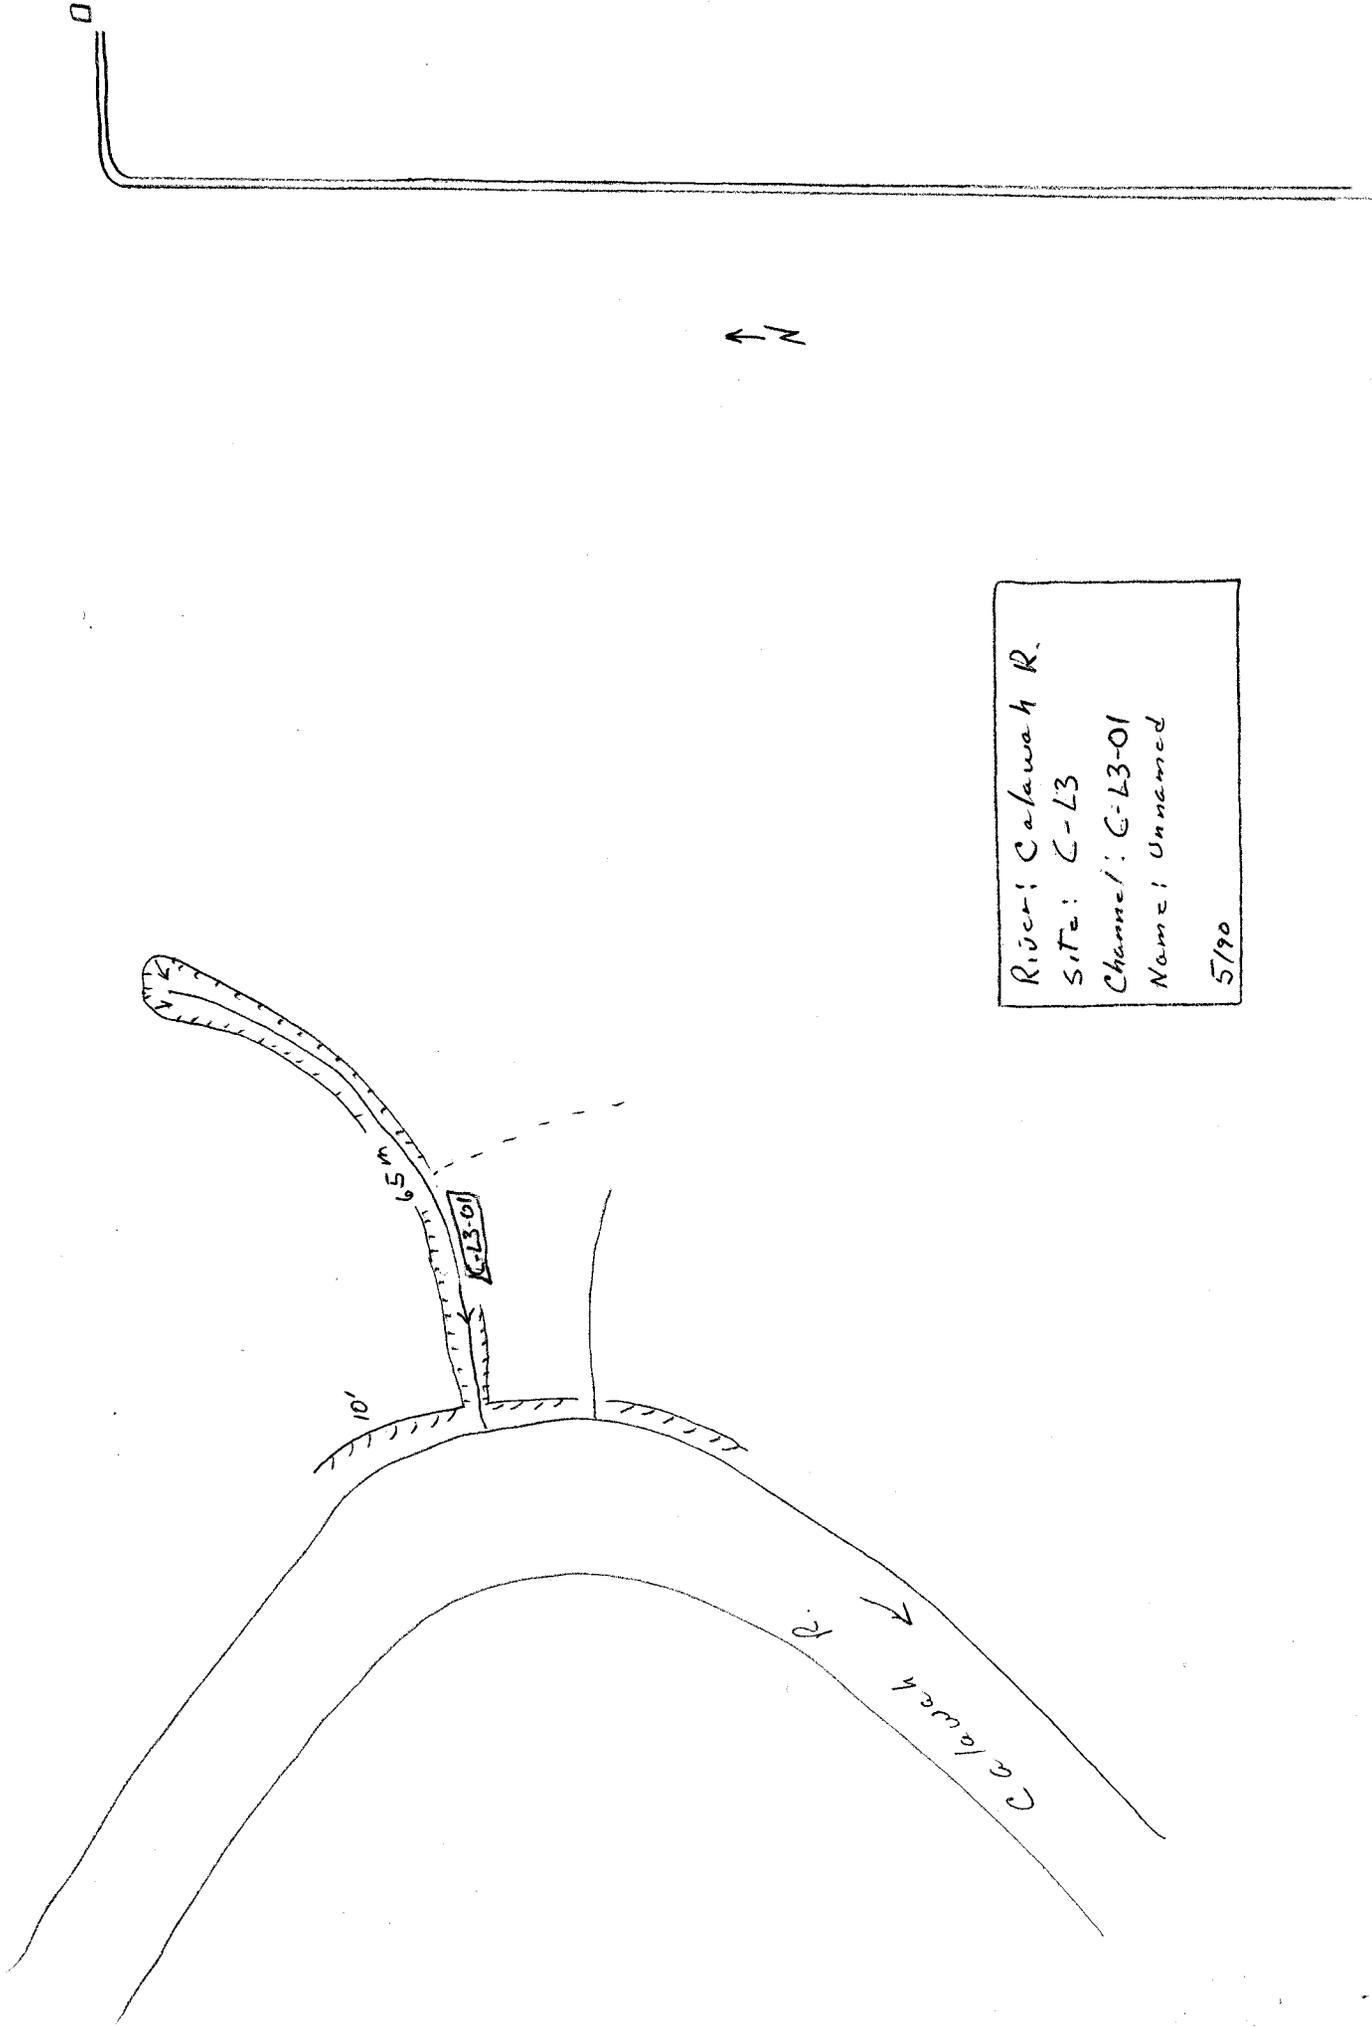

WRIA: 20.0175M

DATE: 6/14/90

OBSERVER: Young, Nettrin

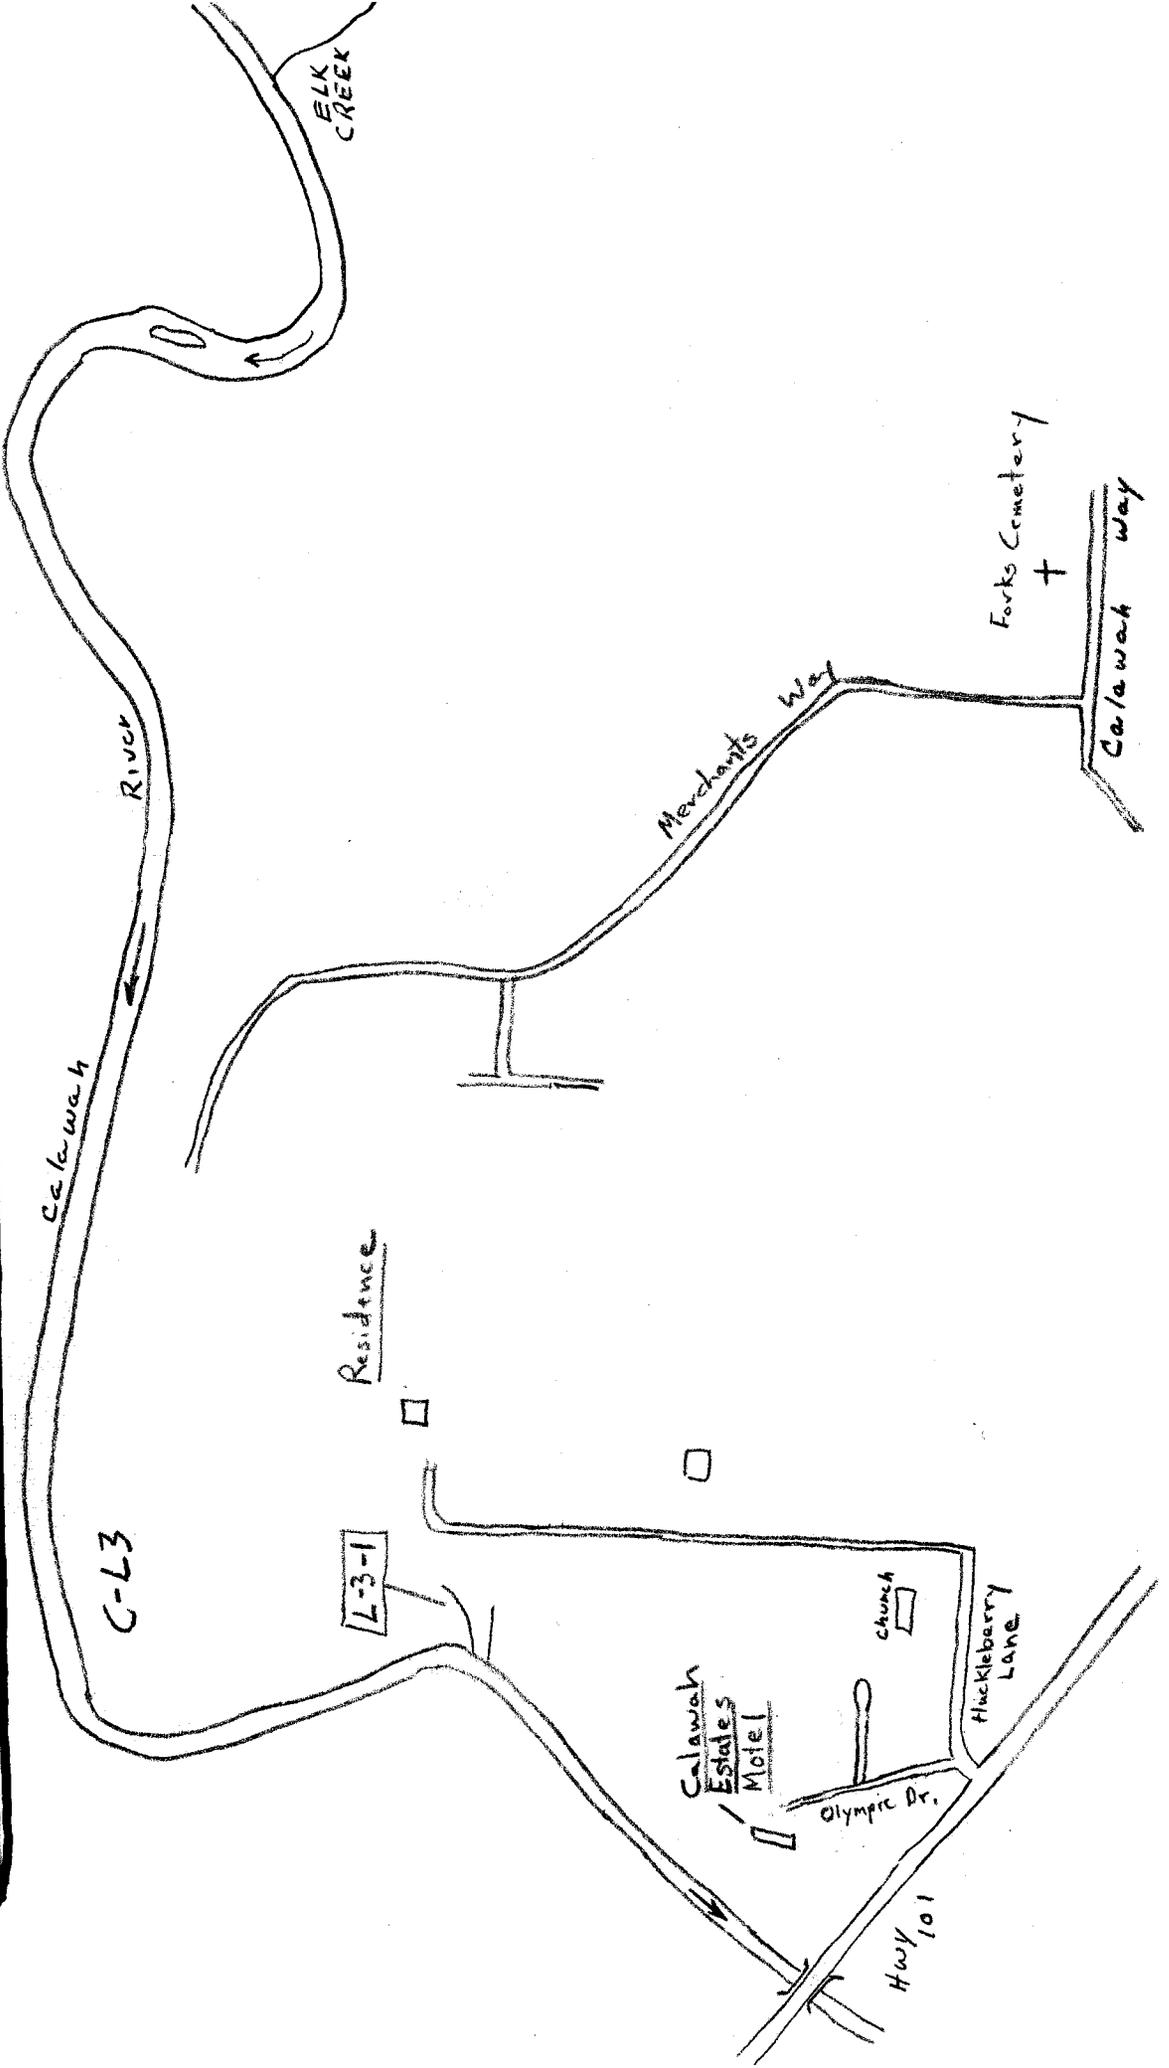

Channel was dry following the recent wet spell. About 5.5" of rain has fallen so far this month.

Entered site C-L3-01 from the road into the private residence (i.e the closest vehicle access point). After entering from this route it appears that machinery access would be difficult because of steep terraces between the road and the channel.
