

**SITE NUMBER:** ED-129L-08

**LOCAL NAME:** Crook Cr.

**WRIA:** 20.01290

**NORTH COAST OFF CHANNEL SITE INVENTORY DATA**

**RIVER SYSTEM:** E. F. Dickey    **DATE:** 2/5/92    **OBSERVER:** Nettnin

**CHANNEL TYPE:** Lower end of a valley wall trib.

**TRIBUTARY TO:** West Branch of E. F. Dickey River (20.0129)

**SITE LOCATION:** L.B. @ R.M. 2.0 (WDF)

**LEGAL DESCRIPTION:** NE1/4 S26 T30N R14W

**UPPER END    LOWER END    20.0129 TEMP**

**WATER TEMP:**            44 F            46 F            45 F

**FLOW (CFS):**            0.3 - 0.5        0.5 - 1.0

**SUBSTRATE TYPE:** Mud.

**SITE SIZE:**    **Length-** Pond and egress = 240 m    Pond = 165 m

**Width-** Water surface = 0.5 - 1 m    Pond = 5 - 12 m

  Channel = 3 - 4 m    Below pond

**Depth-** Avg. = 15 - 25 cm        Max. = 1 m (pond).

**WATER SOURCE:** Springs and valley wall trib.

**DIRECTIONS TO SITE:** Go north from Forks on Hwy 101 about 8.4 mi. then turn left at the Lake Pleasant Grocery Store (0.4 mi. north of MP 200) onto Lake Pleasant Rd. Stay on the main road going past the community park and across the Lake Cr. bridge. Turn right and continue up the county road (along the n.w. shore of the lake) to the end of the pavement. This road then becomes the 9000 line. Continue on the 9000 another 6.0 mi. (going past junctions with the 9300 & 6000 lines) until coming to a new (c. 1990) concrete bridge. Continue on the 9000 (going past the 9400) about 0.5 mi. until the mainline makes a hard left at the junction with the 9500 (Beaver's Corner). Continue on the 9000 (traveling south-west) for another 2.9 mi. to a wooden bridge across the E.F. Dickey. Cross the bridge and continue another 1.8 mi. then turn right onto the 9009 spur road. Continue on the 9009 about 0.1 miles to a bridge cross-ing trib. 20.129. ED-129-08 enters 20.0129 just above the bridge.

**FISH ACCESS AND CURRENT USE:** A 2 m high beaver dam in 20.0129, a short distance below the mouth of ED-129L-08, appears to restrict access. Fish appear to have unrestricted access throughout the lower 75 m reach of ED-129L-08 (the mouth up to a 1 m high beaver dam). No fish observed.

**FLOODING POTENTIAL:** Low.

**LANDOWNER:** Unknown at this time (probably ITT Rayonier).

**COMMENTS & RECOMMENDATIONS:** Water in ED-129L-08 originates on the valley wall, then plunges down the terrace face onto a bench. On the bench it passes through a wetland that is created in part by beaver activity.

**RIVER SYSTEM:** E. F. Dickey    **DATE:** 2/5/92    **OBSERVER:** Nettnin

**COMMENTS & RECOMMENDATIONS:** (continued)

Water then flows along the access road as it drops down to the next terrace. Here it enters a beaver pond and is joined by a trib that drains another marshy area. The channel then meanders down through another small terrace and joins 20.0129.

Since the adjacent ground has recently been clearcut, there is little shade along ED-129L-08. Young alder and salmonberry provide what little shade is found.

A set of controls can be built at the lower beaver dam to maintain the pond and perhaps provide spawning habitat.

**DATE:** 3/13/97

**OBSERVER:** Darrow

**MINNOW TRAPPING REPORT**

| TRAP           | DATE SET | TEMP  | DATE PULLED | TEMP  | COHO | CATCH |      |    | COTTID |
|----------------|----------|-------|-------------|-------|------|-------|------|----|--------|
|                |          |       |             |       |      | RBT   | CUTT | 0+ |        |
| 1              | 3/11     | 3.6°C | 3/13        | 3.4°C | 3    | 0     | 0    | 0  | 7      |

| 3              | 3/11     | 3.6°C | 3/13        | 3.4°C | 0    | 0     | 0    | 0  | 12     |
| 4              | 3/11     | 3.6°C | 3/13        | 3.4°C | 0    | 0     | 0    | 0  | 0      |
| 5              | 3/11     | 3.6°C | 3/13        | 3.4°C | 0    | 0     | 0    | 0  | 7      |
| 6              | 3/11     | 3.6°C | 3/13        | 3.4°C | 4    | 0     | 1    | 0  | 5      |
| <b>TOTALS:</b> |          |       |             |       | 7    | 0     | 2    | 0  | 37     |

