

SITE NUMBER: ED-129R-01
LOCAL NAME: Unnamed
WRIA: 20.0129B

NORTH COAST OFF CHANNEL SITE INVENTORY DATA

RIVER SYSTEM: E. F. Dickey **DATE:** 4/12/91 **OBSERVER:** Nettnin

CHANNEL TYPE: Valley wall tributary

TRIBUTARY TO: West Branch of E. F. Dickey River (20.0129)

SITE LOCATION: R.B. @ R.M. 0.5 (WDF)

LEGAL DESCRIPTION: NW1/4 S30 T30N R13W

	UPPER END	LOWER END	20.0129
WATER TEMP:	41 F	41 F	43 F
FLOW (CFS):	< 0.1	0.1 - 0.2	

SUBSTRATE TYPE: Silt.

SITE SIZE: **Length-** 280 m
 Width- Water surface = 0.5 - 1 m
 Channel = 1 - 2 m
 Depth- Avg. = 4 - 6 cm Max. = 15 cm

WATER SOURCE: Springs and valley wall runoff.

DIRECTIONS TO SITE: Go north from Forks on Hwy 101 about 8.4 mi. then turn left at the Lake Pleasant Grocery Store (0.4 mi. north of MP 200) onto Lk Pleasant Rd. Stay on the main road going past the community park and across the Lake Cr. bridge. Turn right and continue up the county road (along the n.w. shore of the lake) to the end of the pavement. This road then becomes the 9000 line. Continue on the 9000 another 6.0 mi. (going past junctions with the 9300 & 6000 lines) until coming to a new (c. 1990) concrete bridge. Continue on the 9000 (going past the 9400) about 0.5 mi. until the mainline makes a hard left at the junction with the 9500 (Beaver's Corner). Continue on the 9000 (traveling s.w.) for another 2.9 mi. to a bridge crossing the E.F. Dickey. Continue another 0.4 mi. to mile post 12. The 9000 road crosses ED-129L-02 about 0.3 mi. beyond (west of) m.p. 12. Walk downstream along ED-129L-02 to its mouth. Cross 20.0129 and continue downstream about 0.1 mile to the lower of two small right bank tributaries. This lower trib is ED-129R-01.

FISH ACCESS AND CURRENT USE: Fish appear to have unrestricted access. No fish were observed.

FLOODING POTENTIAL: Low.

LANDOWNER: Unknown at this time (possibly DNR).

COMMENTS & RECOMMENDATIONS: ED-129R-01 is still rehabilitating from the first logging of the surrounding area. There is a good sized LOD jam near the mouth of the channel. A good flow of water under this jam suggests that it does little to restrict fish movement.

The lowermost reach of ED-129R-01 may provide some winter refuge area and a limited amount of rearing habitat. The middle reach appears to be mostly transport water but it may also provide a limited amount of rearing habitat.

