

SITE NUMBER: H-R2-03

LOCAL NAME: Unnamed

WRIA: 20.04241

NORTH COAST OFF CHANNEL SITE INVENTORY DATA

RIVER SYSTEM: Hoh River **DATE:** 6/4/87 **OBSERVER:** Young/Nettnin

CHANNEL TYPE: Valley Wall Tributary

TRIBUTARY TO: Hoh River

SITE LOCATION: RB @ River Mile 2.0

LEGAL DESCRIPTION:

UPPER END LOWER END

WATER TEMP.: 57° 57°

DISSOLVED OXYGEN: 15 mg/l 15 mg/l

AIR TEMP.: 64° 64°

FLOWS (CFS): 0.5 0.5

SUBSTRATE TYPE: Gravel, sand and silt.

SITE SIZE: Length- 200 m
 Width- 1-2 m
 Depth- 3"

WATER SOURCE: Valley wall trib. Possibly spring fed.

DIRECTIONS TO SITE: West on Oil city road approx. 8 miles. Mouth of channel is found just upstream of a primitive boat launch area.

FISH ACCESS AND CURRENT USE: Fish have access to lower 100 m of stream. A few unidentified fry were observed.

FLOODING POTENTIAL: Low

LANDOWNER:

COMMENTS & RECOMMENDATIONS: It appears that water may become silty during high flows. This stream is accessed by cattle. A small wall based channel occurs just north and west of this stream. This is currently a muddy depression. At high flow periods this may serve as an overflow channel to the measured stream. Channel length = 150 m.

