FLOODING POTENTIAL: Low

LANDOWNER: Unknown at this time probably ITT Rayonier.

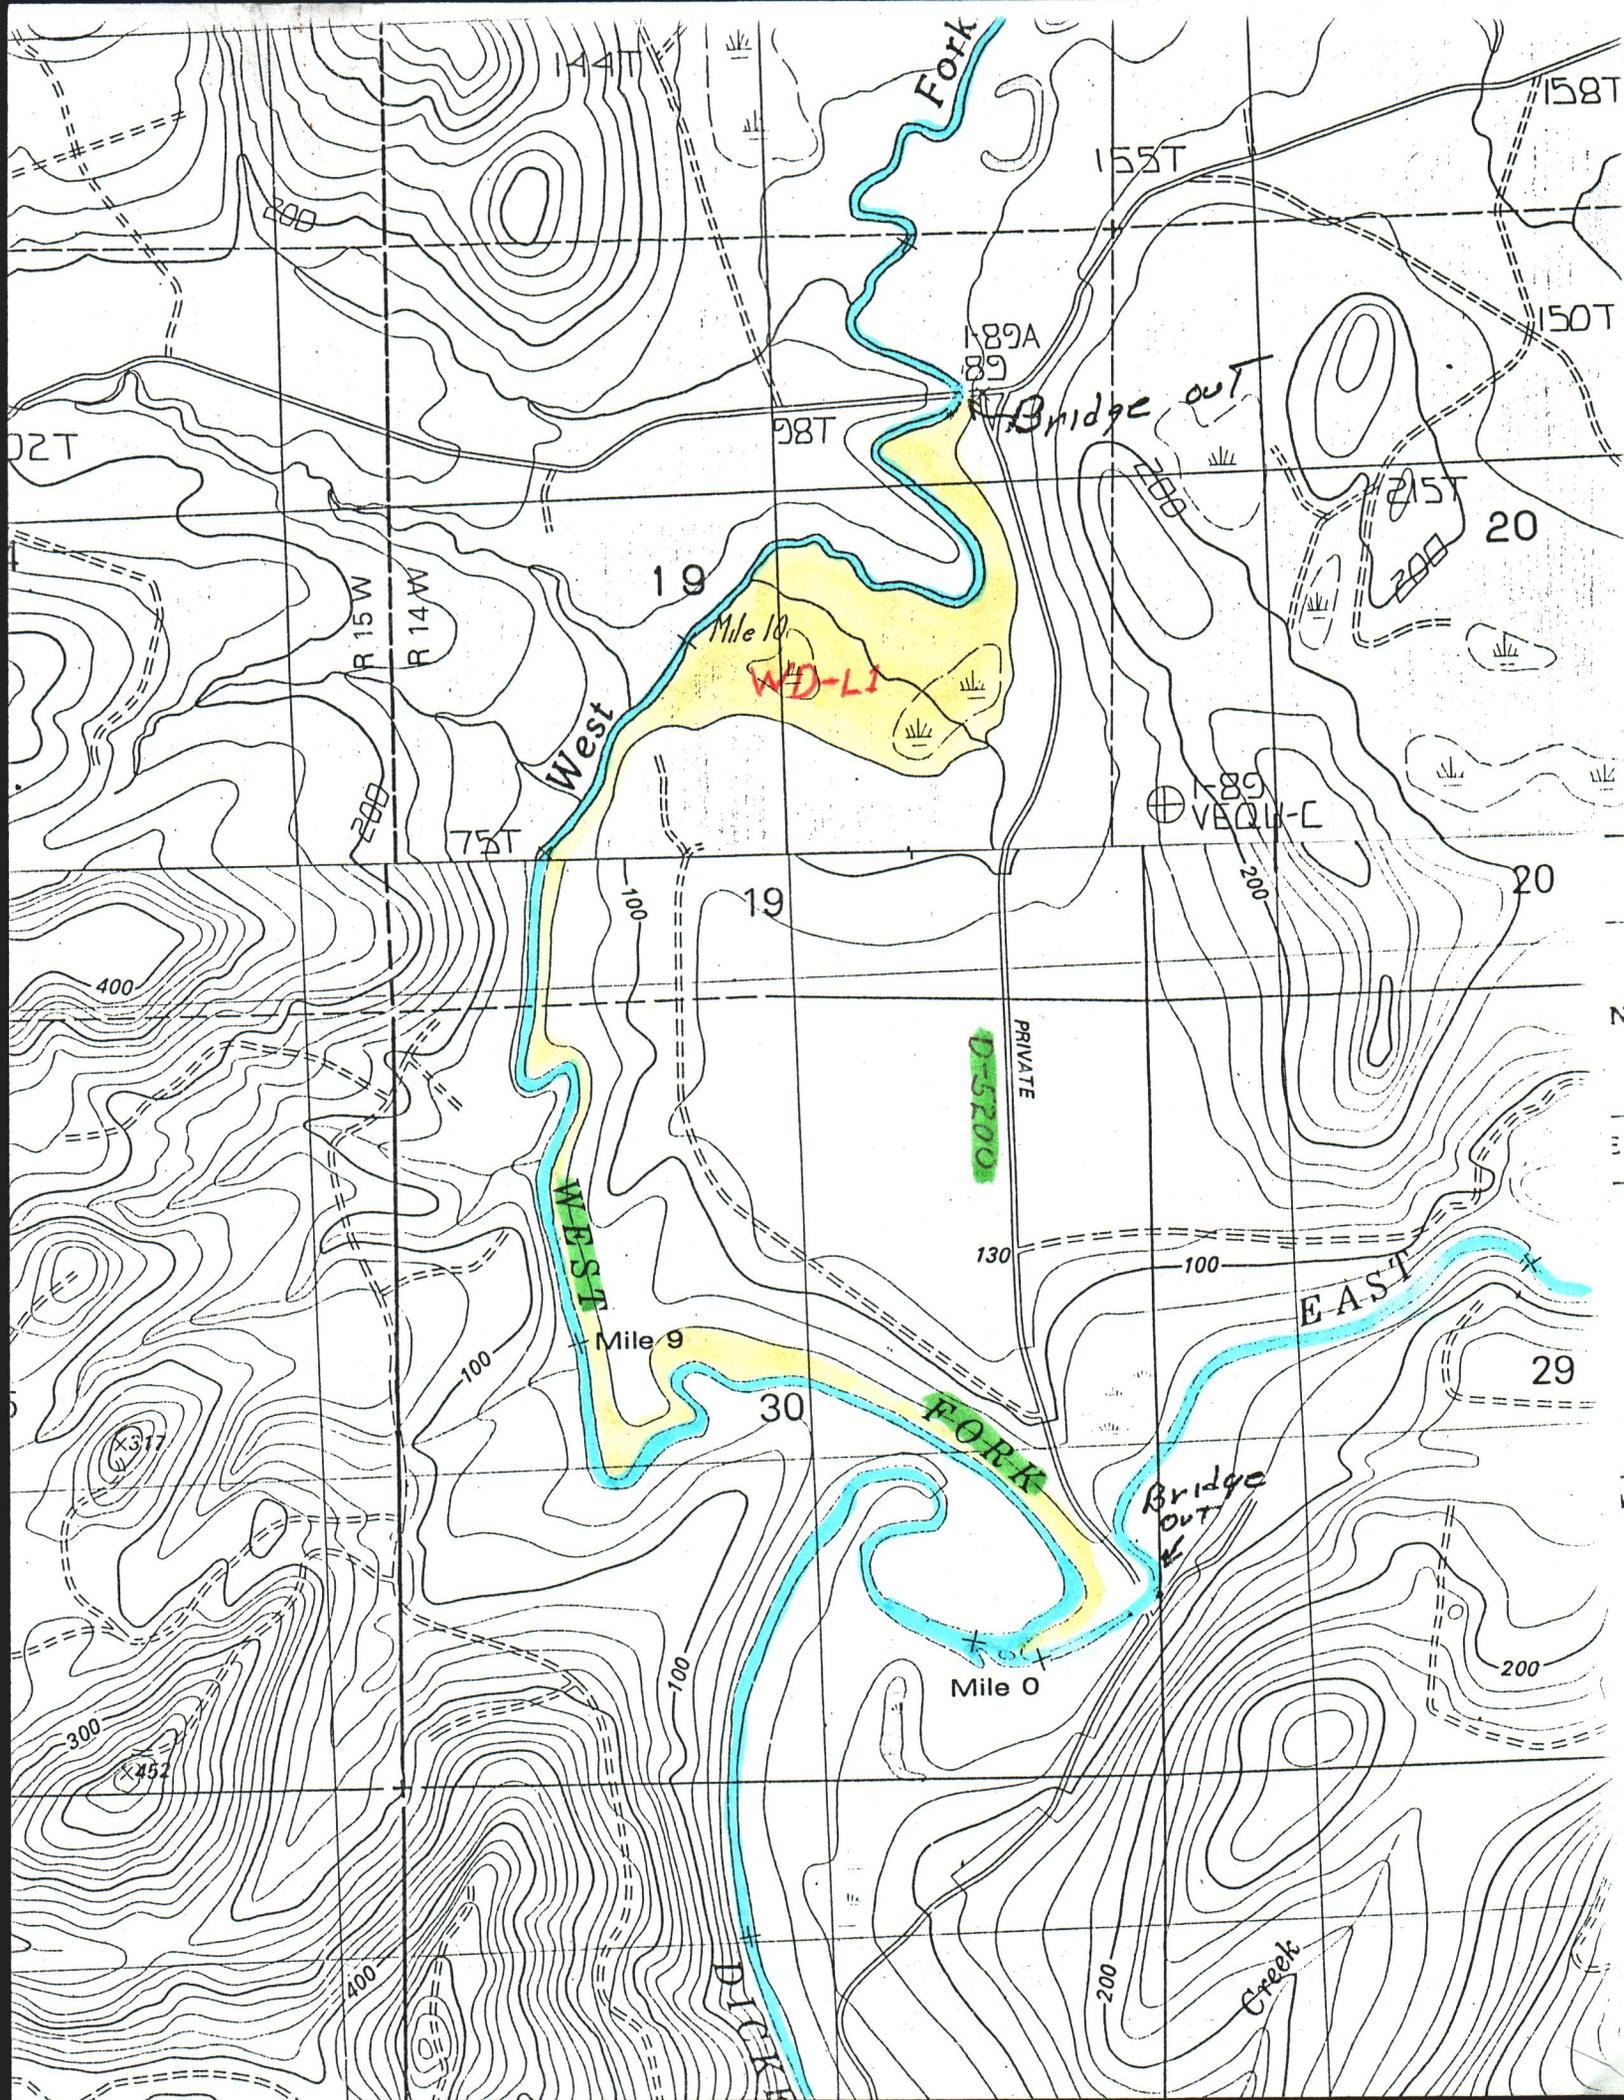

COMMENTS & RECOMMENDATIONS: This stream has:

- A small debris jam at the mouth, that will submerge on about a 1 m rise of the river.
- A moderate gradient throughout.
- Is still watered after a considerable dry spell.
- One opportunity for habitat enhancement (plank control).
- Road access to this site.

Recommend: leaving as is, fish will use it as refuge during freshets. An excellent back water develops in the valley during floods.
