

**SITE NUMBER:** WD-154R-01

**LOCAL NAME:** Unnamed

**WRIA NO:** 20.0154 A

**NORTH COAST OFF CHANNEL SITE INVENTORY DATA**

**RIVER SYSTEM:** W.F. Dickey **DATE:** 4-20-94 **OBSERVER:** Nettnin

**CHANNEL TYPE:** Terrace Trib

**TRIBUTARY TO:** 20.0154

**SITE LOCATION:** RB @ RM: 0.3 (field measurement)

**LEGAL DESCRIPTION:** NW¼, SEC 03, T30N, R14W

	<b>UPPER END</b>	<b>LOWER END</b>	<b>LAKE TEMP</b>
<b><u>WATER TEMP:</u></b>	12.5° C	12.5° C	9.5° C

<b><u>FLOW:</u></b>	20 - 30 gpm	40 - 50 gpm	
---------------------	-------------	-------------	--

**SUBSTRATE TYPE:** Mud/silt

**SITE SIZE:**     **Length-** 340 m  
                  **Width-** Water surface = 1.0 - 2.0 m  
                          Channel = 1.0 - 2.0 m (numerous smaller channels in marsh)  
                          Marsh width = ~19 m  
                  **Depth-** 30 - 60 cm                   **max-** 90 cm

**WATER SOURCE:** Springs/marsh

**DIRECTIONS TO SITE:** Go north from Forks on Hwy 101 about 8.4 mi. then turn left at the Lake Pleasant Grocery Store (0.4 mi. north of MP 200) onto Lake Pleasant Rd. Stay on the main road going past the community park and across the Lake Cr. bridge. Turn right and continue up the county road (along the N.W. shore of the lake) to the end of the pavement. This road then becomes the 9000 line. Continue on the 9000 for 16.5 mi. to a gate (just past the jct of the D-5000, an R-2 key is required to get through the gate. The key can be acquired at the Rayonier Inc office). Continue through the gate for 2.6 mi. Turn left onto 16E road for 0.6 mi. (the road is ditched at the bridge). There is a large marsh to the south. WD-154R-01 drains this northern portion.

**FISH ACCESS AND CURRENT USE:** Fish have restricted access due to beaver dams. Attraction is poor due to low flows and Reed Canary Grass choking the channels. No fish were observed in the channel.

