Walk due west (towards the Dickey) from the landing (Spruce Butt Landing) and WD-L3-07 is located just south of the landing.

FISH ACCESS AND CURRENT USE: Egress is excellent. Channel has a low gradient and may dry up during dry periods. No fish were observed in this channel.

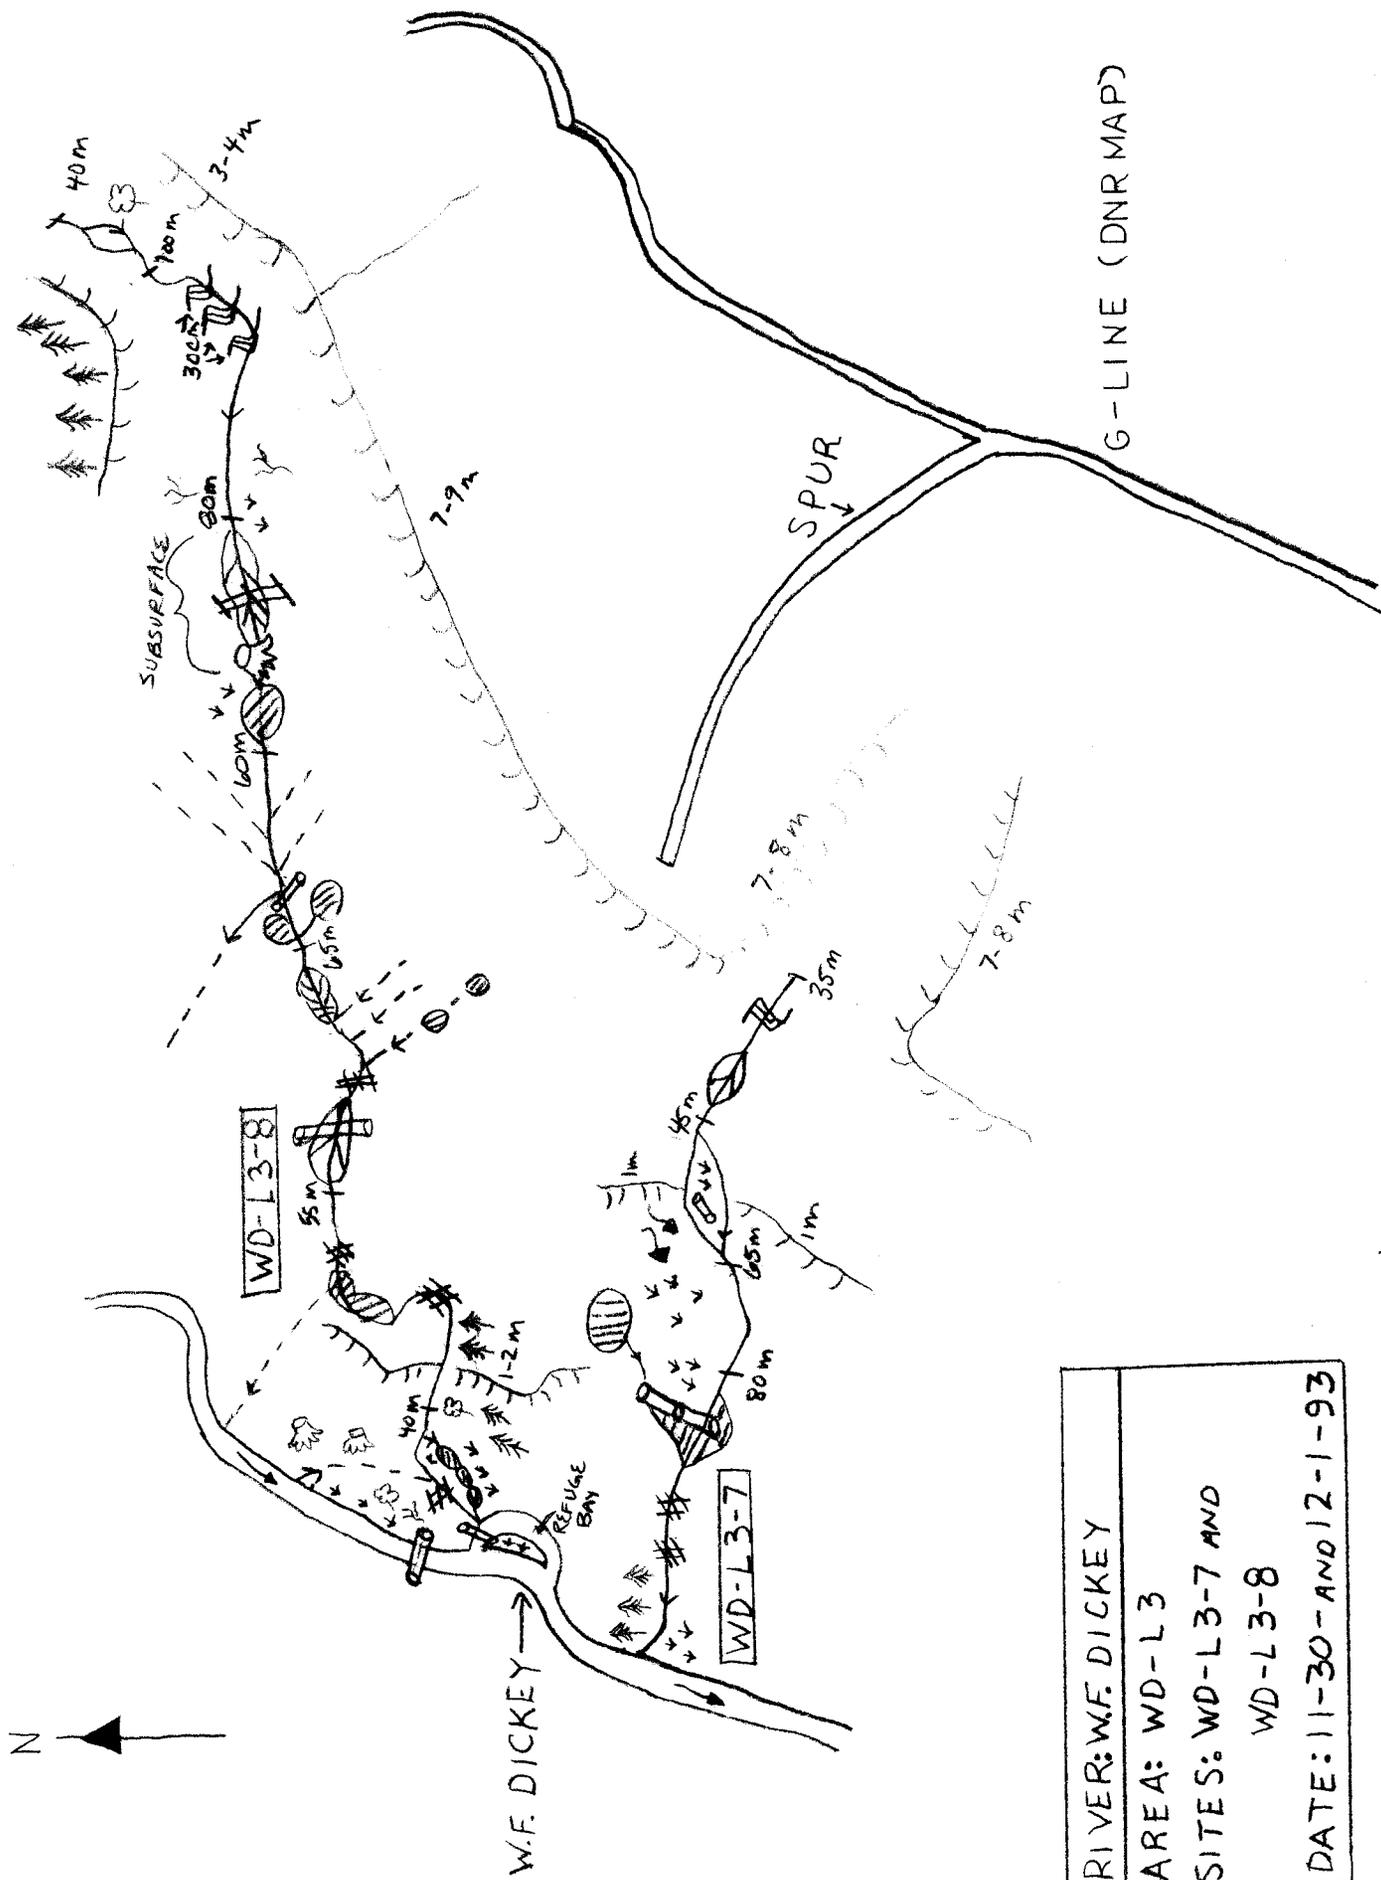

FLOODING POTENTIAL: Lower end of stream is susceptible to backwater flooding.

