

**SITE NUMBER:** WD-R2-01

**LOCAL NAME:** Unnamed

**WRIA:**

**NORTH COAST OFF CHANNEL SITE INVENTORY DATA**

**RIVER SYSTEM:** W.F. Dickey

**DATE:** 3/24/93

**OBSERVER:** Mosley

**CHANNEL TYPE:** Terrace Tributary

**TRIBUTARY TO:** W.F. Dickey

**SITE LOCATION:** RB @ RM: 11.2 (DNR Photo)

**LEGAL DESCRIPTION:** SW ¼, SE ¼, Sec. 18, T 29 N, R 14 W

	<b>UPPER END</b>	<b>LOWER END</b>	<b>RIVER TEMP</b>
<b><u>WATER TEMP:</u></b>	6.5° C	6.5° C	7.0° C

<b><u>FLOW (CFS):</u></b>	2.0	5.0	
---------------------------	-----	-----	--

**SUBSTRATE TYPE:** Clay/Mud/Wood Debris

**SITE SIZE:**

<b>Length-</b>	630 m		
<b>Width-</b>	Water surface = 1.0 - 3.0 m		
	Channel = 2.0 - 3.0 m		
<b>Depth-</b>	20 - 30 cm	<b>Max-</b>	90 cm

**WATER SOURCE:** Springs, surface runoff, woodland marsh

**DIRECTIONS TO SITE:** Head north from Forks on HWY 101. Turn left on La Push road 0.75 mi. past the Calawah bridge. Proceed 3.1 mi. down La Push road and turn right on Quillayute Prairie road. Continue for 3.95 mi. and turn right on Mina Smith road at the cemetery. Continue for 0.8 mi. and turn left onto the logging road D-5000. Proceed on D-5000 road for 6.25 mi. and turn right on D-5210 (gate key is available at the ITT Rayonier office). Drive 2.3 mi. to end of road at the West Fk. Dickey. Walk upstream on the right bank 0.3 mi. The 2nd stream encountered will be WD-R2-01.

**FISH ACCESS AND CURRENT USE:** Access is excellent - a log jam lying in the West Fk. Dickey off the mouth of this channel provides shelter to fish and probably increases the chance of juvenile fish finding this stream during high flows. No fish were observed.