**FLOODING POTENTIAL:** Low

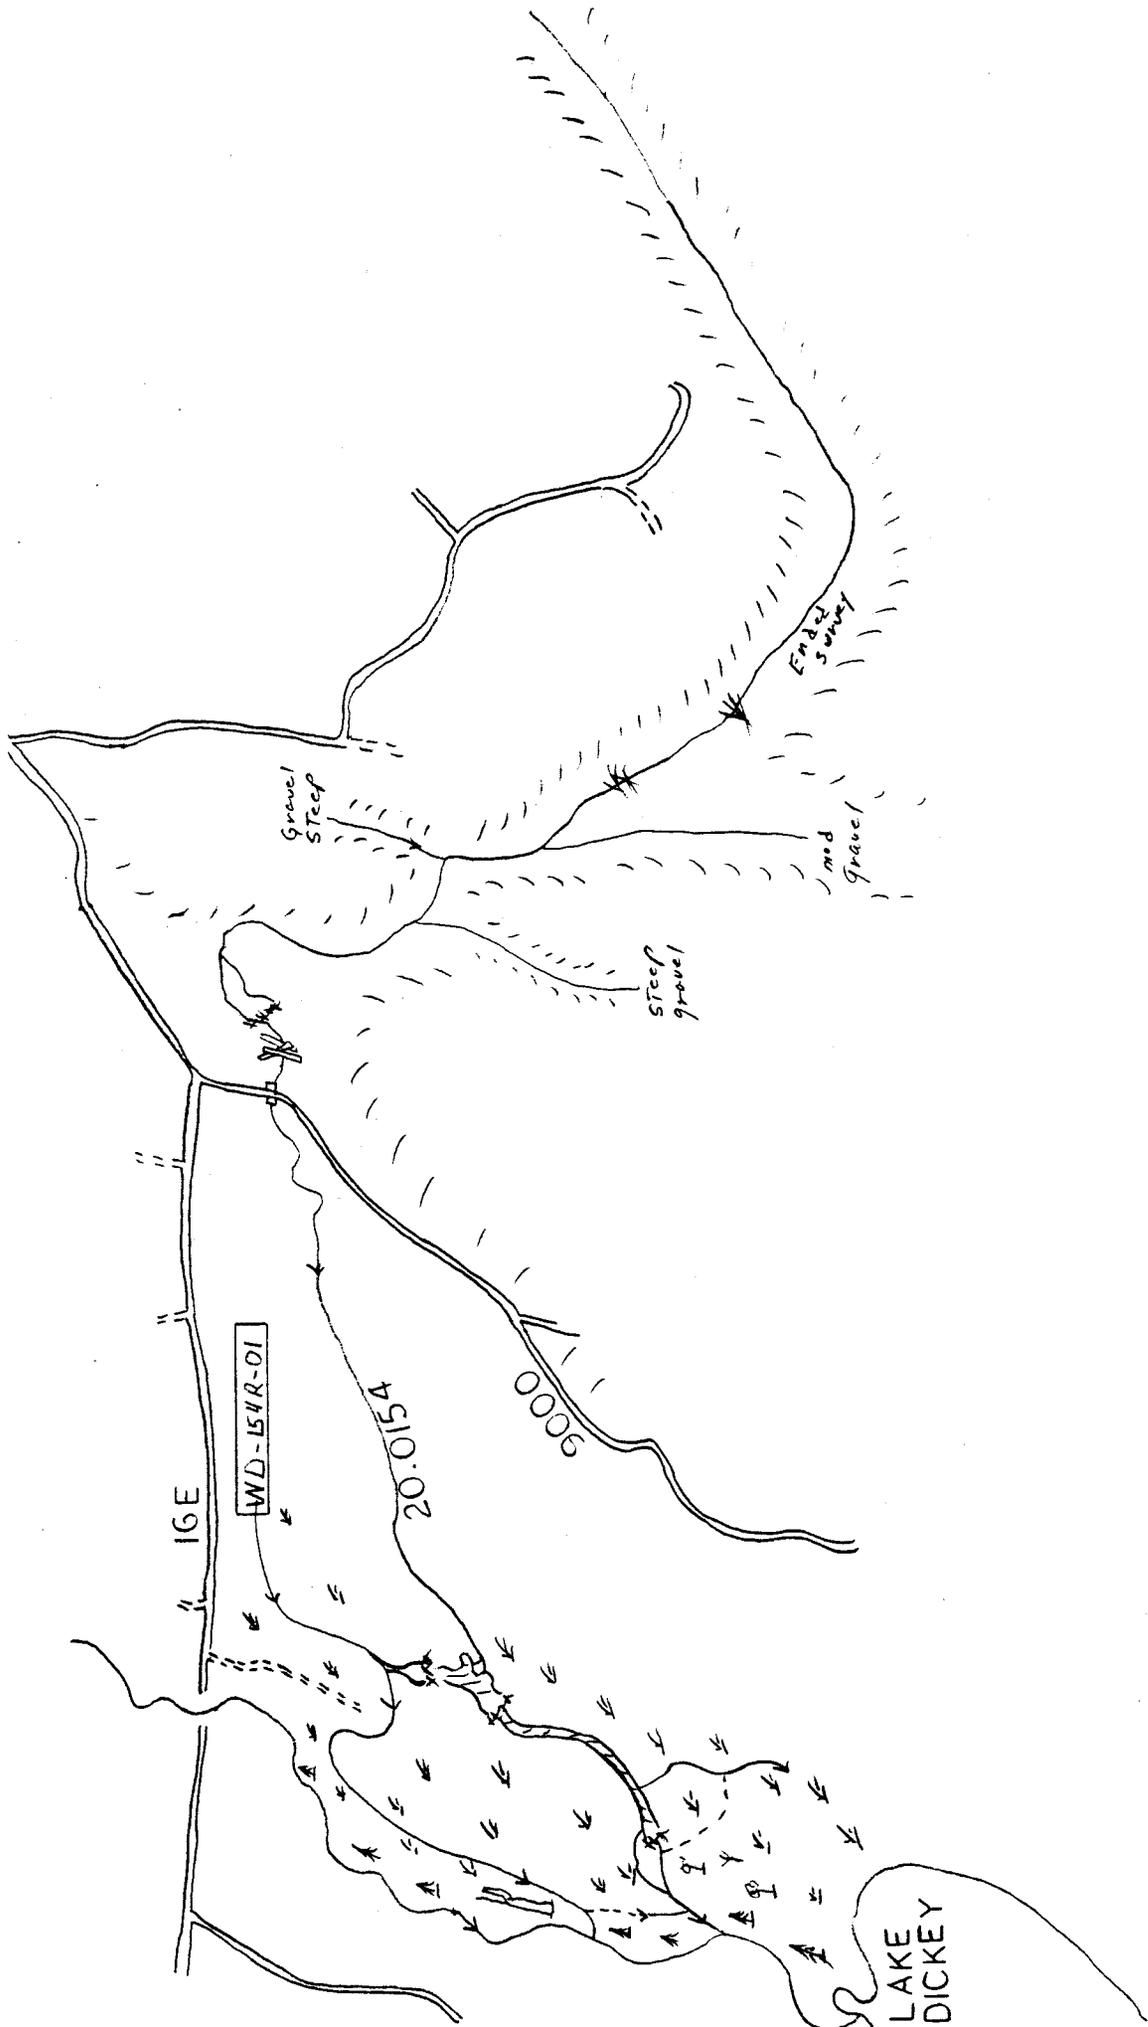

**LANDOWNER:** Unknown possibly Rayonier Timberlands and DNR

**COMMENTS:**

- This channel is one of many that grace this marsh. The channel is a water source and flows toward 20.0154. Beaver dams force some of the water into another portion of the wetland which bypasses to Ponds Creek. The bypass also receives water from 20.0154 through various channels.

**RECOMMENDATIONS:**

- Maintain integrity of the marsh.