WRIA: 20.0129B

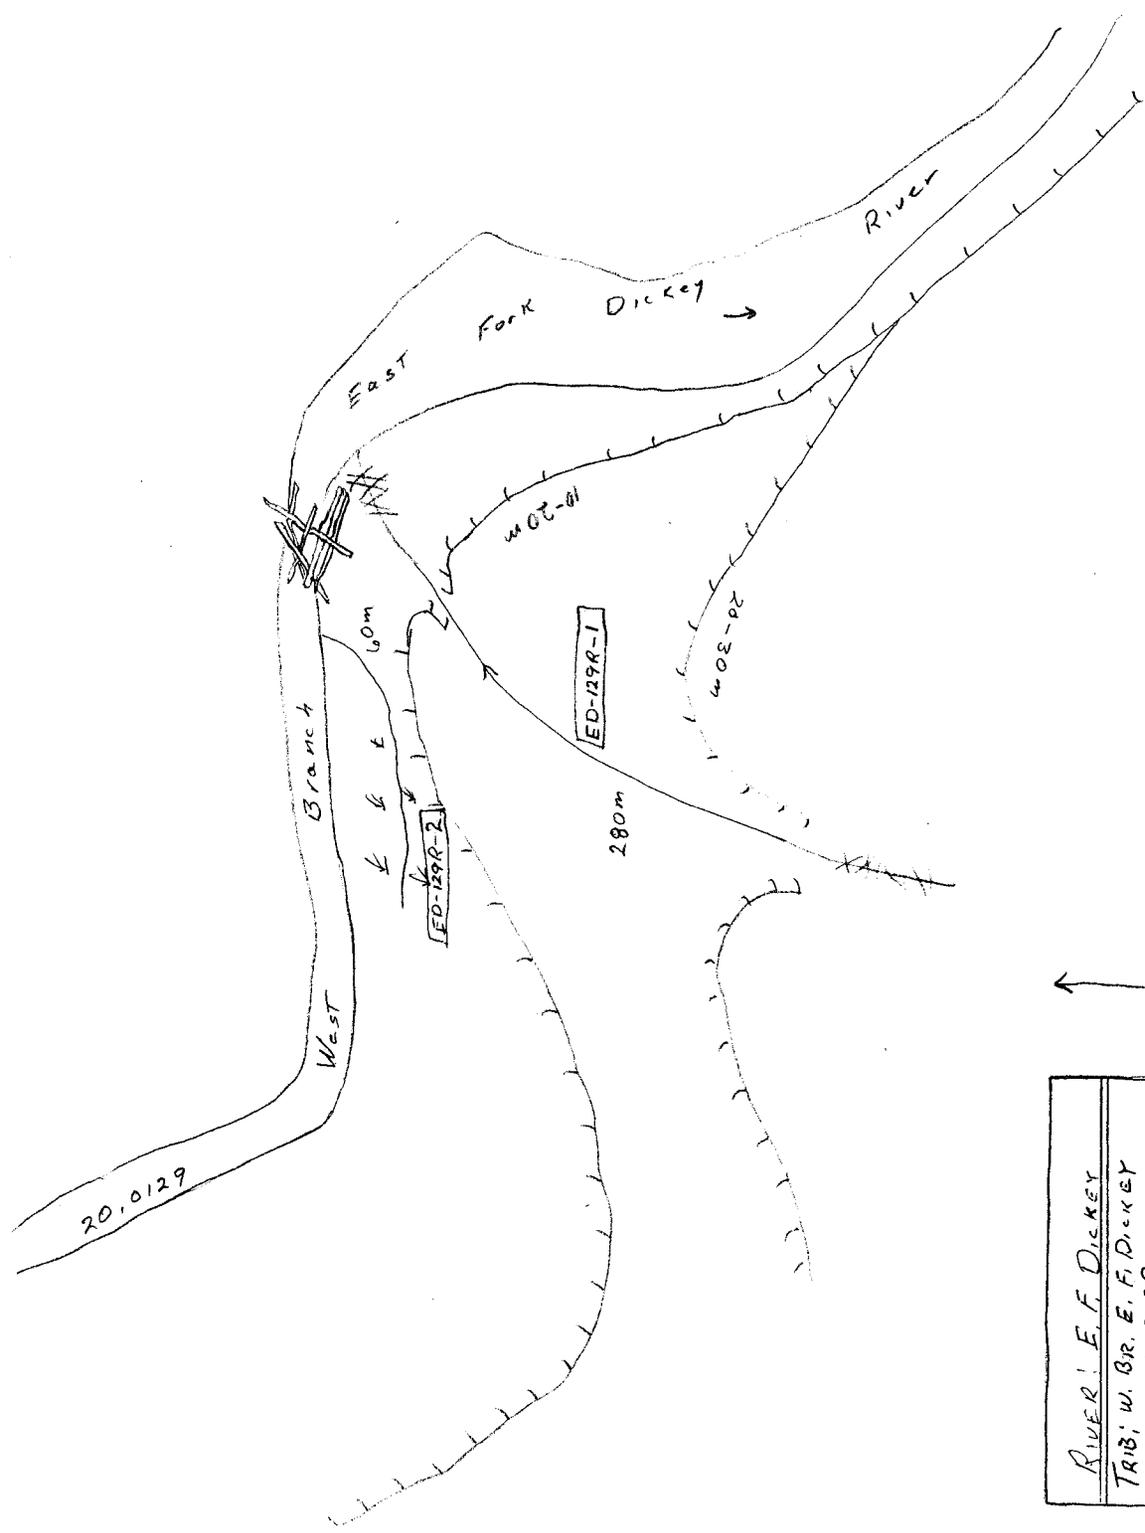

NORTH COAST OFF CHANNEL SITE INVENTORY DATA

RIVER SYSTEM: E. F. Dickey **DATE:** 4/12/91 **OBSERVER:** Nettnin

COMMENTS & RECOMMENDATIONS: (continued)