LANDOWNER: Rayonier, Inc.

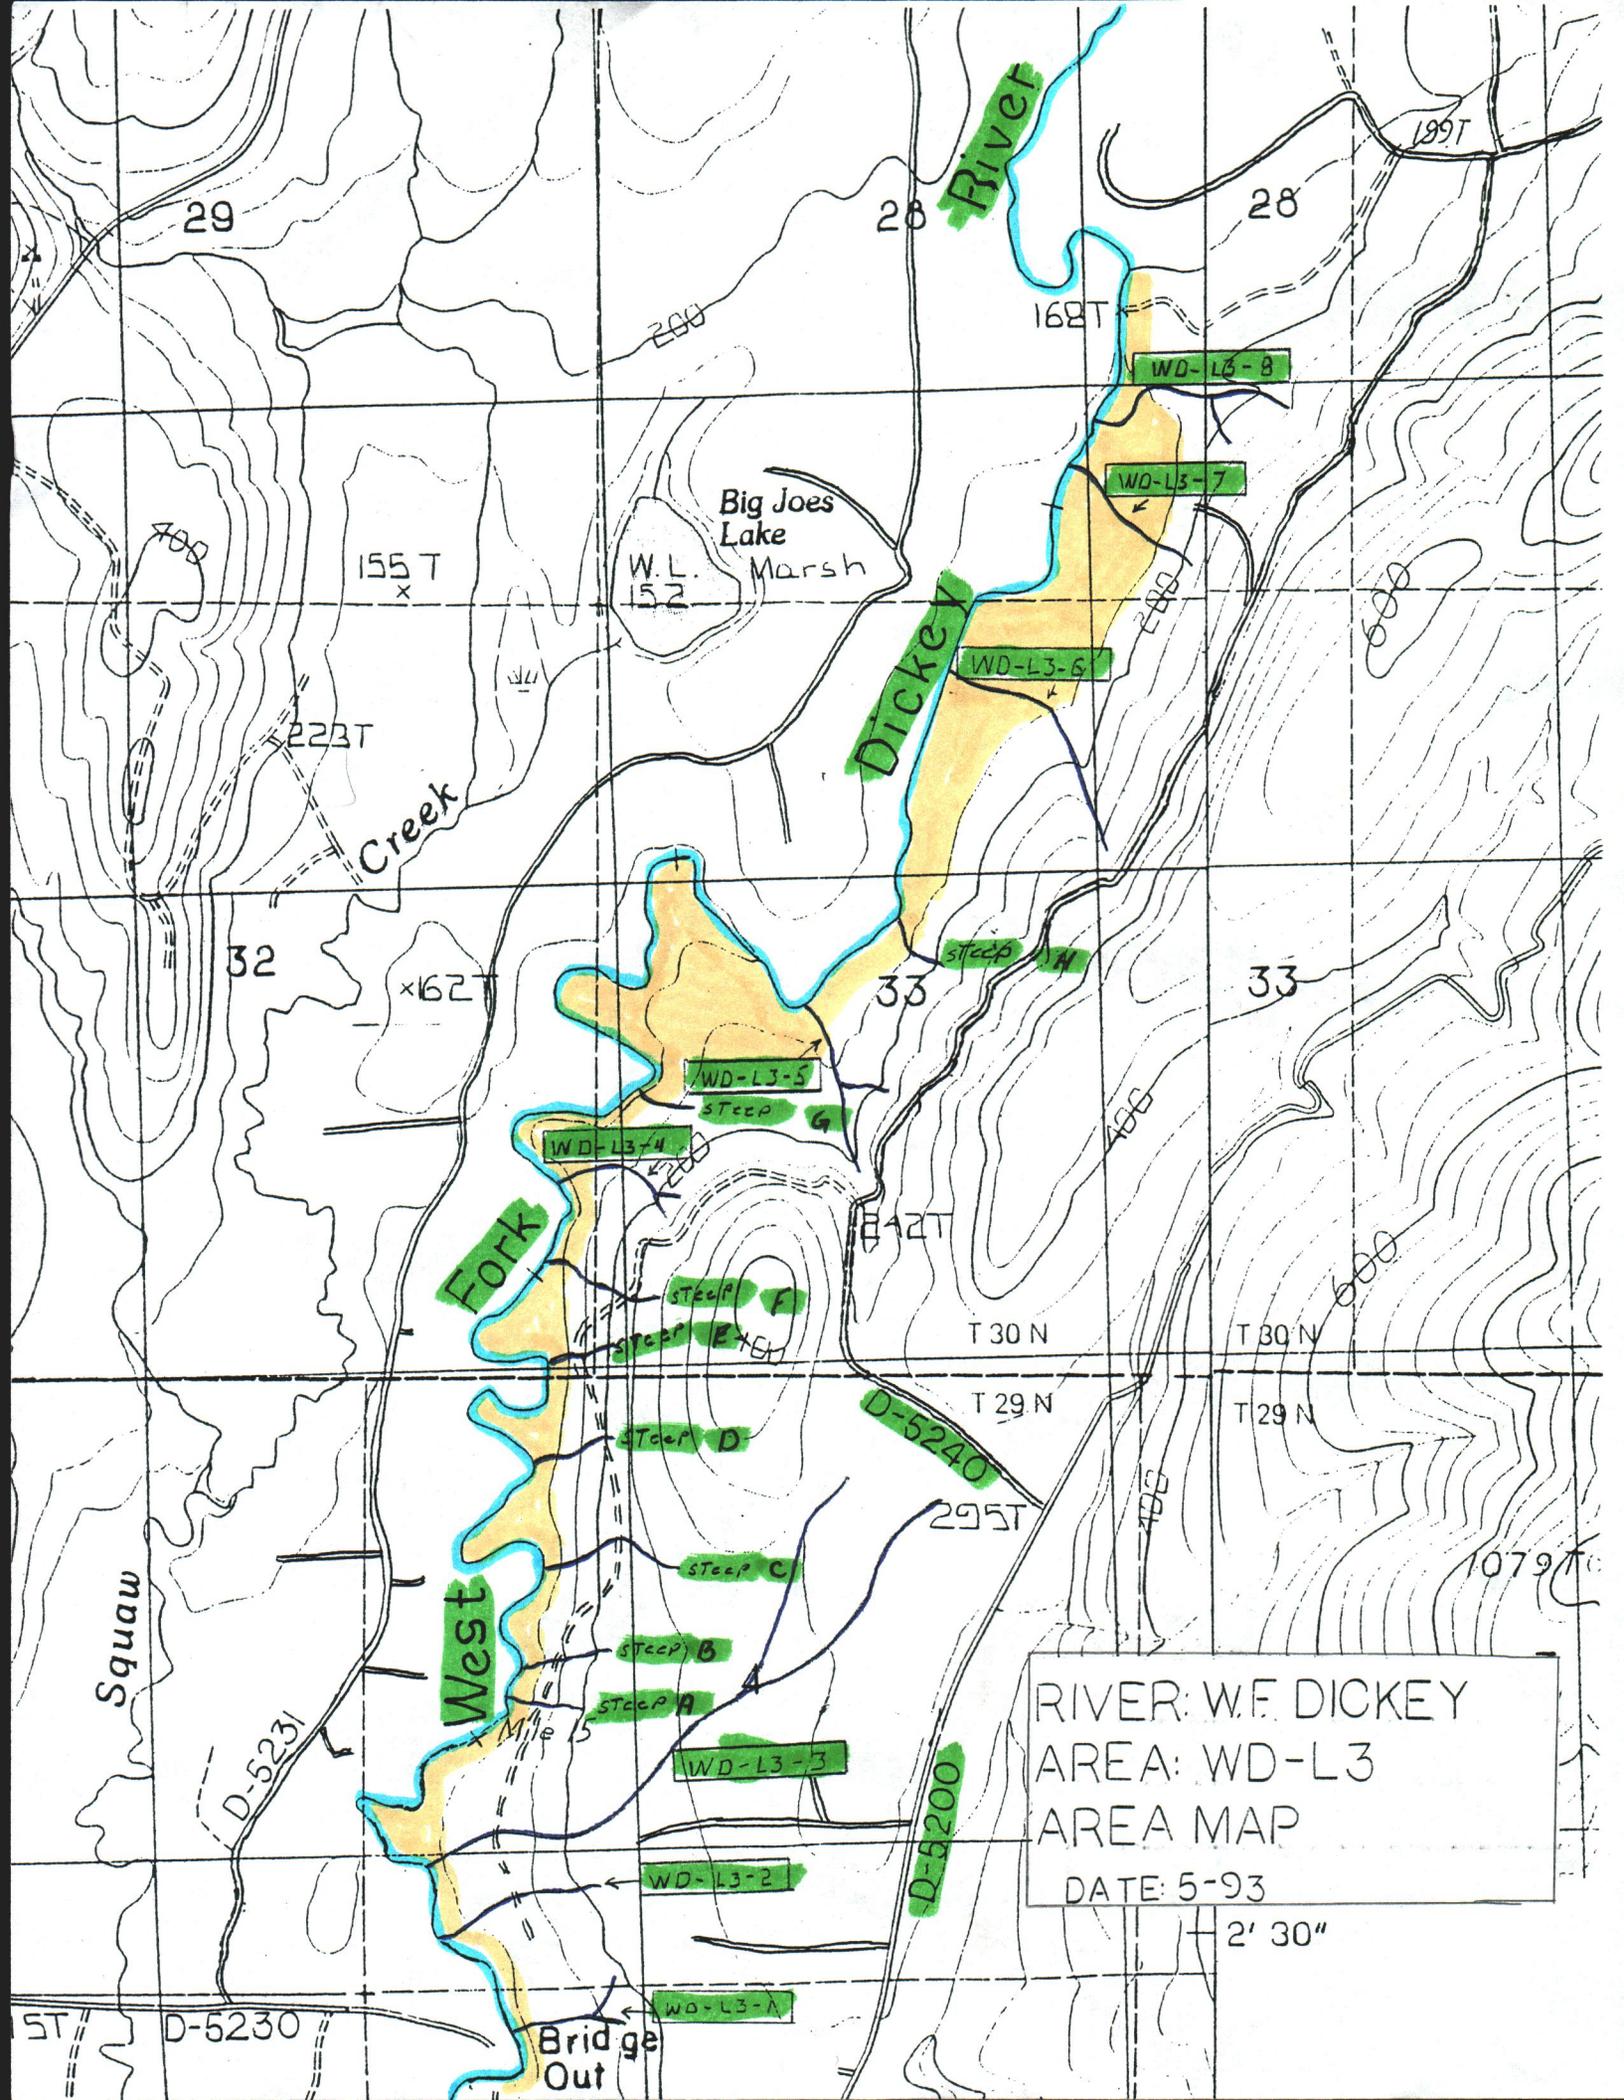

COMMENTS & RECOMMENDATIONS:

- low gradient
- logging in the area has disturbed and sedimented stream
- relatively undefined channel with braiding in middle reach
- wetland vegetation types include Juncus sp., Carex sp. & Scirpus sp. - some LOD cover and lots of stumps in the vicinity
- at 200m is a cascade approximately 60cm high
- stream continues above becoming much steeper

RECOMMENDATION - stream has beaded channel potential
