

Total existing habitat area (est.): 5,000 m²

Spawning area: 0

Impounded area: 5,000 m²

Other rearing area: 0

Spawning Habitat conditions: (X) None () Poor () Fair () Good () Excellent

Describe spawning habitat: NA

Rearing habitat conditions: () None () Poor () Fair () Good (X) Excellent

Describe pond and other rearing habitat:

- The pond and wetland edge is 10 - 50 m wide and about 300 m at the longest point.
- It is about 1 m deep.
- Tannic water
- Cover is provided by stumps, woody debris and wetland vegetation.

Describe unaccessible habitat: The pond is unaccessible at this time.

Describe wetland: () Bog () Marsh () Scrub-shrub Wetland () Forested Wetland

NA

Flooding potential: (X) Low () Medium () High

Fish Information:

Site entry condition to (Swanson Creek 20.0312): (X) Poor () Fair () Good

- There are three egresses and none of them have enough flow to cut a passable channel or transport fish.

Coho access and use:

Juvenile- () Unknown (X) None () Poor () Fair () Good

Adult- () Unknown (X) None () Poor () Fair () Good

Other species access and use: () Chum () Pink () Sockeye () Chinook () Trout

- None, No access and appears to go dry in summer time.

Habitat Improvements:

Enhancement opportunities:

Possible project type:

- Monitor pond during summer and winter. If conditions appear suitable, consolidate egresses to increase flow for transportation and attraction.
- Install weir to control pond level
- No equipment access