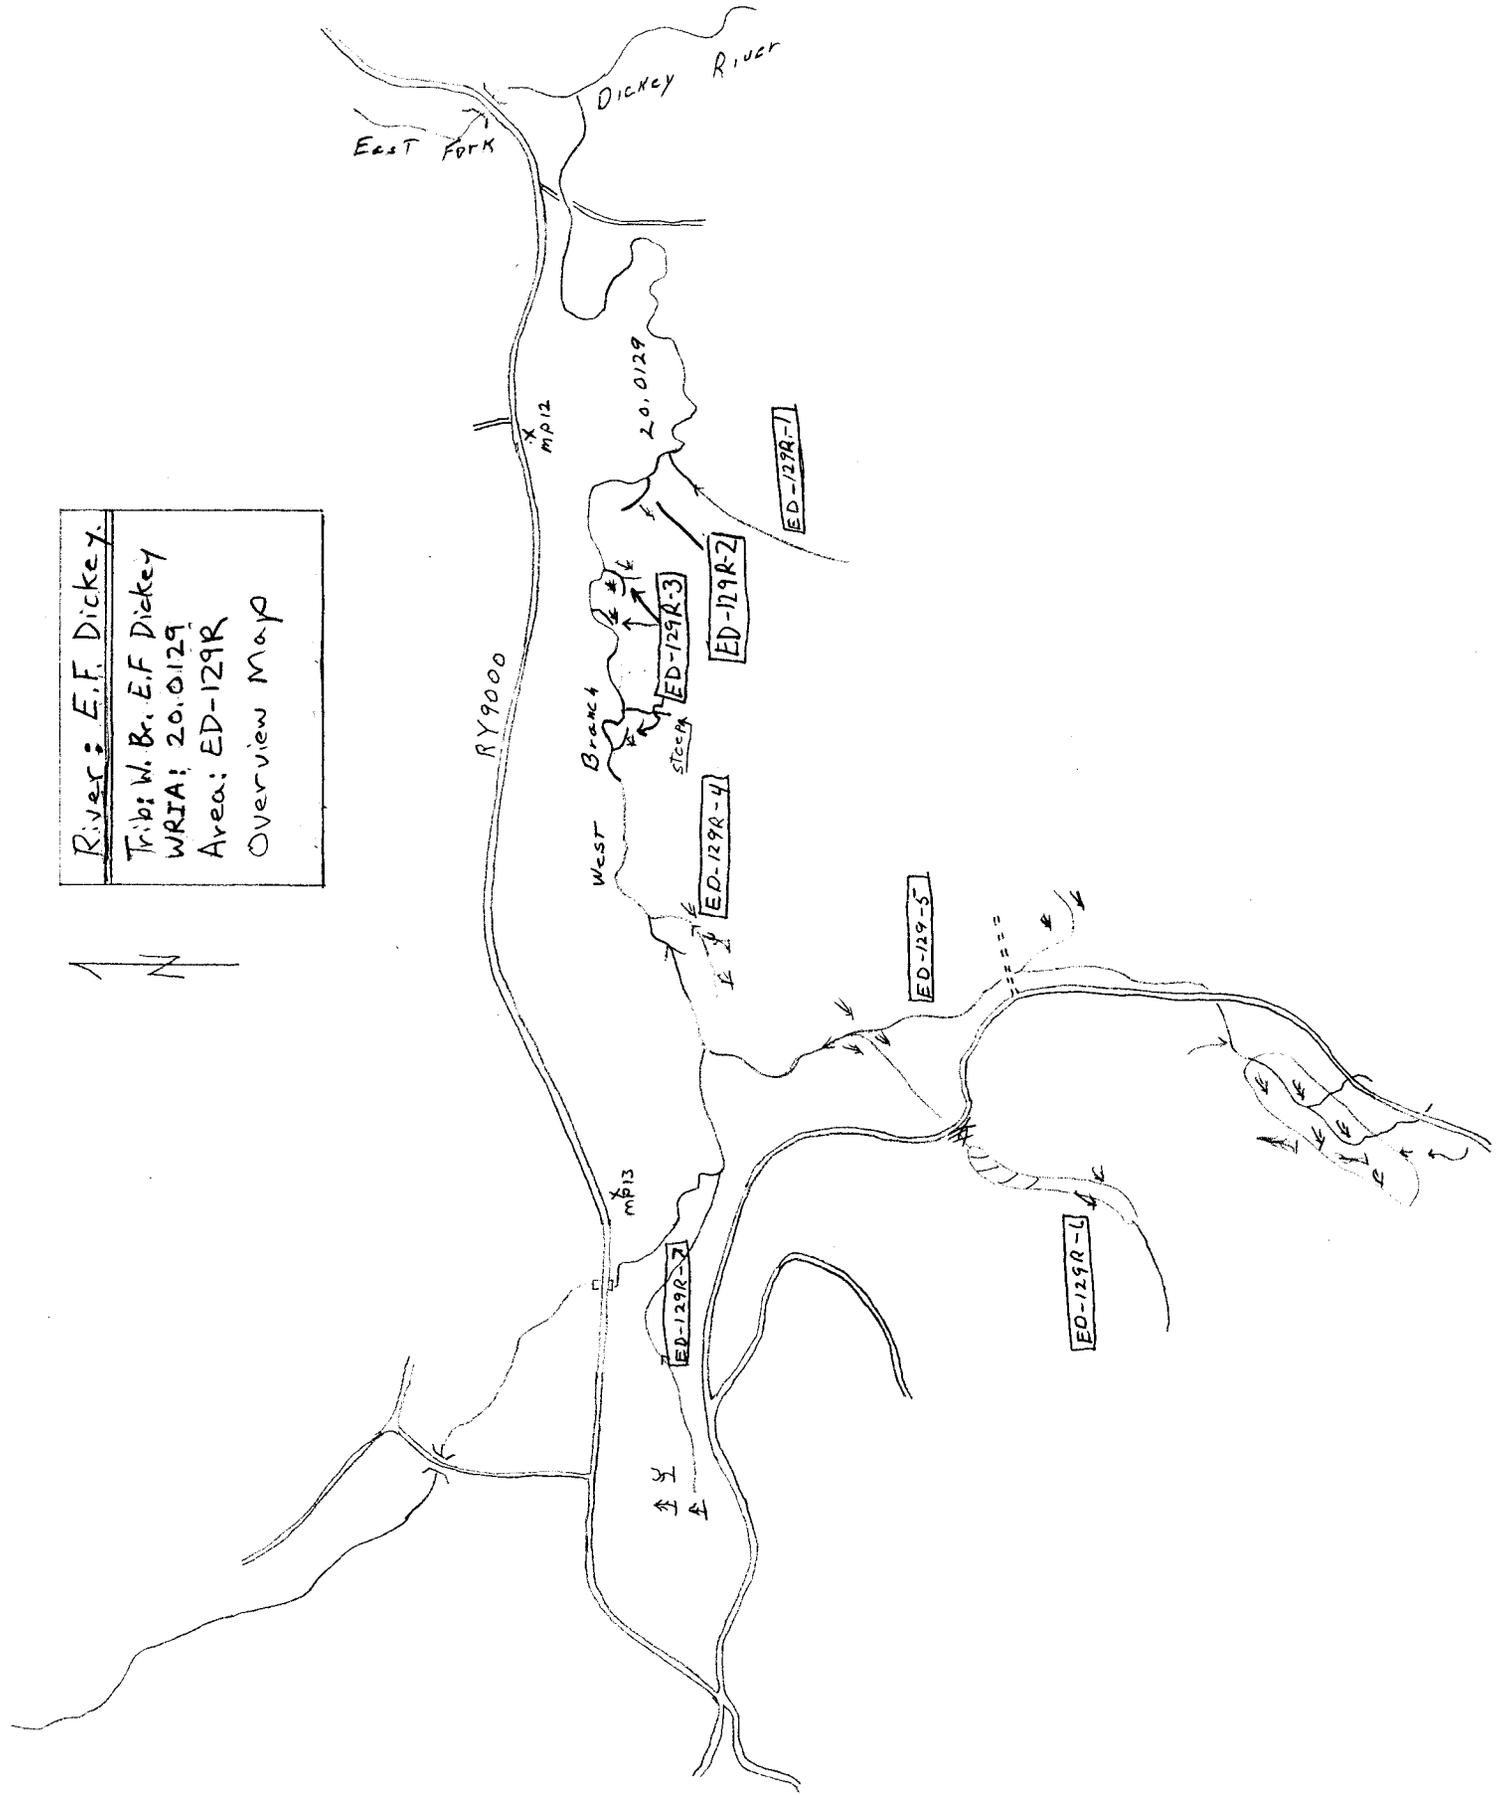

Woody debris situated about 300 m above the mouth of ED-129R-01 appears to inhibit fish movements during low and moderate flows. Shade along the channel is provided primarily by 20 year old conifer with younger alder in the middle reach.