**FLOODING POTENTIAL:** The lower 200 m or so of this stream is prone to flooding.

**LANDOWNER:** ITT Rayonier

**COMMENTS & RECOMMENDATIONS:** This stream has:

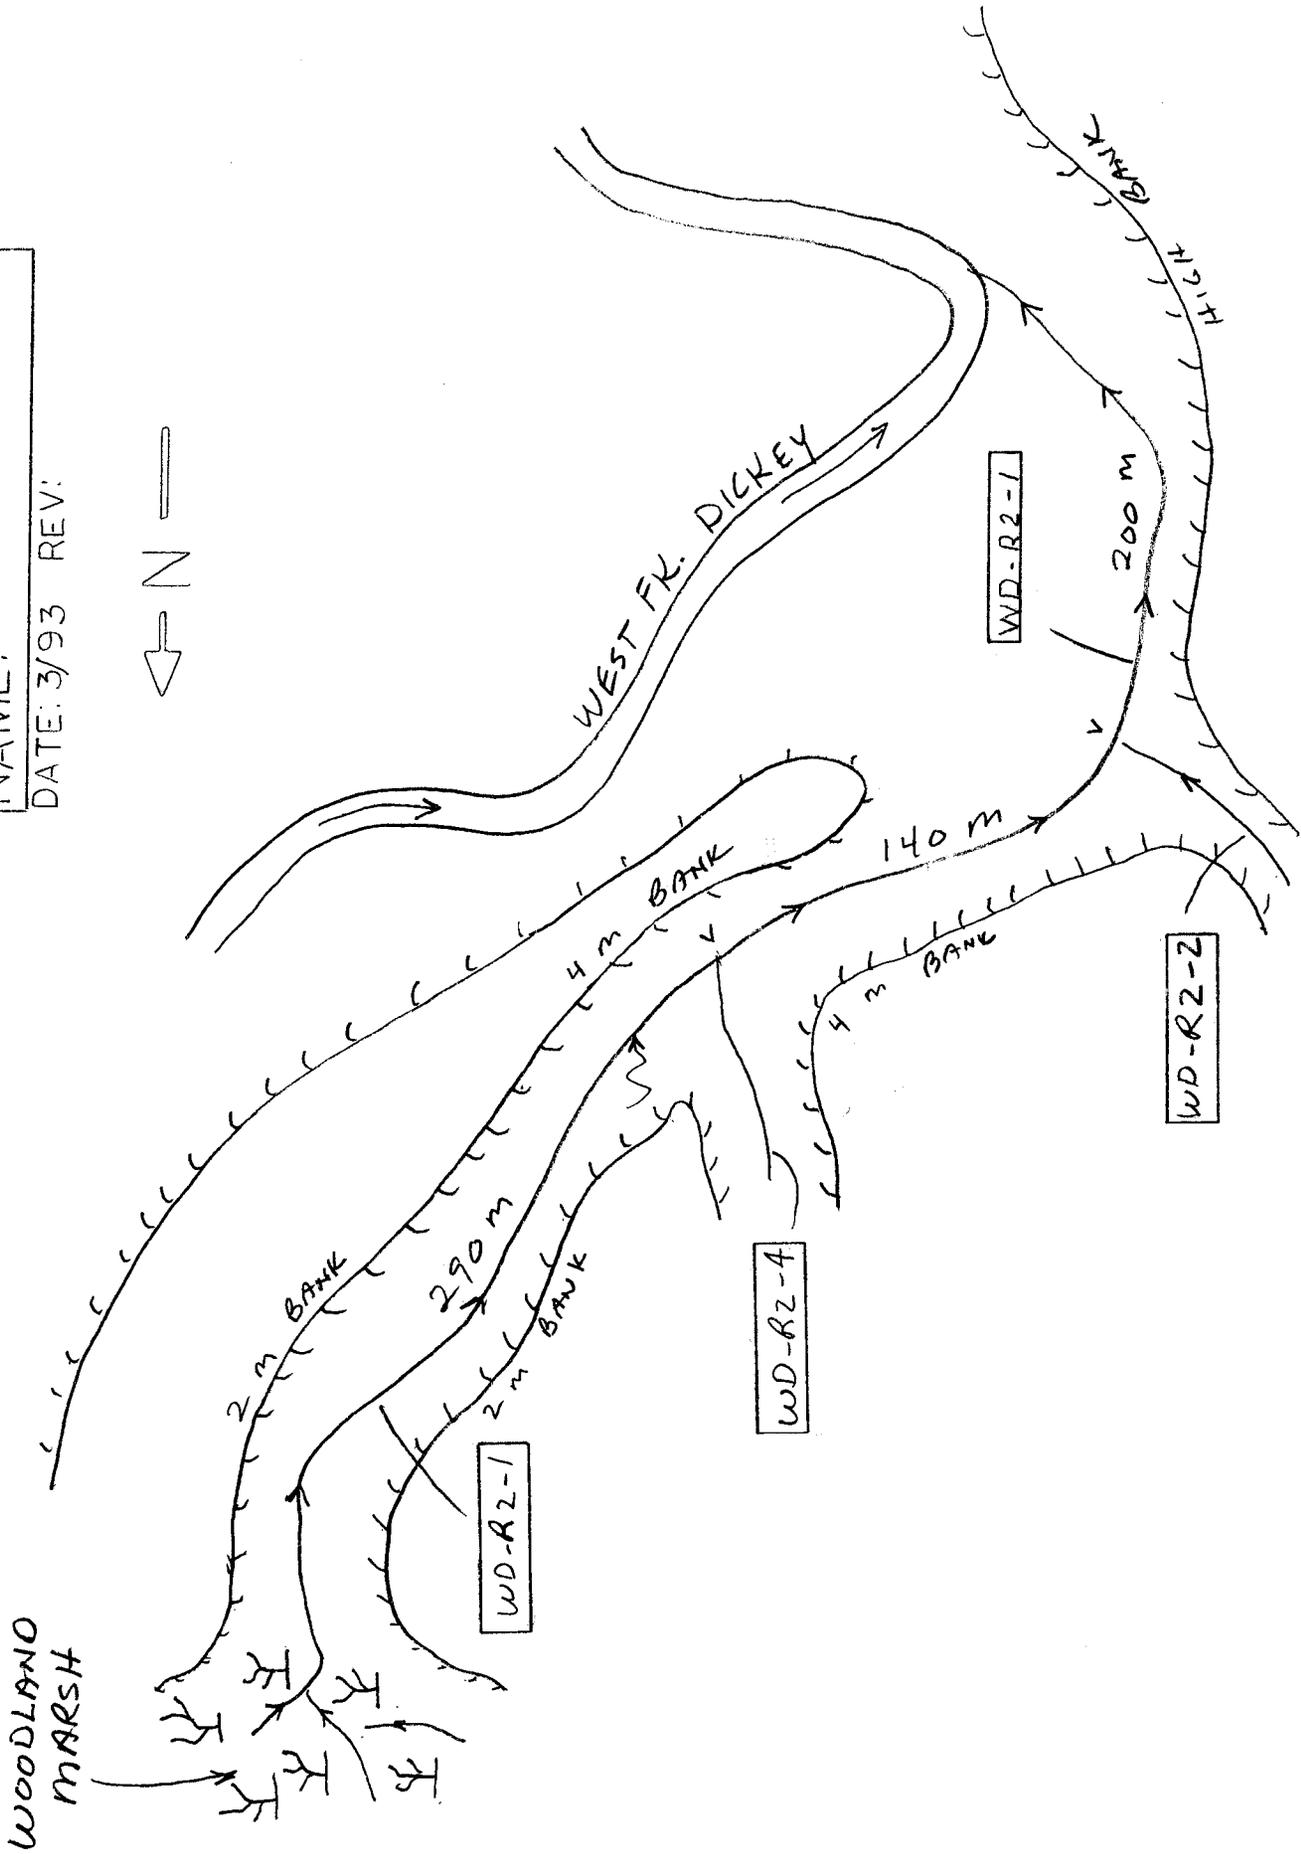

- A good egress to the river.
- An overstory of 2nd growth hemlock its entire length.
- Dark, tea colored water.
- A low to moderate low gradient.
- This stream is similar in characteristics to Swamp Cr. on the Bogachiel (Undi Lake outlet). It is useful mainly as a rearing stream and has no spawning potential.

