

Describe spawning habitat:

- There is gravel above the cascade. The stream may not stay watered during hatching time.
- The habitat is favorable to trout.

Rearing habitat conditions: None Poor Fair Good Excellent

Describe pond and other rearing habitat:

- There are some quality pools in the lower reach and slow water on the terrace which can provide winter rearing. The stream may dry up in the summer.
- There is very good overhead shade.
- The channel habitat is favorable to trout.

Describe unaccessible habitat: NA

Describe wetland: Bog Marsh Scrub-shrub Wetland Forested Wetland

- No associated wetlands to this channel

Flooding potential: Low Medium High

Fish Information:

Site entry condition into Rainey Creek: Poor Fair Good

- The egress is into a run of Rainey Cr. It has an immediate gradient of about 12% for about 50 m.

Coho access and use:

- Juvenile- Unknown None Poor Fair Good
- Adult- Unknown None Poor Fair Good
- No fish were observed during the inventory.

Other species access and use: Chum Pink Sockeye Chinook Trout

- No fish were observe. It is assumed that trout use this channel.
- Trout were observed in the mainstem.

Habitat Improvements:

Enhancement opportunities:

- Possible project type
- Maintain the integrity of the channel.

Equipment access: No

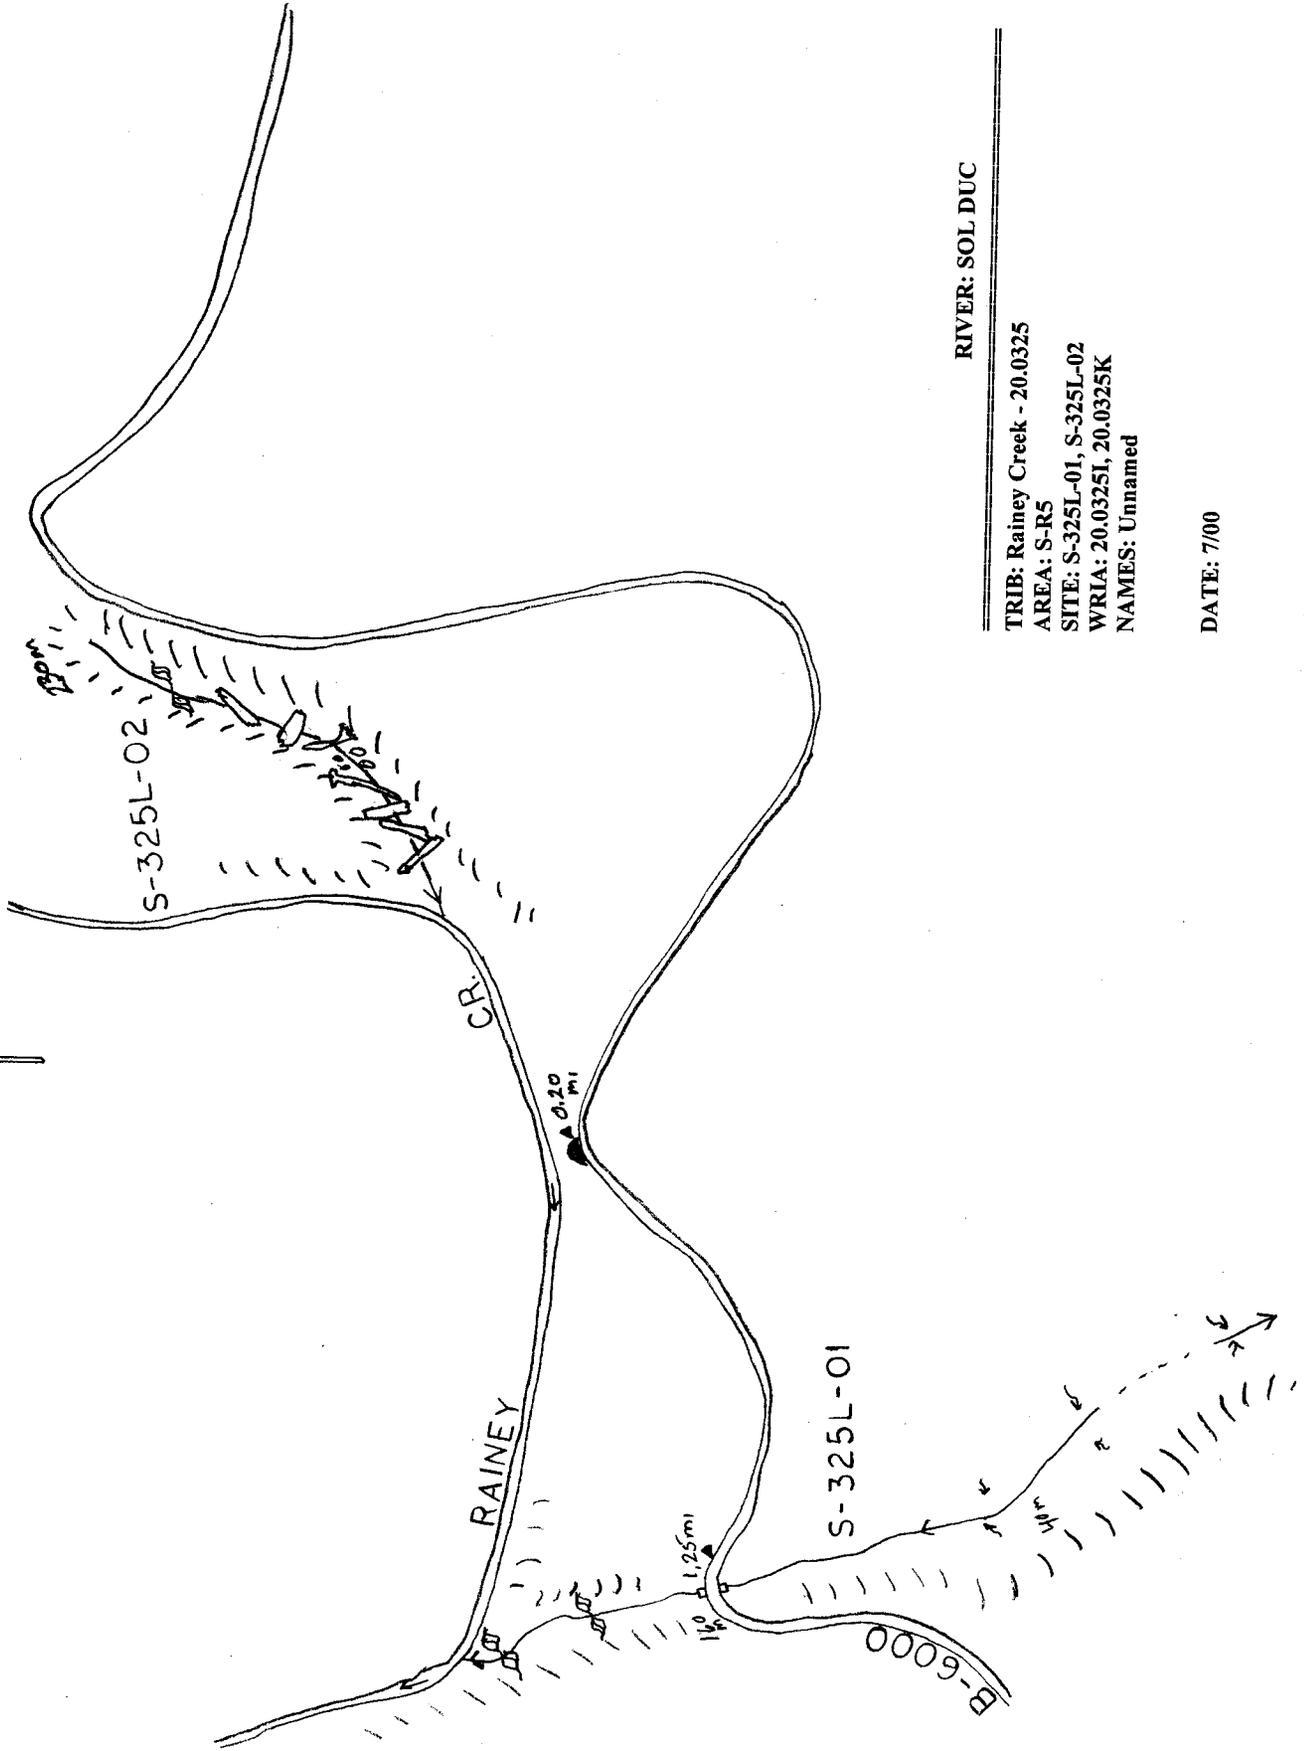

Additional Comments:

- There is a culvert on the B-6000 road that does not appear to be a barrier at this time.
