

Total existing habitat area (est.): 600 m²

Spawning area: 100 m²

Impounded area: 0 m²

Other rearing area: 500 m²

Spawning Habitat conditions: None Poor Fair Good Excellent

Describe spawning habitat:

- Spawning opportunities are limited to the tailout of pools.
- The stream habitat is more suitable for trout than for coho.

Rearing habitat conditions: None Poor Fair Good Excellent

Describe pond and other rearing habitat:

- There is no pond habitat associated with this channel.
- There are some nice pools and riffles that provide good trout habitat.

Describe unaccessible habitat:

- This stream is unaccessible due to the barrier culvert on Shower Creek.

Describe wetland: Bog Marsh Scrub-shrub Wetland Forested Wetland

- There are no associated wetlands to this channel.

Flooding potential: Low Medium High

- The system is subject to flashy flows from within, not river flooding.

Fish Information:

Site entry condition to (Shower Cr): Poor Fair Good

- The confluence is open and accessible.

Coho access and use:

Juvenile- Unknown None Poor Fair Good

Adult- Unknown None Poor Fair Good

- Coho do not have access past the culvert on Shower Creek.
- Physical characteristics of this stream are not conducive for coho use.

Other species access and use: Chum Pink Sockeye Chinook Trout

- Trout do not have access past the culvert on Shower Creek.

Habitat Improvements:

Enhancement opportunities:

- Possible project type: Plank controls
- Remove or replace culvert on Shower Creek.
 - Maintain the integrity of the stream.
- Equipment access: No access to this creek