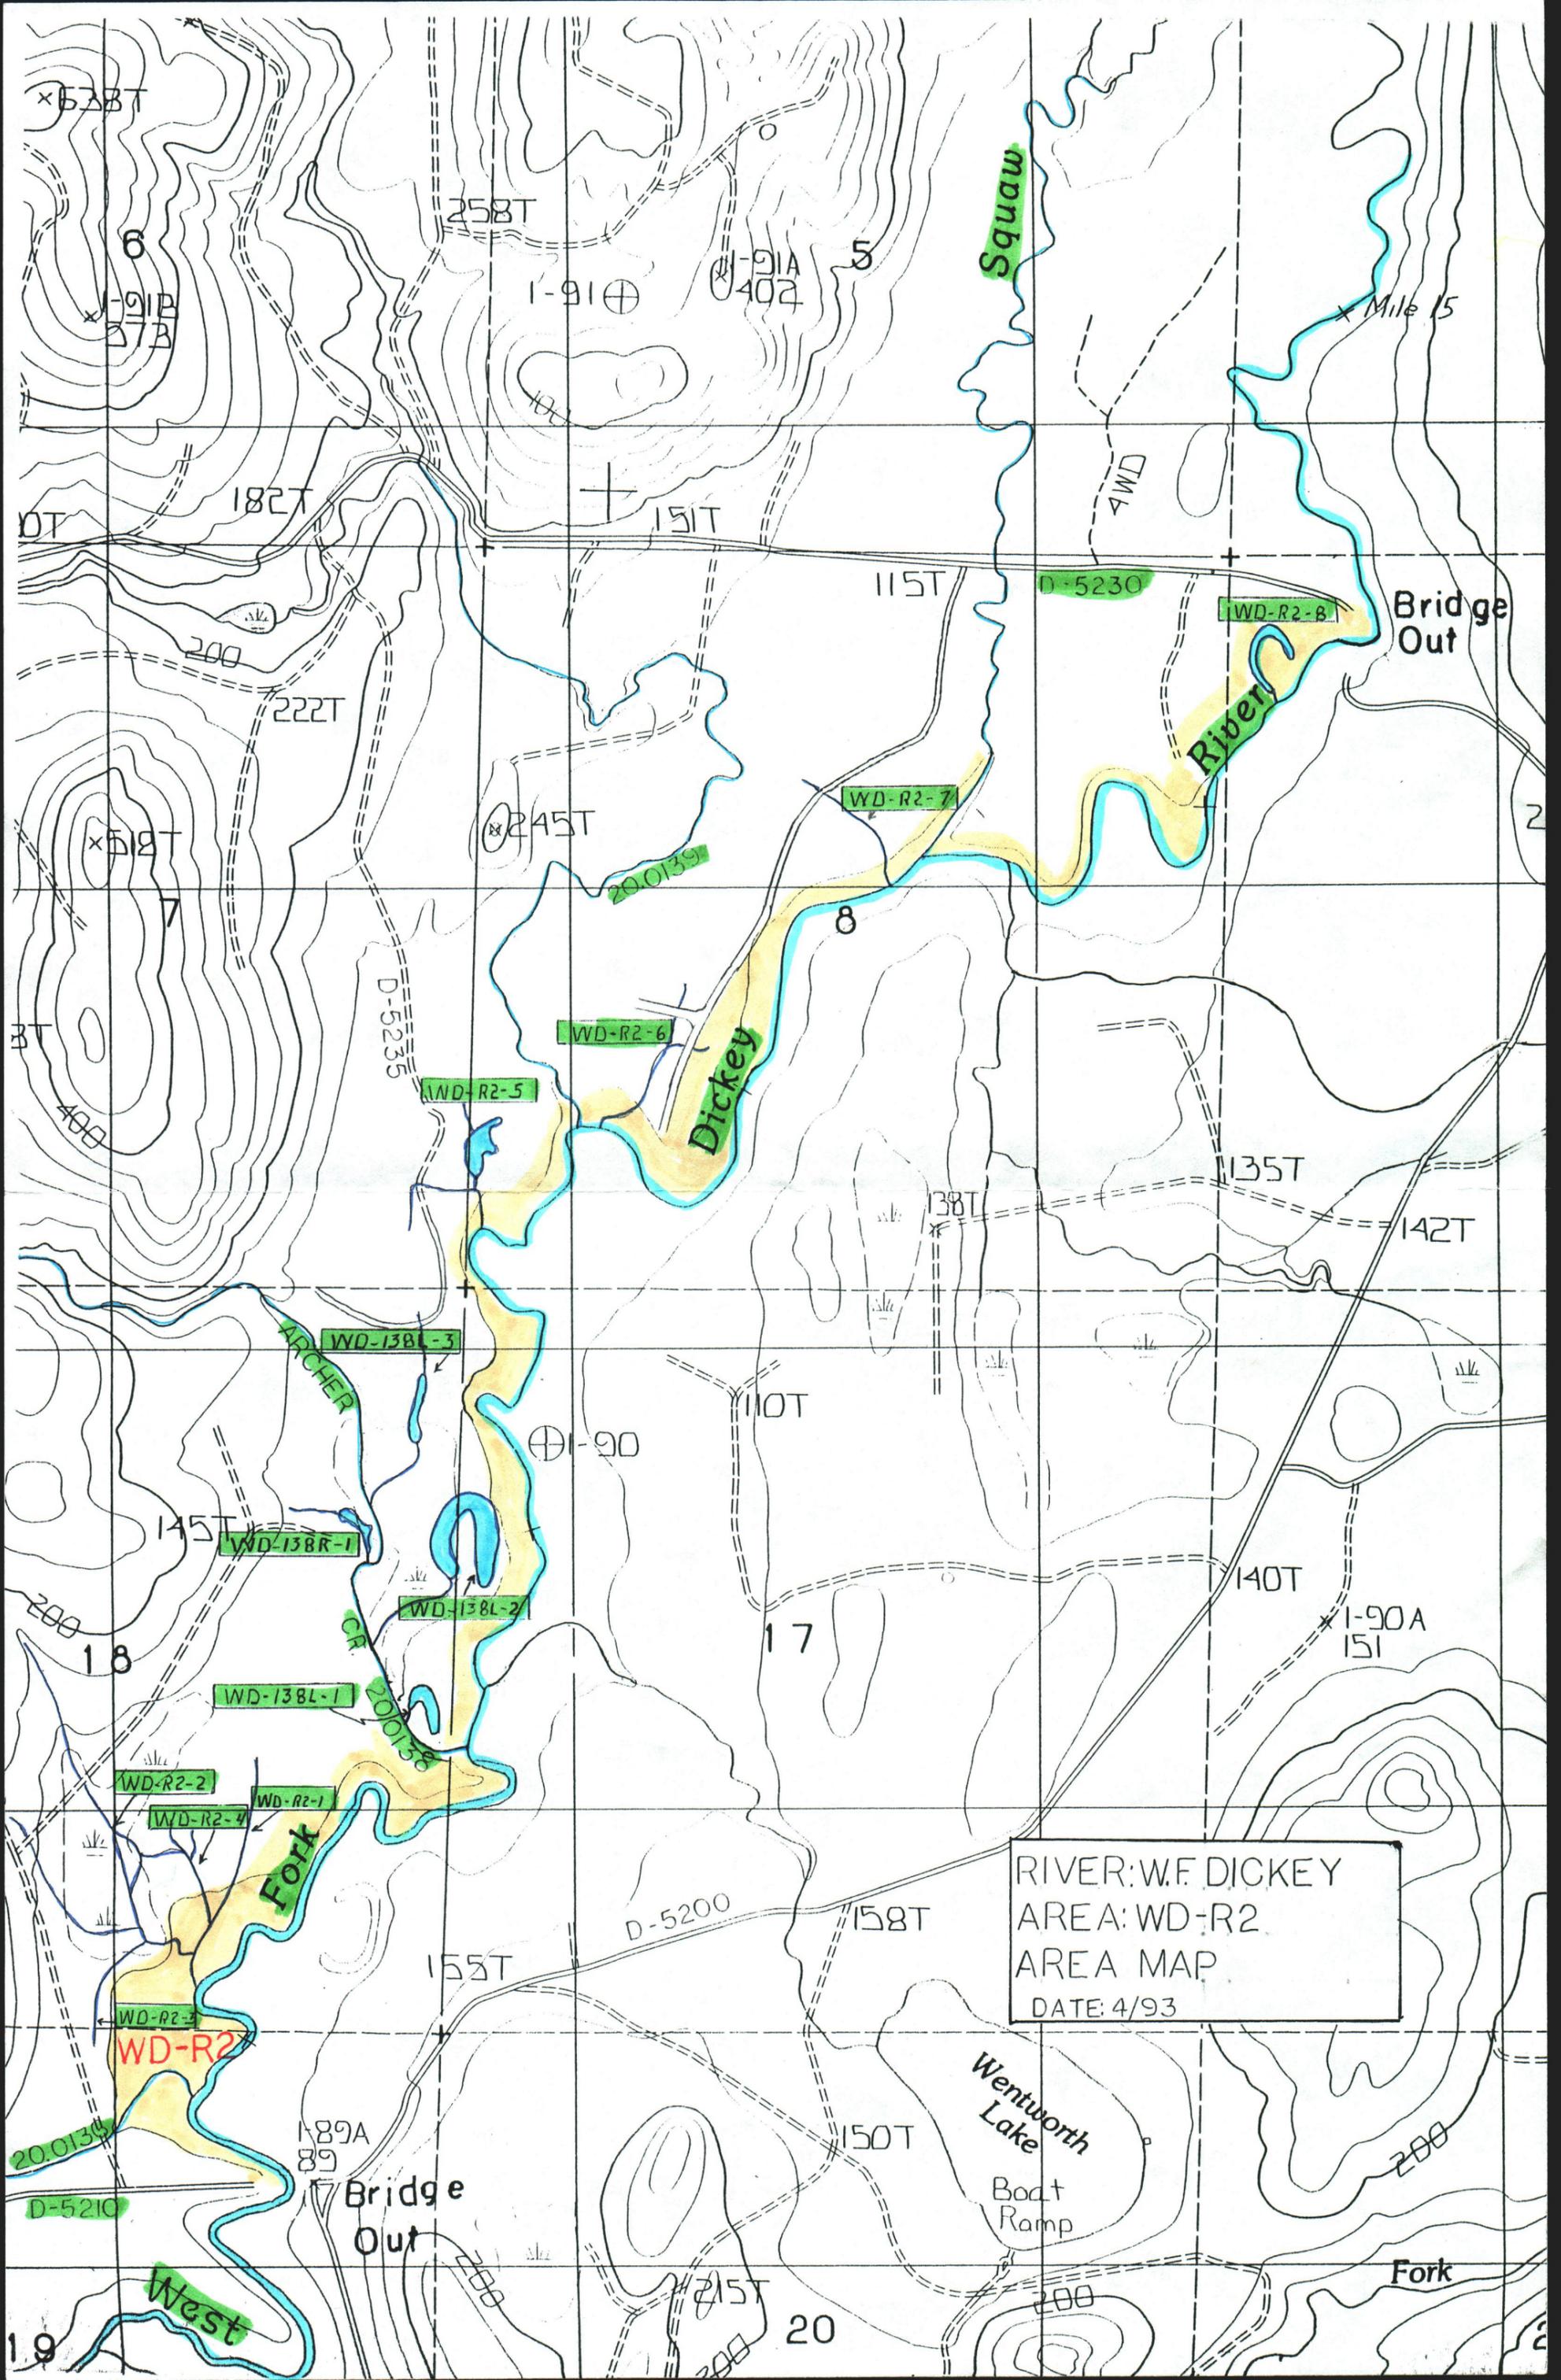

**Recommend:** (low priority due to access)

- Install series of log controls and back fill with spawning gravel beginning at 200 m from mouth.
