

Spawning habitat conditions: None Poor Fair Good Excellent

Describe spawning habitat: Some small patches of gravel are available in the lower 14 meters but is polluted by a high degree of clay.

Rearing habitat conditions: None Poor Fair Good Excellent

Describe pond and other rearing habitat: The lower 14 meters has good habitat, is low gradient with good pools. From 14 to 46 meters is 8% gradient with a bouldery bottom and a few small silty pools. Stream is very incised. From 46 to the end of access is 8% gradient with a clay bottom. Very little rearing habitat is available in this reach. Site is surrounded by a mixed mature second growth forest that provides a very good overhead canopy

Describe unaccessible habitat:

Wetland type: Bog Marsh Scrub-shrub Forested

Describe:

Flooding potential: Low Medium High

Describe: Site is protected by the mainstem, but the stream appears to have high runoff during storms.

FISH INFORMATION

Site entry condition: Poor Fair Good

Describe: Fish have direct access into the site from Church Creek.

Coho access and use: Juvenile Unknown None Poor Fair Good
Adult Unknown None Poor Fair Good

Describe: Coho use is unknown but use is highly probable by juveniles in the lower end.

Other species access and use: Chum Pink Sockeye Chinook Trout

Describe: Trout were observed as far upstream as 100 meters.

ENHANCEMENT OPPORTUNITIES

Project type: Fencing and planting in the headwater area.