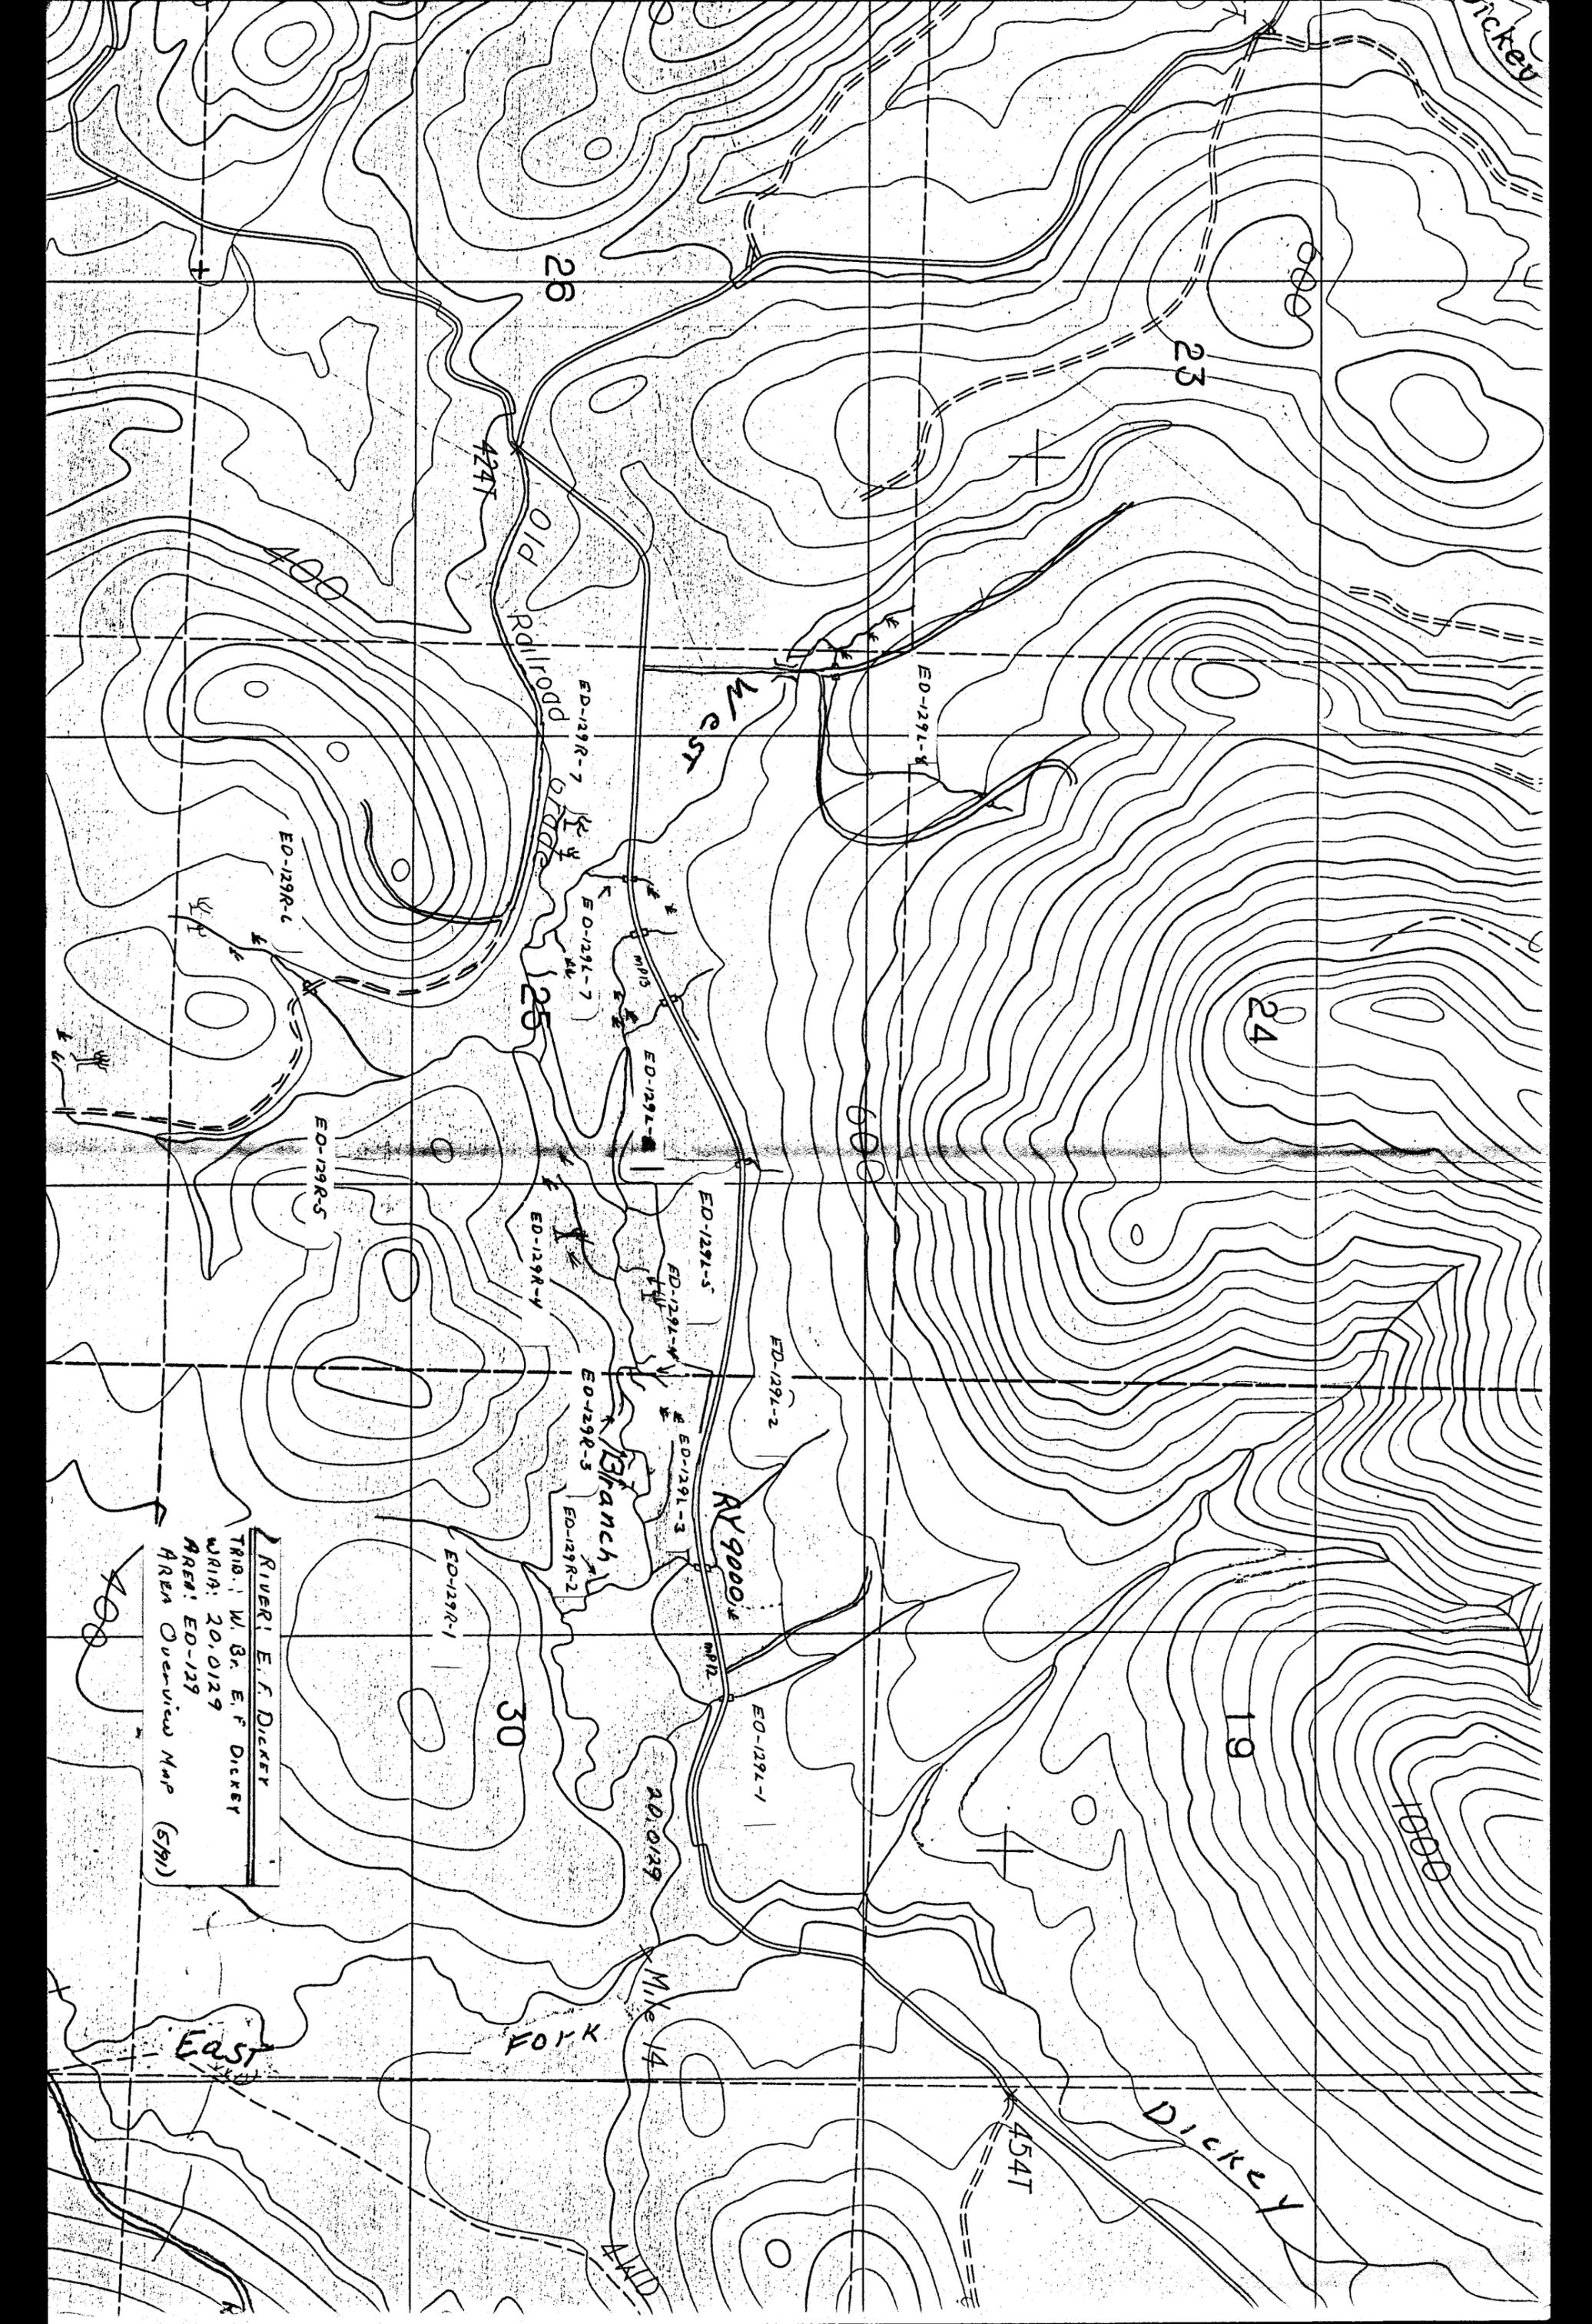

Installation of controls along the lower reaches of ED-129R-01 would enhance the rearing habitat of those reaches.