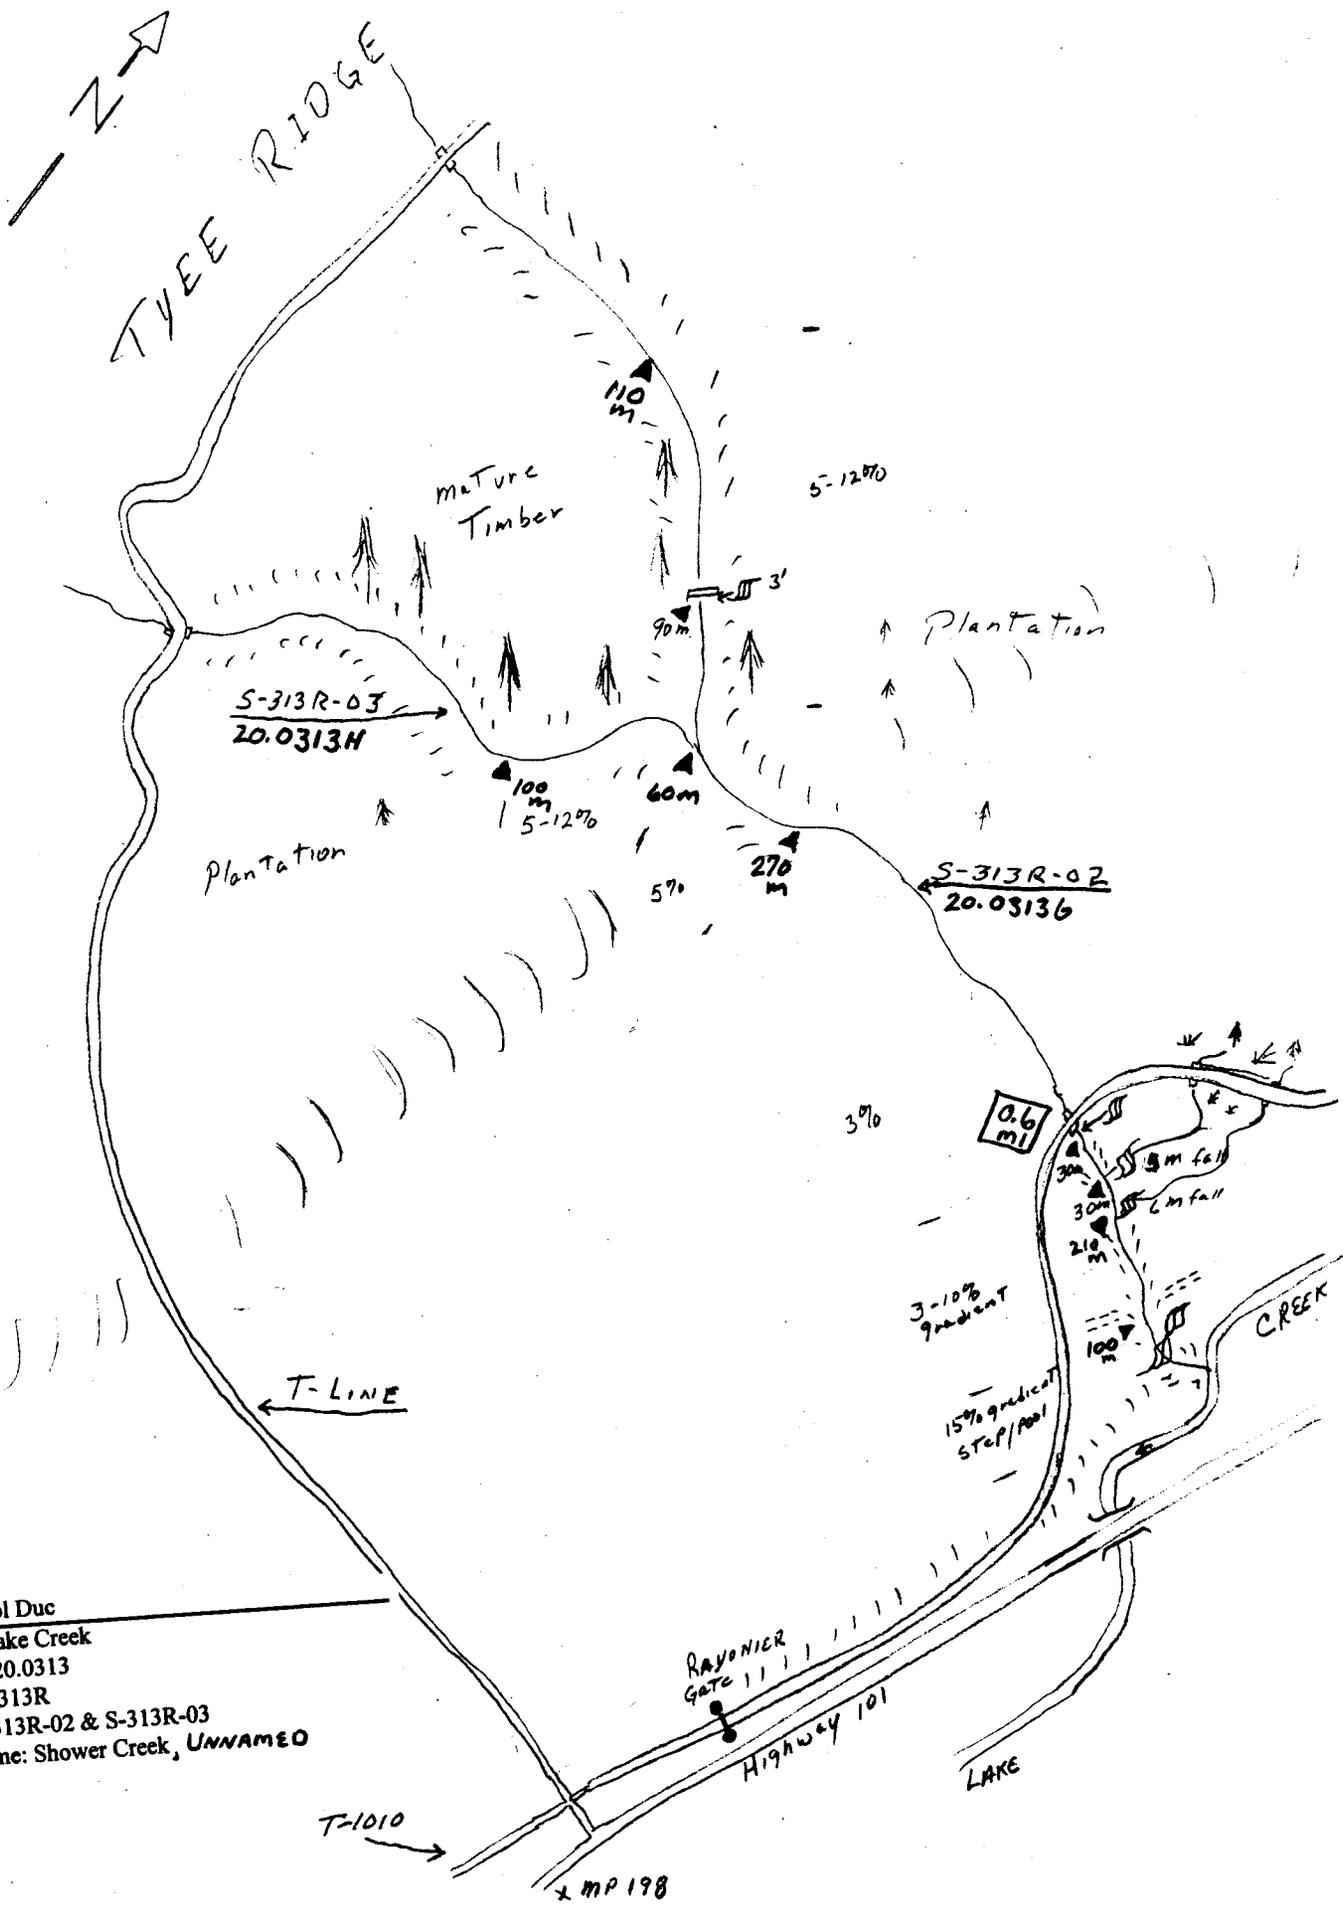

Additional Comments:

- Verbal communications with Chris Byrnes (WDFW habitat Manager): this road is a temporary access and is supposed to be abandoned when timber harvest is completed.