**COMMENTS:**

-Trap 1 was placed about 25-30 m upstream of the 9009 spur road culvert (just beyond the "Y" - north fork).

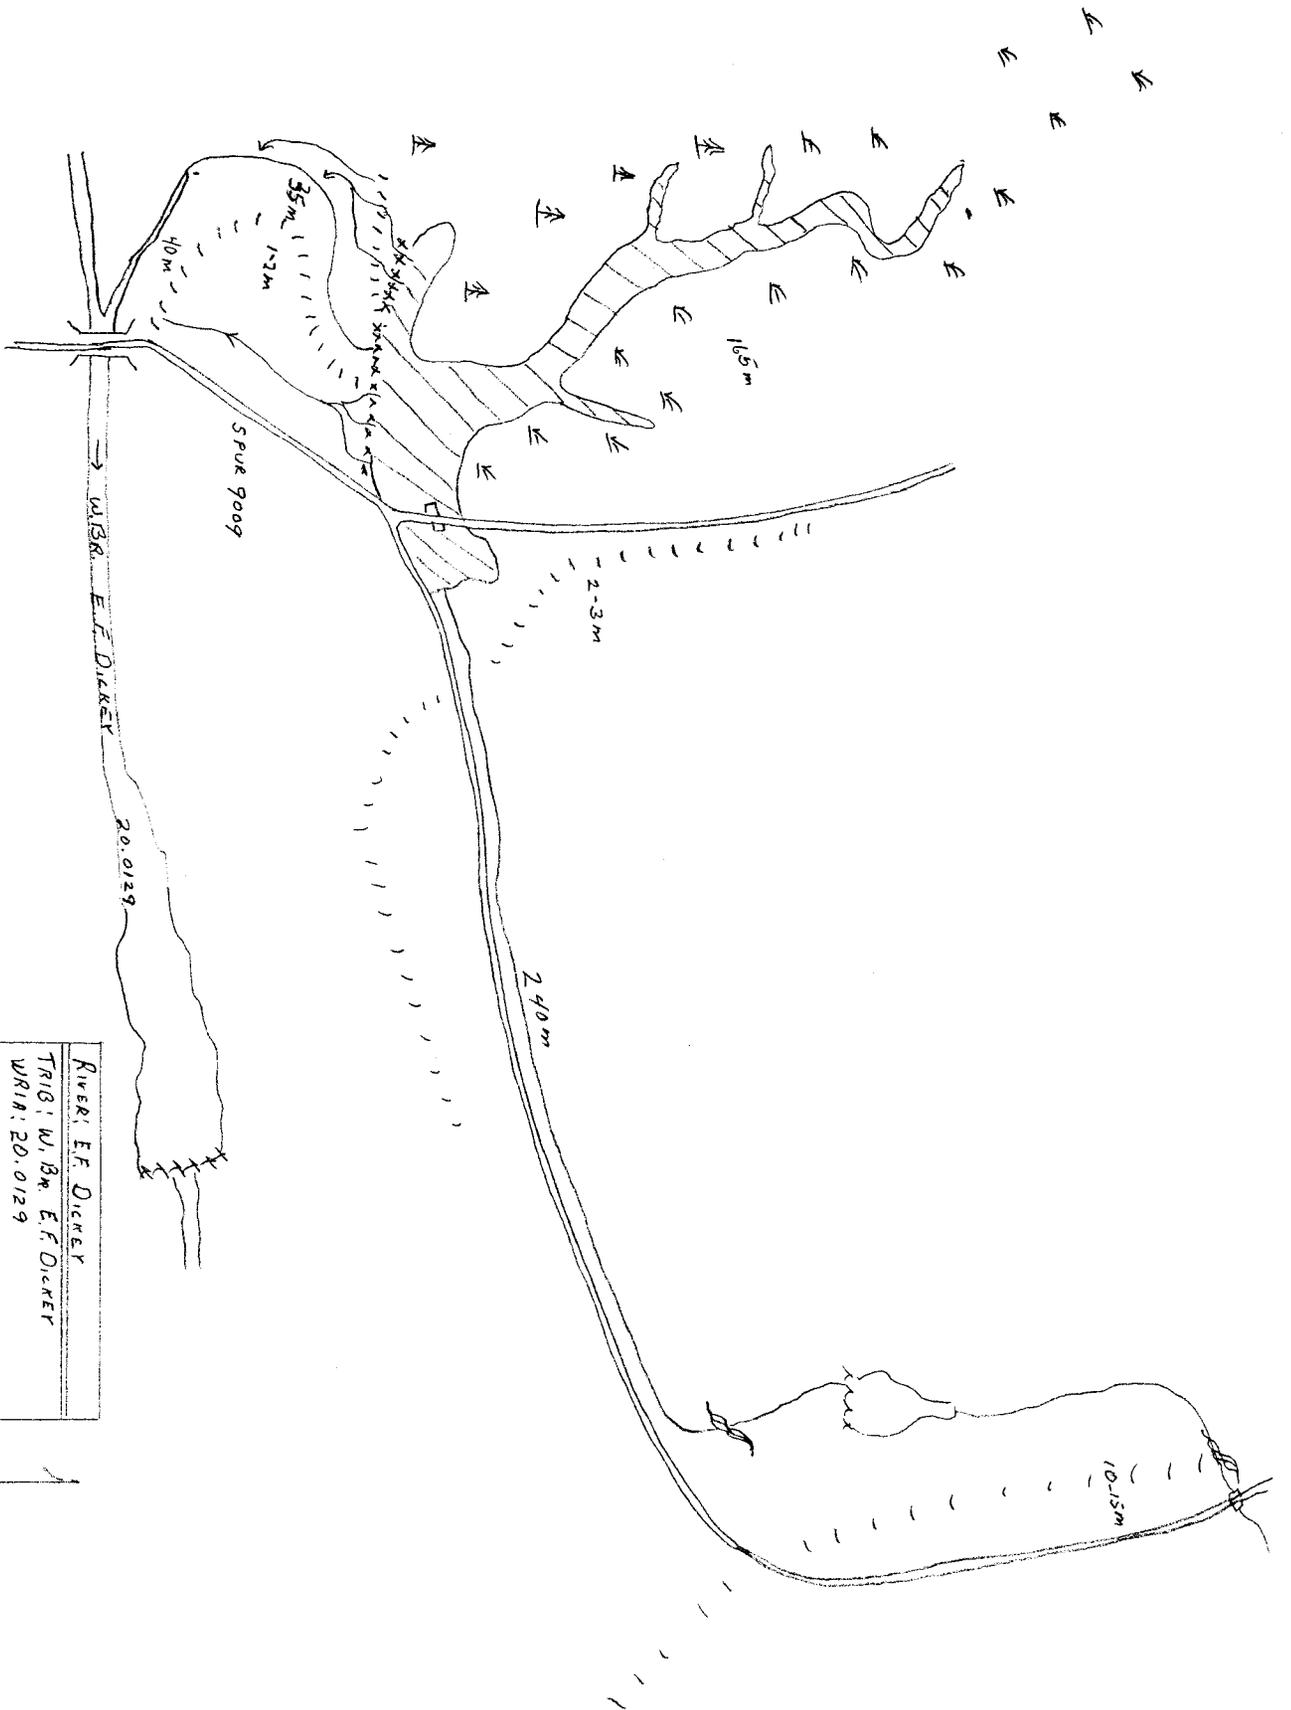

-Trap 2 was placed in upper portion of the logged marsh, parallel to the 9009 spur road.

-Trap 3 was placed downstream from trap #2, 6-7 m above old beaver dam.

-Trap 4 was placed below old beaver dam.

-Trap 5 was placed upstream, parallel to the 9009 spur road (east direction).

-Trap 6 was placed upstream of trap #5, ~100 feet from where road begins a 7-10% climb uphill.