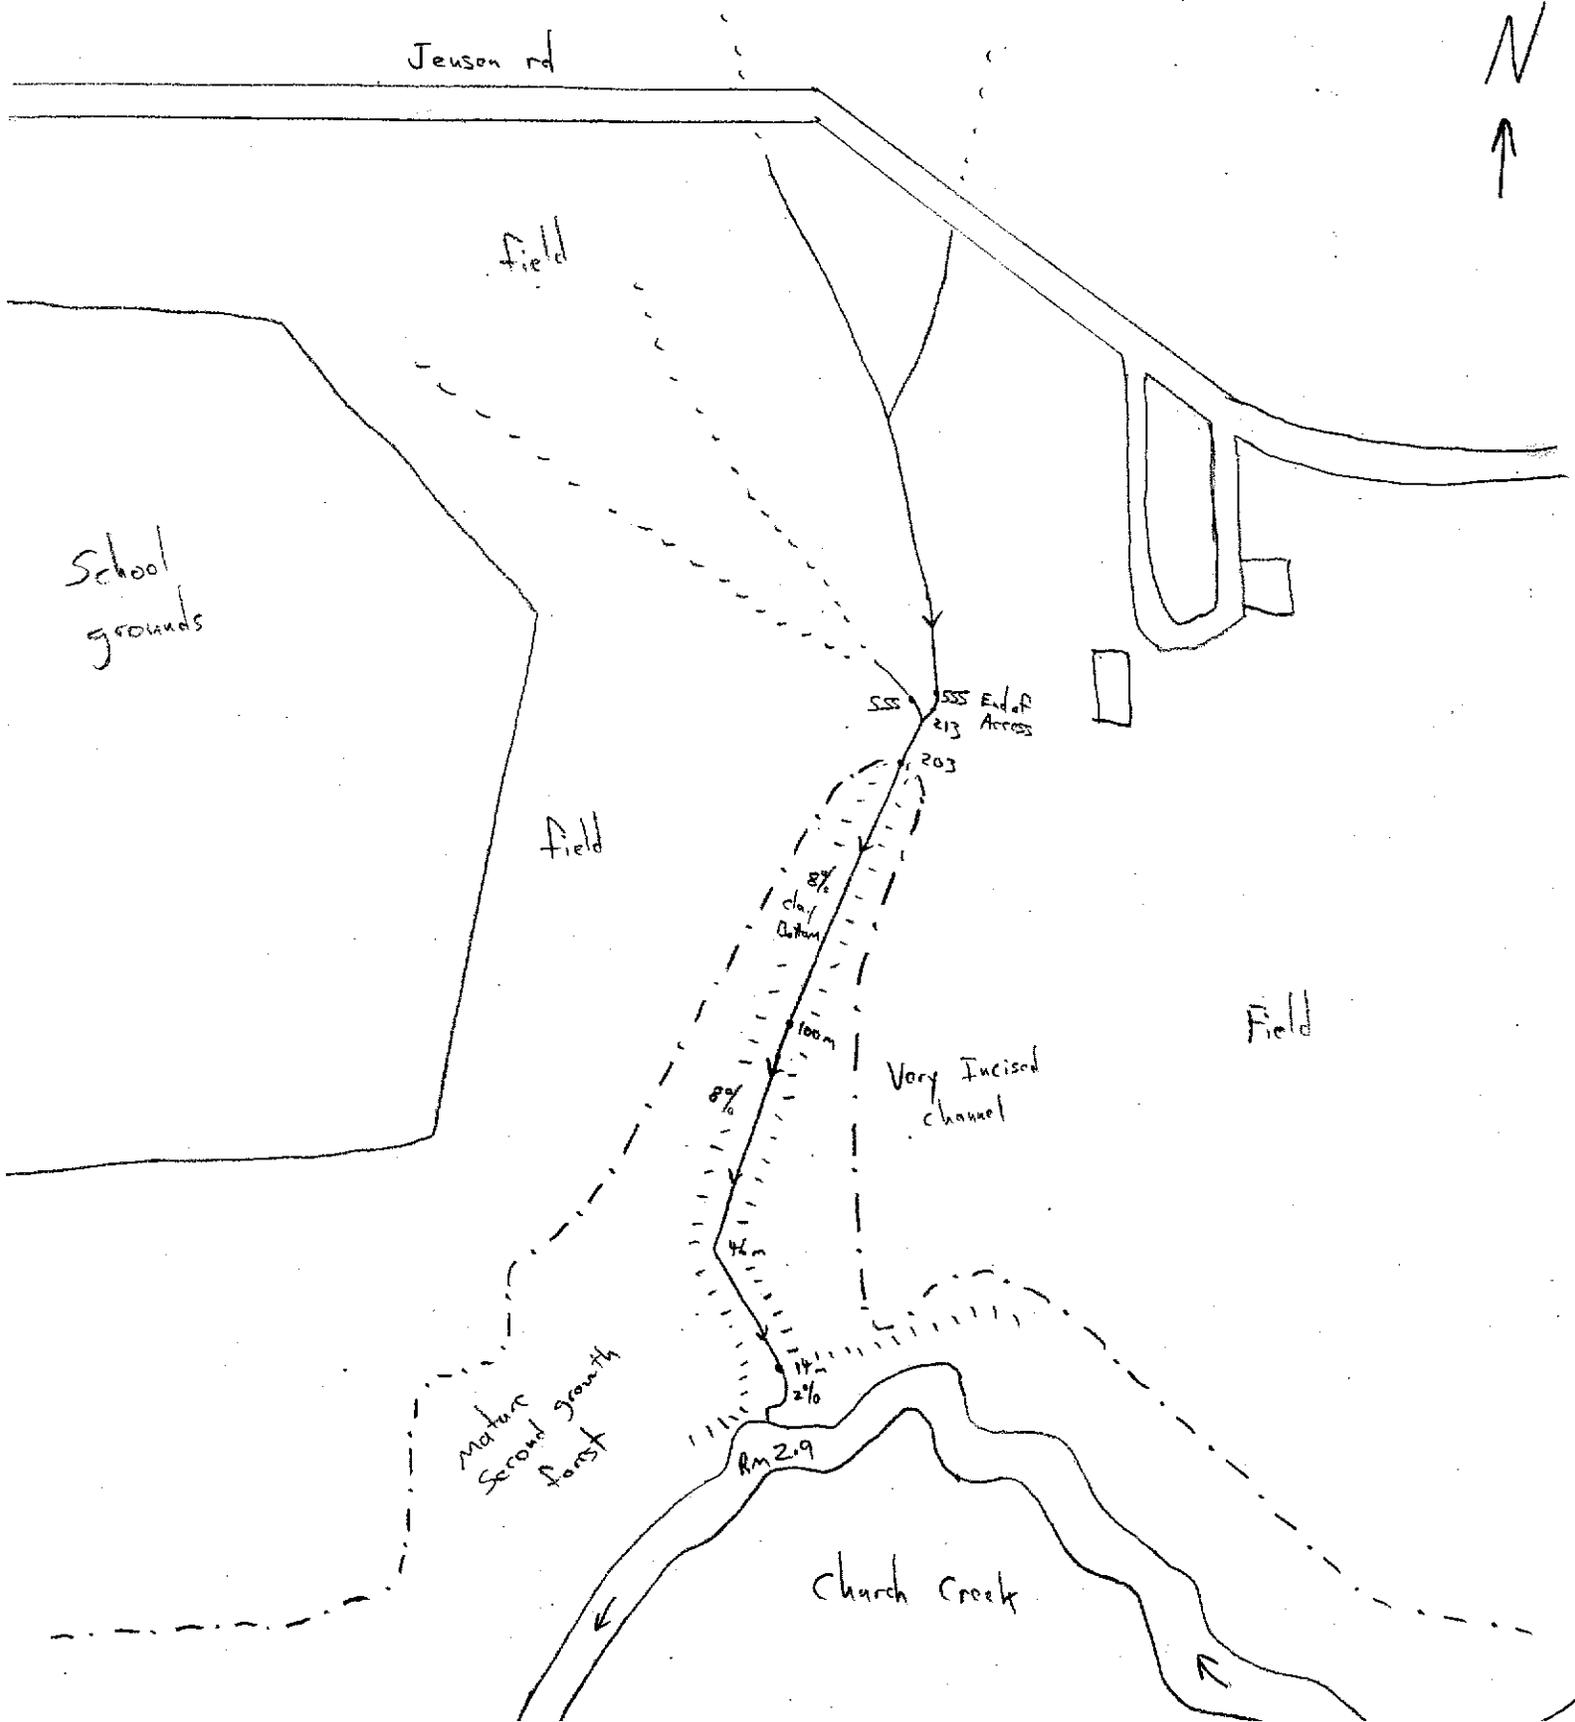

Equipment access: Good

ADDITIONAL COMMENTS: An 18 lot subdivision is planned for the headwater area between where the trib forks and the Jensen Road.