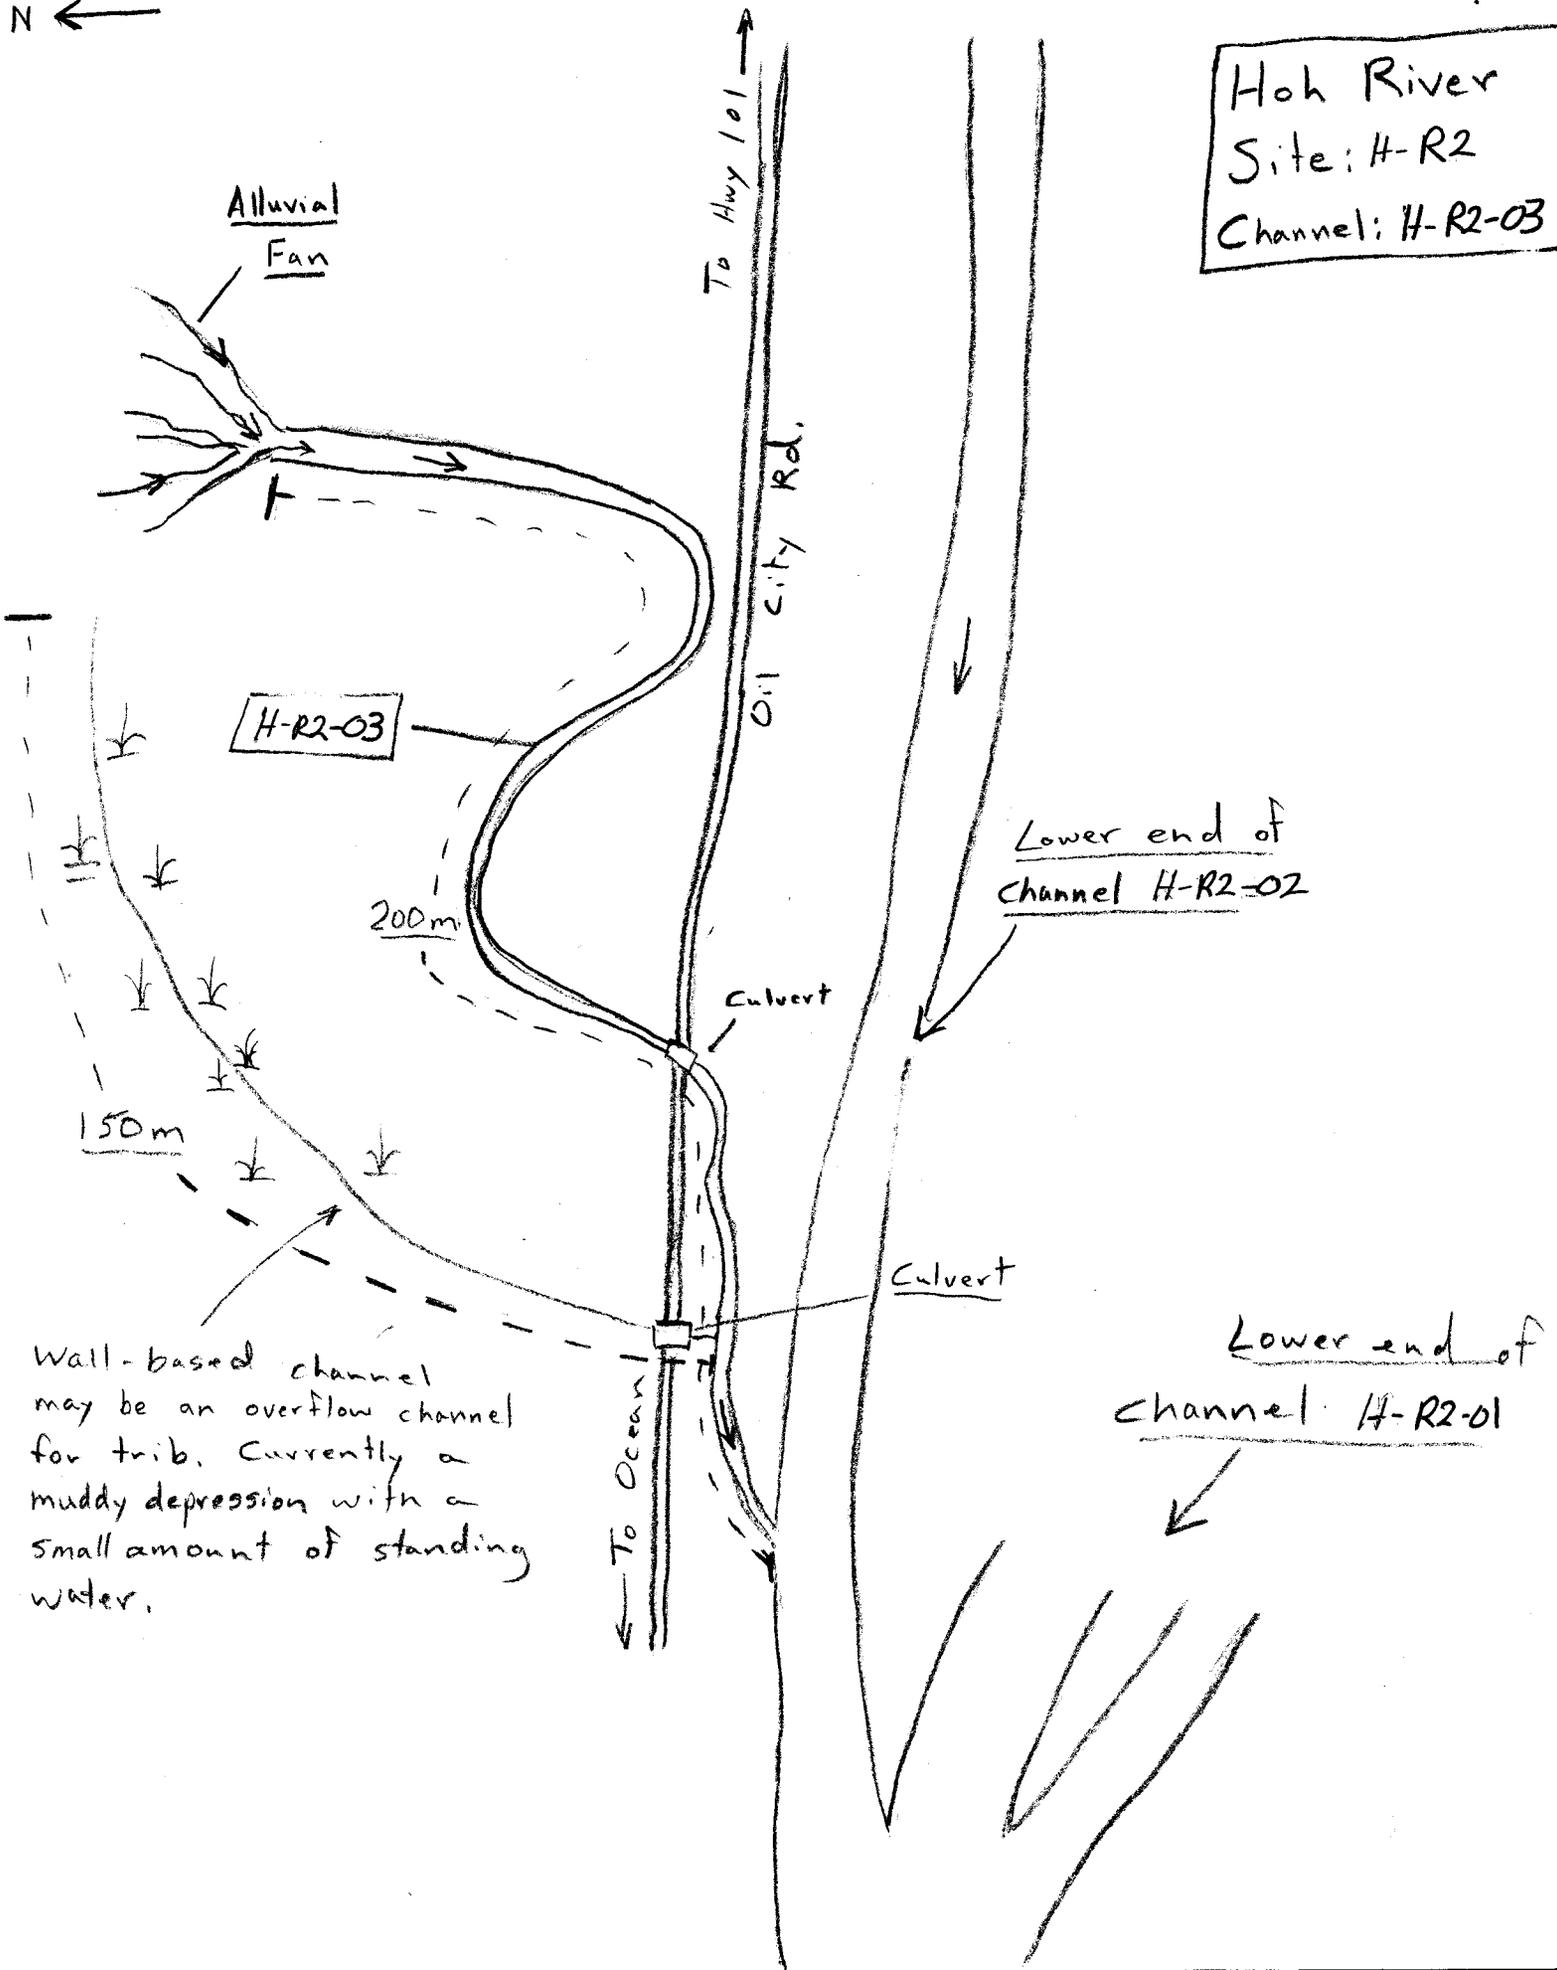

DATE: 12/10/87

OBSERVER:

Channel water temp. = 7.5°. The flow was 2 ft higher two days ago when the Hoh was at its highest level of this fall. This tributary has very low potential for enhancement due to the alluvial fan it exits the terrace on. The water spreads out quite a bit and it appears that a lot of material moves off of the terrace.
